

 **CinnaBalm™**

2-in-1 bite balm

**Australia's first
all-in-one
solution to protect
your skin outdoors
and soothe bites.**

About CinnaBalm

CinnaBalm is a powerful, lightweight and hydrating balm formulated with 100% natural ingredients that effectively protects your skin outdoors and soothes existing bites.

CinnaBalm has a unique 33% blend of proven essential oils that both protect you before you go outside and after you're bitten.

Unlike most bite balms that leave your skin feeling greasy, CinnaBalm is rich in almond oil and beeswax to hydrate your skin leaving it feeling soft, smooth and protected after application. Suitable for kids and adults.

CinnaBalm is proudly owned and made in Australia. Our packaging including the labels are fully recyclable.

Hello!

My name is Emily

I am the Founder and Head of Marketing at CinnaBalm. CinnaBalm was born out of a personal problem I had with insects, they loved me and the bites would leave red, itchy and swollen welts on my skin...not fun! My skin has been notoriously sensitive my whole life and regular insect repellents would leave my skin feeling irritated and dry. I couldn't find an all natural solution that repelled and soothed existing bites which inspired me to create one myself.

CinnaBalm is a 100% natural bite balm that also soothes existing bites and is proudly Australian made and owned.

Vision

Our vision is that everyone on earth can co-exist with our insect friends. We may not have to love insects, but we certainly don't want to harm them and that's why all of our products contain 100% natural ingredients.

Mission

Our mission is to create high quality natural products that fit in with our lifestyle, and that have minimal impact on the insects we live with and the environments we all co-exist in.

Ingredients

We are proud of our 100% natural and powerful formulation that is made with the highest quality ingredients. Our formula is simple and we strive to be transparent about what we use and what you put on your skin.

Almond Oil: powerful moisturiser, rich in vitamin A, vitamin E and contains omega 3 fatty acids

Beeswax: naturally moisturising, soothing and antibacterial properties when used on skin

Cinnamon oil: naturally antibacterial, anti-microbial and anti-inflammatory properties reduces swelling and itchiness

Eucalyptus oil: natural repellent. Anti-inflammatory, anti-septic and anti-bacterial properties.

Citronella: natural repellent. Anti-fungal and wound healing properties

Pine Oil: natural repellent. Reduce itchiness and inflammation

Camphor Oil: Slight cooling affect on skin. Relieves itchiness

Menthol: Slight cooling affect. Relieves itchiness and swelling

Mountain to Molehill!

Love this product, bought it last summer and used it religiously. It took my march fly bite from a mountain to molehill and even kept those pesky mosquitoes away at night. Will definitely purchase again!

Customer

Great Aussie Product!

Fabulous product! I'm in Fiji & used it for the past 10 days. Really effective in repelling the nasties! Luv it and about to order more...thanks!!!

The perfect natural alternative!

Mosquito repellent is critical but finding a natural AND effective option has always been a struggle...until I found CinnaBalm! The best part – it smells GREAT! Easy to use. Great portable size. A+!

The children loved it

My children usually use paw paw on their mosquito bites and actually really love CinnaBalm, they prefer it! They find it soothing and it takes the itch out of the bite. Thanks for creating such a great product.

and they love it!
