TAPWARE COLLECTION

A scenic view of a river flowing through a dense forest. The water is blurred, suggesting a long exposure, and flows over numerous large, moss-covered rocks. The trees are thick and their branches are heavily laden with moss, creating a lush, green environment. The lighting is soft, filtering through the canopy.

NORTHLAND BUSINESS ENVIRONMENTAL EXCELLENCE AWARD WINNER 2022

FORENO. Tapware were proud winners of the 2022 Environmental Excellence award. The Judges commented; *“This local business recognises the importance of our precious water resource and has designed a product that not only minimises water use through consumer operation, but also in manufacturing and product testing. They have gone a step further to reduce energy consumption with their Cold Start Technology, use of recyclable packaging and energy efficiency in the workplace. Northland Regional Council supports businesses to adopt net-zero emission practices so applauds Foreno for taking this action. They are an example of a business thinking smarter and responsibly.”*

TAPWARE MADE FOR NEW ZEALAND

In 2019 FORENO celebrated half a century of creating quality water fixtures for New Zealand homes and businesses. Since then, New Zealand and the world has seen many challenges. FORENO has continued to stand true to its roots, evolving to suit the requirements of an ever changing world, whilst maintaining our high quality and performance standards.

New Zealand owned and operated, FORENO products are engineered to excel in our uniquely challenging conditions, including options for those on mains, low, and unequal water pressure systems. Our tapware is affordable, easy to install, and constructed to stand the test of time.

We design for New Zealanders, and have a tapware solution for everyone – from plumbing professionals to the DIY enthusiast.

All of our products are 100% tested before they leave the factory and are backed by industry leading warranties with local customer support for that extra peace of mind.

From the FORENO team, thank you for your support - we look forward to another 50 years of tapware, Made for New Zealand.

s i n c e 1 9 6 9

A close-up photograph of two black faucet handles. The handles are cylindrical with a matte finish and are positioned on a white marble surface with gold-colored veins. The background is a dark, textured surface. The lighting is dramatic, highlighting the smooth texture of the handles and the natural patterns of the marble.

304

304 STAINLESS STEEL = 100% LEAD FREE

The PURITY range is constructed from solid 304 Stainless steel. 304 Stainless steel is often used in commercial kitchens due to its extremely durable finish and excellent protection against corrosion. 304 Stainless Steel is manufactured without lead, so it is 100% Lead-free, giving you the safest possible drinking water, together with a highly durable and easy to maintain finish.
