

THE PETERFELL SYSTEM

Surround yourself with
the natural beauty of
coloured concrete.

PeterFell
SPECIALISTS IN COLOURED CONCRETE

Transform your space into something special with the PeterFell System.

Coloured concrete is equally at home indoors and out.

With so many colours, patterns and finishes to choose from, you can make a stunning statement that's all yours. And because it's concrete, you know it will maintain its beauty for decades.

On the following pages you'll find some inspiring ideas to get you started. You can discover even more possibilities at peterfell.co.nz.

So read on and see how you can create your special space with coloured concrete.

Floors.

The perfect blend of style and comfort.

A coloured concrete floor radiates elegance throughout your living spaces, kitchen, hallway or wherever.

Concrete is thermally efficient too, helping you stay cool in summer and warm in winter.

C² Polished Concrete Flooring.

Enhance the natural beauty of your concrete floor.

PeterFell C² Polished Concrete Flooring brings all the natural beauty of coloured concrete to your home, while being more durable, hardwearing and stain resistant.

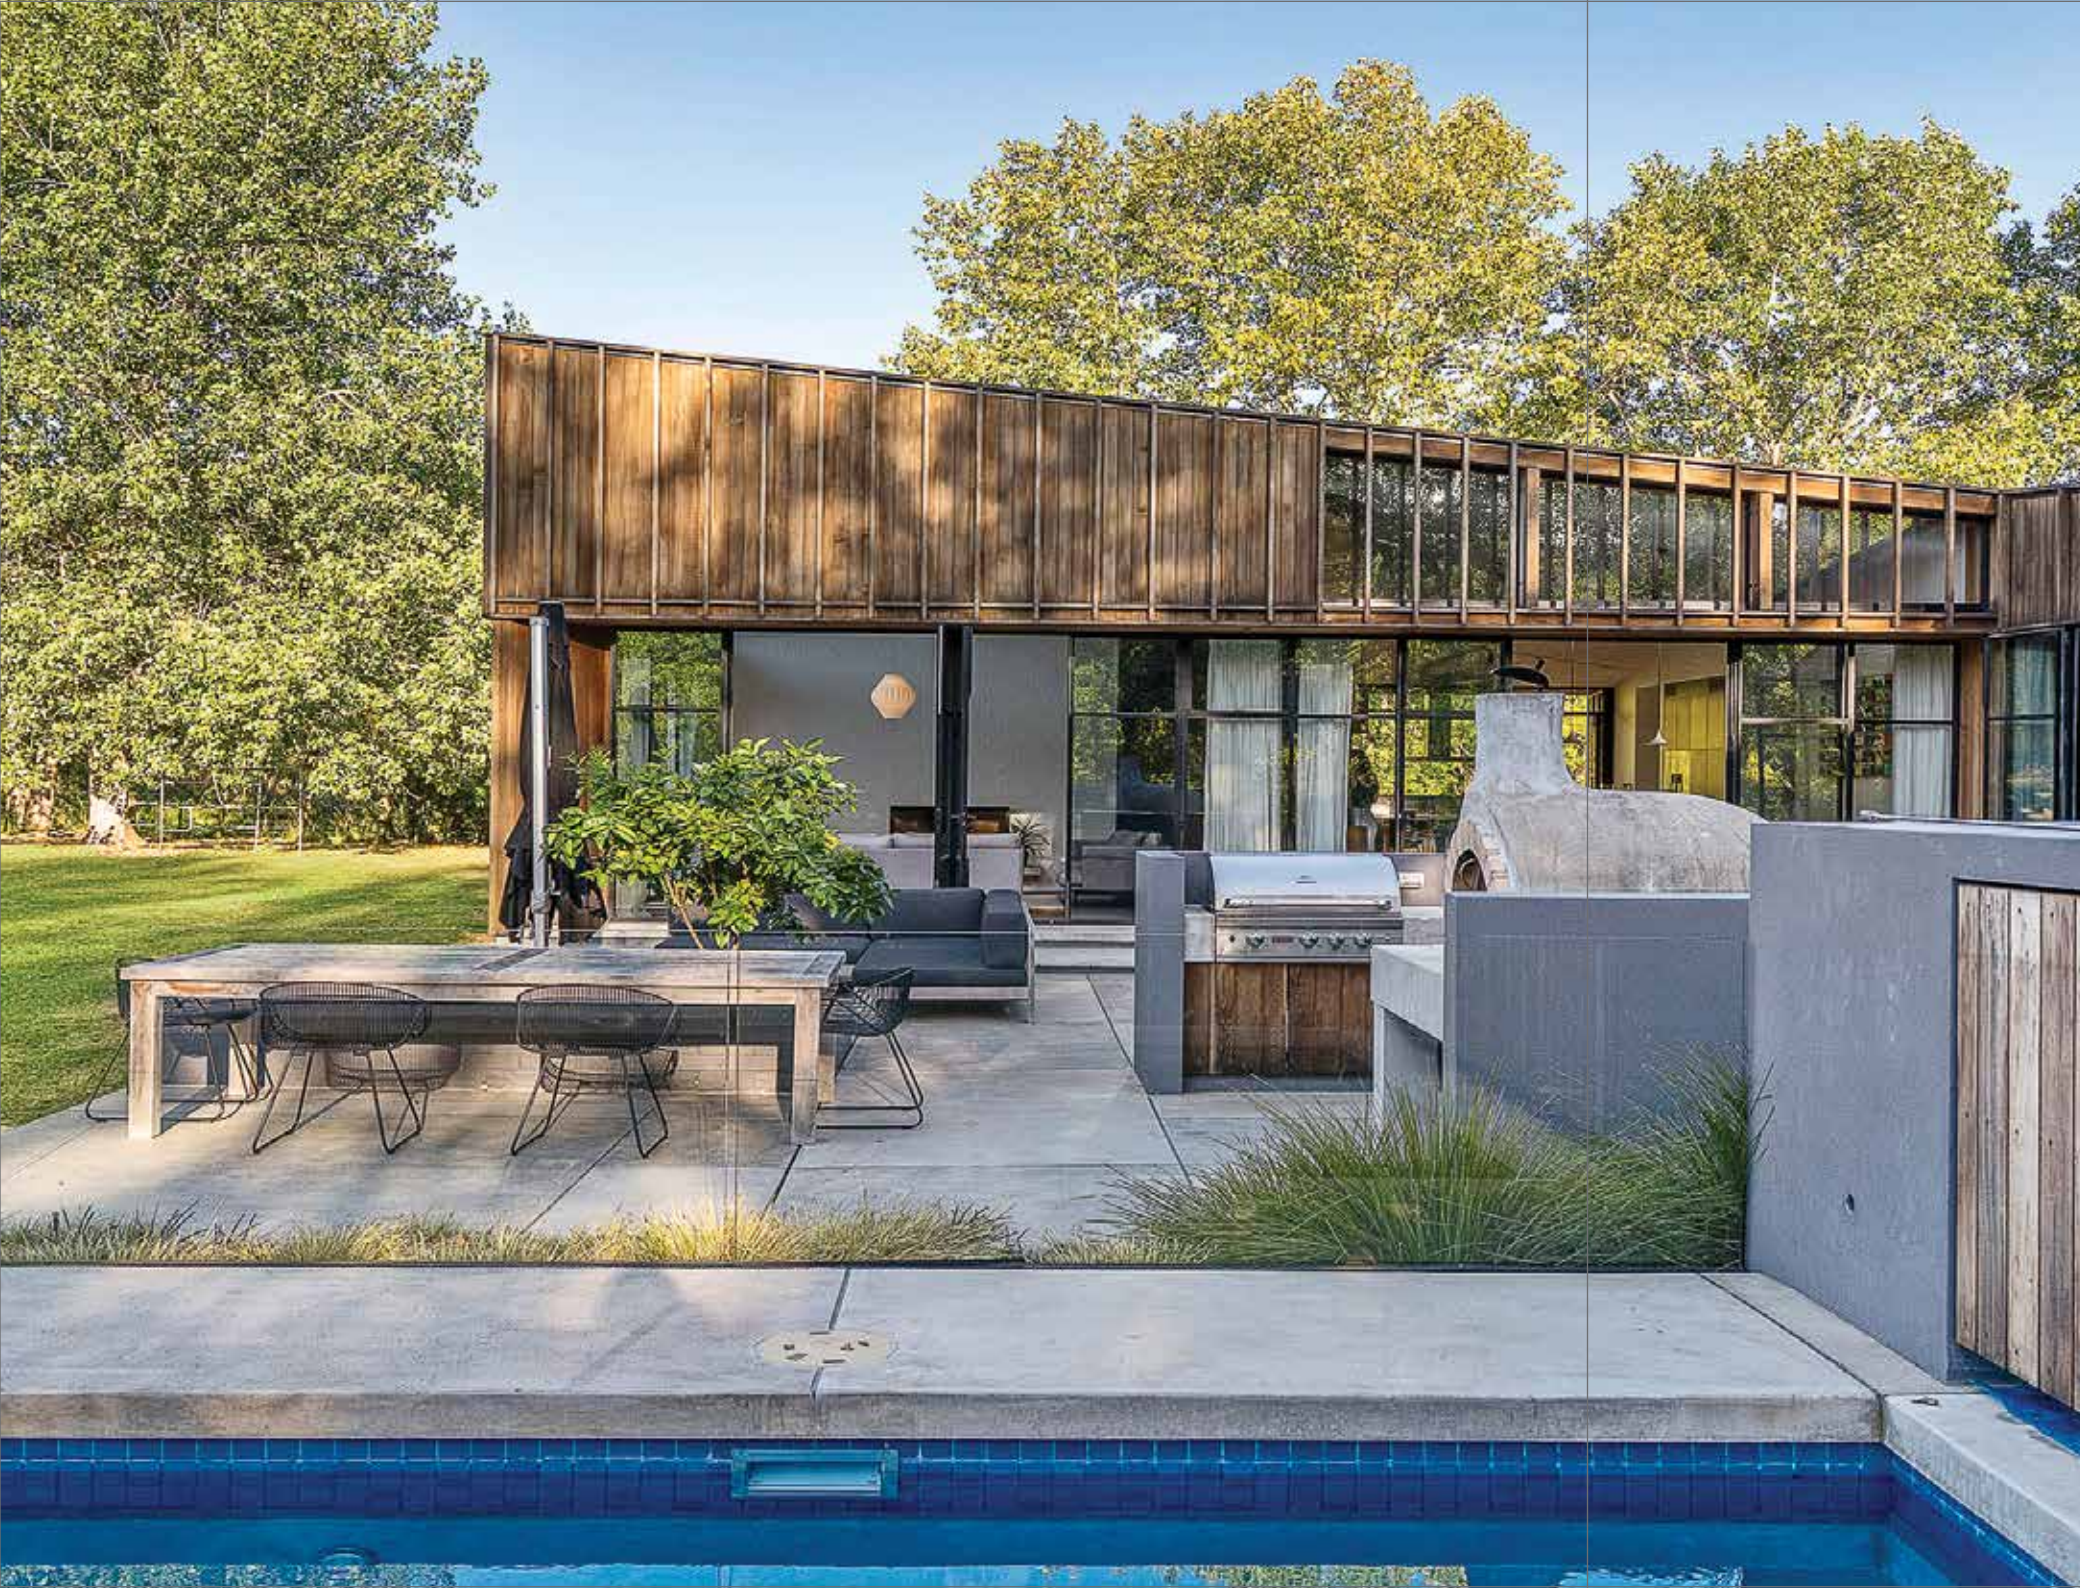

Patios & Courtyards.

