Dedicated specialists nationwide here to help

14,400+

Babies born nationally through City Fertility and FSWA

Welcome to Fertility Specialists of WA

Fertility Specialists of WA is part of City Fertility National Network and we are now one of the world's largest IVF partnerships with CHA Medical Group, a premier global leader in fertility and women's health.

Together with City Fertility, we continue to grow with a strong focus on excellence in reproductive medicine and research.

At Fertility Specialists of WA, our vision is simple: we are here to help everyone experience the joy of family.

Every person or couple is unique, so with the expertise of Professor Roger Hart as our National Medical Director, we tailor treatment plans to your patient's individual needs. We apply an evidence-based approach (medical) and consider your patient's clinical and emotional needs as well.

Fertility Specialists of WA offers patients:

- ▶ World-leading outcomes through scientific excellence
- ▶ Premium care in a state-of-the-art IVF laboratory designed to maximise pregnancy outcomes
- ▶ Individualised tailored plans
- ▶ Range of payment plans.
- ▶ Above all, expert, empathetic, and personalised patient care by a highly specialised team to make your IVF experience as stress-free as possible

*“We are proud of our team.
Not only are they highly skilled to
help your patient get pregnant –
they also love what they do!”*

– Professor Roger Hart, National Medical Director and Professor of Reproductive Medicine

Experience first-class treatment and care

Providing patients with individually tailored and thorough care is our highest priority. You can count on us to support your patient as an individual, not a number, as we guide them through the treatment process.

Fertility Specialists of WA offers Assisted Reproductive Technologies (ART) including:

- ▶ Evaluation and treatment of all female and male fertility issues, ranging from semen analysis to the investigation and treatment of recurrent miscarriage.
- ▶ Simplified fertility treatments such as Intra-Uterine Insemination (IUI) or Ovulation Induction (OI).
- ▶ International donor egg and sperm services.
- ▶ IVF treatment options:
 - In Vitro Fertilisation (IVF)
 - In Vitro Maturation (IVM)
 - Intracytoplasmic Sperm Injection (ICSI)
 - Testicular aspiration for azoospermia (lack of sperm) or vasectomy patients
 - Genetic testing
- ▶ Fertility preservation (sperm, egg and embryo freezing and storage).
