Lush Meadow 35mm Residential install

Make the Move to Synthetic Grass

Our premium quality synthetic turf is manufactured specifically for the Australian climate. Lush green turf all year round with the look and feel of natural turf.

We offer an 8-year warranty with an expected lifespan of 10-15 years. Synthetic turf is ideal for sun or shade, residential or commercial. The perfect alternative to natural grass.

Ideal for pool surrounds, our products are not affected by salt water or chlorinated pool water. We offer a full installation service or supply only for the DIY enthusiast.

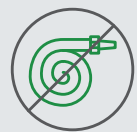

Company

Lush Turf Solutions is a 100% Australian owned and managed family company with a strong focus on quality and service. With over 15 years experience, our fully stocked warehouse and showroom in Chandler is staffed by our professional team who can assist with your enquiries.

Why choose Lush Turf Solutions Synthetic Grass?

.....
We hope to welcome you as a valued customer and have the opportunity to work with you to make the move to synthetic turf.
.....

Premium quality product range
The range of products for landscaping, sport and recreation have been manufactured for the Australian climate. Premium quality fibres and multi layer backing are UV stable to ensure longevity and durability in our harsh climate.
Our global manufacturing partners are recognised as world leaders in grass fibre technology, supplying 72 countries from the largest and most technologically advanced manufacturing facilities.
Due to rigorous testing for health, safety and endurance, our global manufacturing partners are FIFA and FIH preferred suppliers. ISO 9001 and ISO 14001 accreditation ensures a premium quality product for the Australian market. Our range also includes Australian made products.

Child and Pet Safe

Completely safe for children and pets, creating a clean low maintenance environment. No muddy footprints through the house, no grass stains, no allergies. Our hard wearing turf is tough enough for Dreamworld's Tigers.

Installation

A critical factor in the longevity of your synthetic lawn is a professional install using premium quality turf, base materials, adhesive and installation techniques. Our own professional installation teams take pride in their work and treat your project with the utmost care, respect and attention to detail.

Lowest price guarantee

Our products and service represent real value for money, we welcome the opportunity to evaluate competitors quotes, and will stand by our "Price Beat Policy" for products of the same quality standard.

Warranty

Our premium quality turf is guaranteed for 8 years. In the unlikely event of a quality issue, the matter is dealt with effectively and efficiently by Lush Turf Solutions, not a third party.

Made to order

We have the production capabilities to produce many types of synthetic turf for specific requirements.

Frequently Asked Questions

The most frequently asked questions are answered below, if you would like any further information please feel free to call the office, our staff will be pleased to help.

Is it safe for children and pets?

Lush Turf Solutions' synthetic turf is completely safe for your family and pets. No heavy metals are used in the manufacturing process. The fibres are non-abrasive so no more grazed knees or 'carpet burns'. Consumers are more aware of the alternatives to the older style Astro Turf, choosing Lush Lawn and Lush Meadow for a softer and more natural looking landscape.

Pet mess will not stain the fibres, just scoop and hose off as you would with natural turf. As for strength – We installed our products for Dreamworld's tiger cub enclosure. It's tough enough for tigers and will withstand the use of family pets.

What happens when it rains?

Our product has drainage holes throughout the base allowing water to escape into the permeable sub-base. We also grade and contour the sub-base to assist water flow to existing drains or garden beds.

How is synthetic turf installed?

In most cases, the turf is installed over a sub-base of compacted crusher dust or a combination of road base and crusher dust depending on site conditions. A cement border is created around the perimeter. The turf is rolled into place, fitted and trimmed, so you have a neat finish around any obstacles. The turf is secured with adhesive around the entire perimeter and anchored to the surface using galvanised pins or synthetic turf adhesive, depending upon the application.

Can I install it myself?

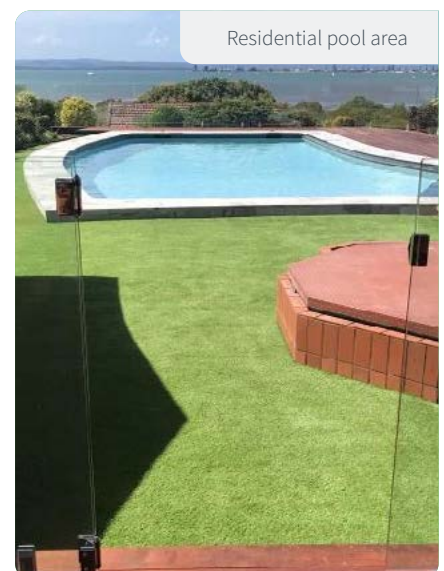

Yes, we hold stock in our warehouse and can deliver Australia wide and beyond, including the consumables you will need such as pins, tape and adhesive. For more details see our installation video on Youtube – search 'Lush Turf Solutions Synthetic Turf Installation Video'.

How long will synthetic turf last?

Our products have an expected lifespan of 10-15 years in normal conditions. Lush Lawn, Lush Meadow and Pro Putt are backed by an 8-year warranty covered by the company, not a third party. The UV stable fibres and extremely durable backing are designed to withstand our harsh climate. We assure you of a quality product and installation process that will last the test of time.

What maintenance is required?

In a few words... very little. A blow-vac, broom, plastic rake or hose can be used to remove falling leaves and other debris from the turf. An occasional brush against the pile will spruce up fibres and refresh the look of your lawn.

Price list

All prices exclude GST.

Prices are effective from 1st March 2022