Bring your outdoor spaces to life.

Add colour to your concrete patio or courtyard and set your home apart.

Use shapes and borders to create a smart, cohesive space. Play with texture to add depth and interest, and ensure a safe, non-slip surface.

Pool Surrounds.

Add sparkle to your poolside setting.

The PeterFell System can be integrated into virtually any concrete pool surround.

Use colours that contrast with your coping stones for visual interest. Or perhaps the streamlined look is more your style, with concrete that goes right to the edge of your pool.

PETERFELL COLOURED CONCRETE POOL SURROUNDS

Driveways & Paths.

Make a dramatic entrance.

Combine texture and colour to transform a functional driveway or path into an eye-catching design feature.

Why limit yourself to rigid lines? Borders, cut-outs and different surface textures and materials will break the space up and make it more interesting.

Walls.

Take your wall design to new heights.

Walls are some of the most prominent aspects of your home. They're the perfect place to bring texture, colour and design together to create something truly unique.

PETERFELL COLOURED CONCRETE WALLS

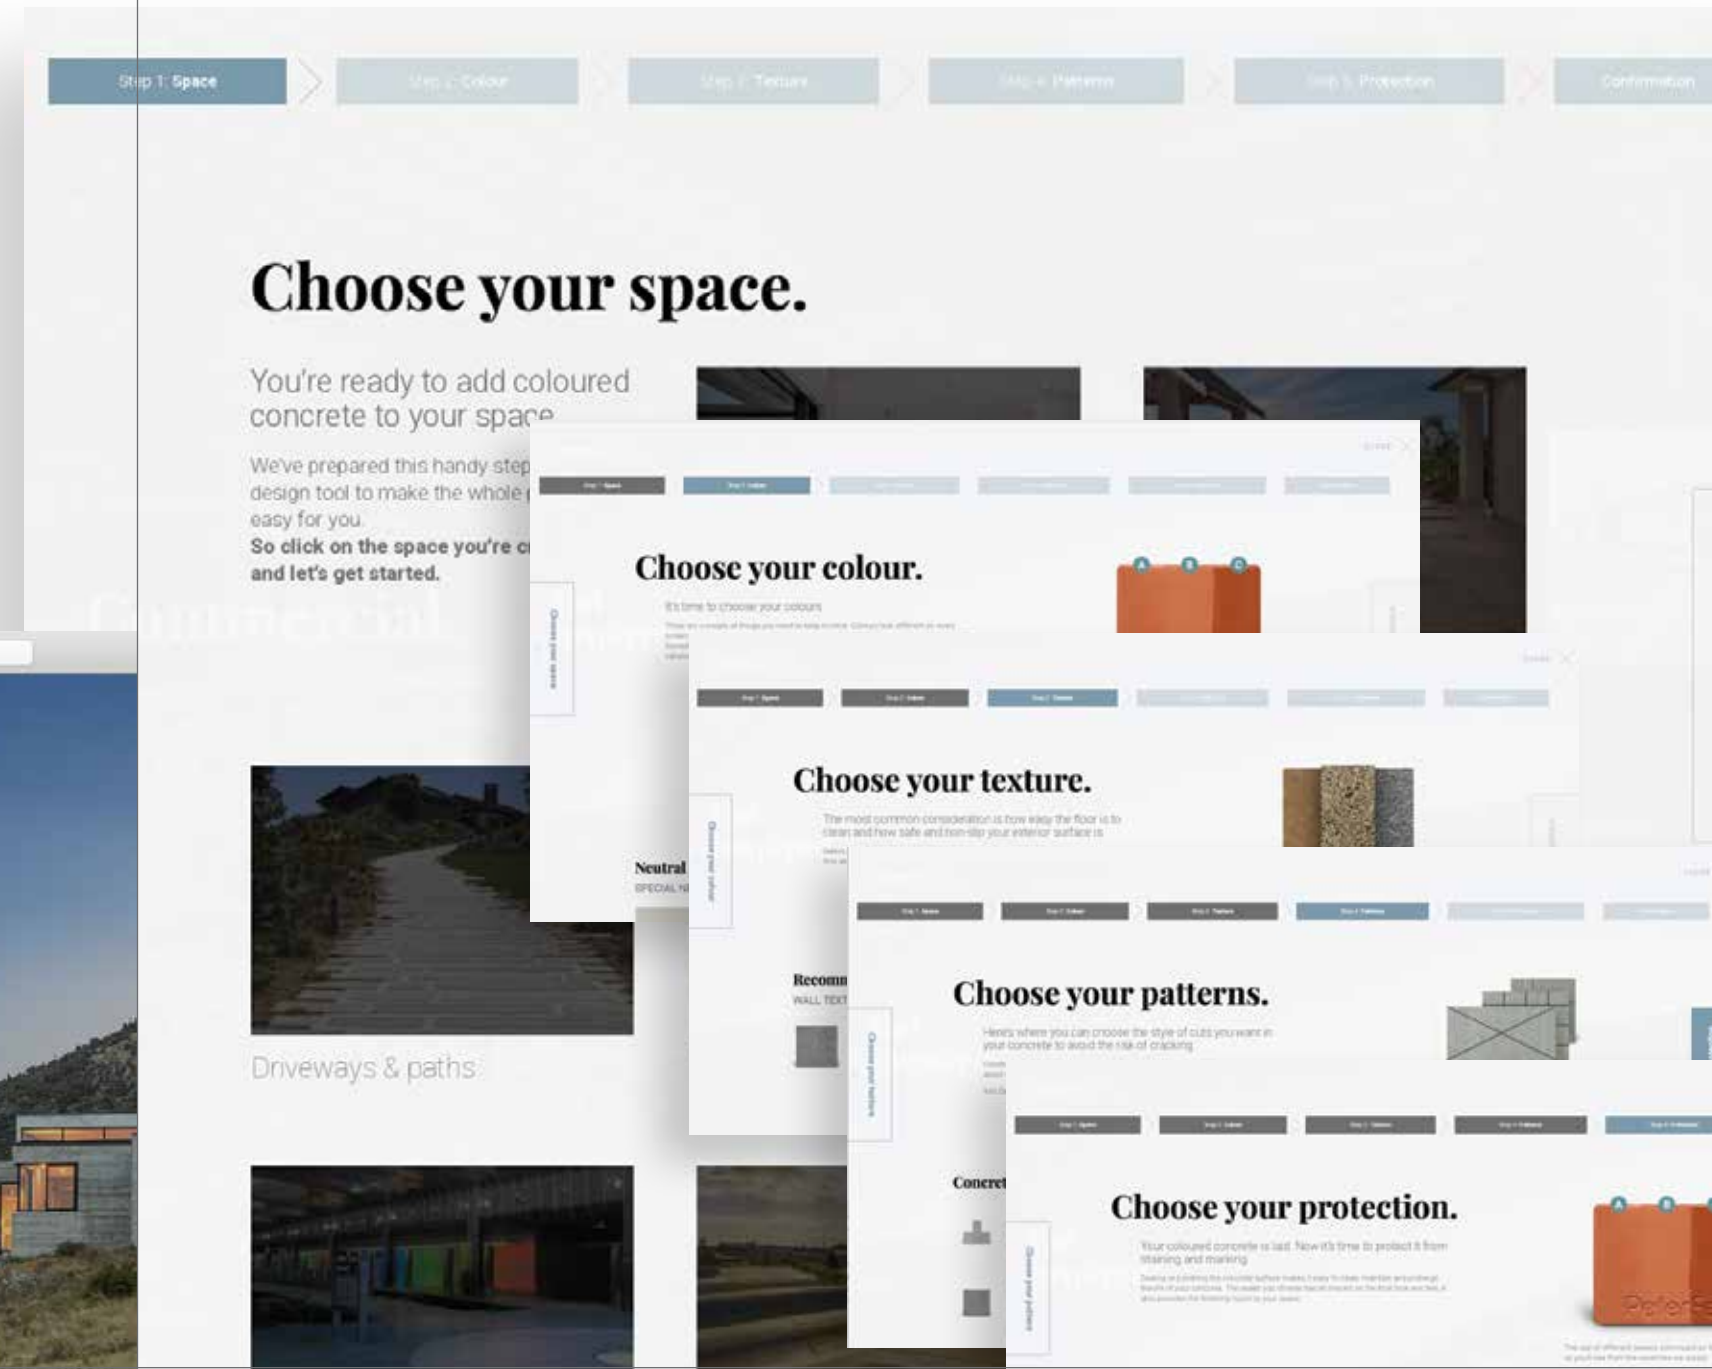

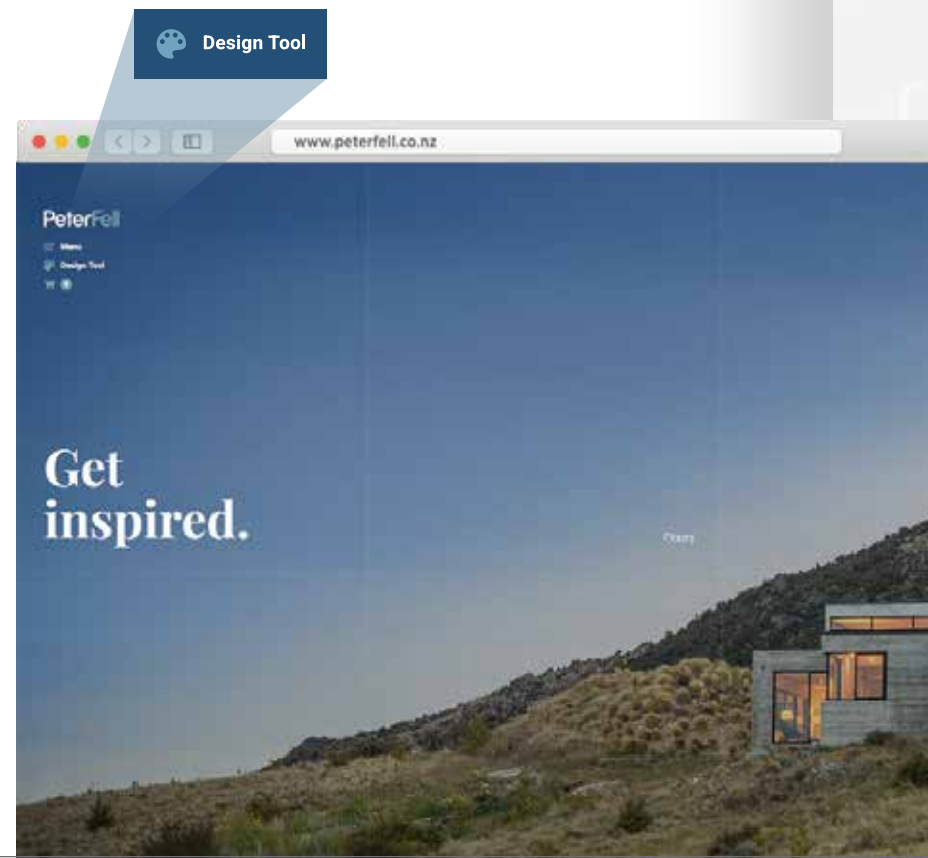

Create the right look with the PeterFell System.

Use our **online Design Tool** to help bring your ideas to life.

We've created a five step guide to take you through the PeterFell System. It provides you with the coloured concrete space that complements your home – perfectly.

You'll get useful advice around design, colours, texture, patterns and protection for your coloured concrete. Plus you'll see some more great examples of coloured concrete at work.
