We work with everyone whose life is impacted by clutter. Private clients, NDIS self and plan managed clients, government and non-government organisations.

We work alongside our clients to help them make decisions about their belongings and how to store them in a functional way that works for their household. We work at a pace to suit the client and all decisions are theirs. We also assist with removal of discarded items where practical.

We have experience working with clients who have physical, neurological, or psychosocial challenges. We can adapt our process to support our clients in any way they require.

Our team has training in chronic disorganisation/hoarding, first aid, and NDIS client support. All have Police Clearances.

We service metropolitan Perth and Mandurah.

We can assist in general decluttering and organisation, downsizing, hoarding/squalor, deceased estates and moving house preparation
