The Original Aluminium Opening Roof

Guaranteed never to rust, but that's just the beginning.

Complete Service from Idea to Completion

Yes, we can handle the entire council approval process!

Perfect for Australian conditions and coastal areas! We've transformed thousands of homes in Greater Sydney with the Eclipse Opening Roof.

Opening Roof Specialists are celebrating 30 years in business. Our flagship product is the Eclipse Opening Roof, which outperforms all competition.

With years of ambition to be a market leader, we decided to specialise solely in the Eclipse Opening Roof system which is truly unbeatable.

CELEBRATING
30
YEARS

Alex Pataky
Managing Director

We founded Steelbond Sydney Pty Ltd over 30 years ago and became excited about opening roofs in 1989. Today we're better known as Opening Roof Specialists, with a focus on high quality aluminium systems that will outlast any other opening roof system on the market.

Our company is proudly Australian owned and operated with a dependable team you can trust.

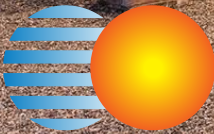

Why Choose the Eclipse for Your Opening Roof?

- All aluminium frame, gutters and louvres
- Slimline louvres with 170° rotation control
- 60+ available colours and unlimited designs
- Energy efficient and easy to operate
- Built to last and exclusively installed by ORS

Experienced Roof Installers

Specialised in custom installation.

What does **custom installation** actually mean?

The first important step is to provide you with a free design session with an experienced Design Consultant. They are able to quote off plans or work with your architect or builder as this will uncover all options available to achieve your vision.

Your opening roof system will be designed and presented with a written proposal and quote to locally produce, deliver and install your custom designed roof system and all selected accessories.

If you look at any completed project by Opening Roof Specialists, notice that each system is designed, colour matched, and seamlessly integrated to enhance the aesthetic of existing structures and your outdoor surrounds.

Every worker you meet onsite is an employee of Opening Roof Specialists. We don't use sub-contractors, all our work is quality controlled and guaranteed.

Endless Possibilities for Your Custom Design

Inspired solutions for outdoor entertainment areas.

Slimline aluminium louvres and framing styled to integrate with your architecture, fixed to existing concrete, steel or timber structures - plus other options available. Optional LED downlights or spotlights and a range of standard or premium powder coat options, woodgrain or platinum level coatings for commercial high-rise buildings.

Patented Australian design with no cords, ropes or wires. Ziptrak® outdoor blinds will instantly transform your outdoor area into an entertainment area suitable for any time of year. Choose your grade of UV mesh to protect from rain, heat and wind. Enjoy a feeling of seclusion while preserving your outdoor views.

Natural timber look with the durability of aluminium. DecoWood® is 50% more durable than standard powder coating and will never peel or rub off. Choose from 30 DecoWood® timber grains and a range of different textures. DecoWood® achieves a luxurious, super durable coating using a special sublimation process.

Stay warm outdoors with an elegantly designed, multi-award winning HEATSTRIP® outdoor heater. Unlike traditional convection heaters, HEATSTRIP® heaters will directly heat the surface of the objects through infra-red waves, while convection heaters heat the air between objects. HEATSTRIP® is a popular finishing touch.

Realise the Full Potential of Your Outdoor Area

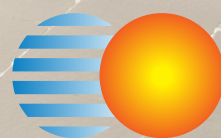

Integrated downlights are a popular finishing touch.

Ask about lighting and other options, including aluminium DecoWood® Eclipse Alfresco Louvres as seen here.
