- Access to personalised treatments and medication.
- We bulk-bill the majority of Medicare-eligible expenses, including consultations, blood tests and fertility procedures.

## One in six Australian couples have difficulty conceiving

While many couples have reasonable expectations and hopes of a successful pregnancy, 1 in 6 Australian couples experience difficulty falling pregnant.

Several factors can affect your chances of conception including age, weight, lifestyle and medical conditions. That's why understanding your individual situation is the first step to a solution. So if you're under 35 and you've been trying to conceive for 12 months or if you're over 35 and you've been trying for six months, come in and talk to us.

# Treatments

If you are eligible to receive the services, we'll plan the most effective Assisted Reproductive Technology (ART) treatment that's sensitive to your needs. It could include one of the following:

In-Vitro Fertilisation (IVF)

Frozen Embryo Transfers (FET)

Intracytoplasmic Sperm Injection (ICSI)

Intra Uterine Insemination (IUI)

Ovulation Induction

At Adora, we believe that  
**affordable, high-quality**  
fertility treatment should be  
accessible to all Australians.

# The Adora price difference

Cost is a major barrier and can be a cause of stress for many Australians when considering fertility services. At Adora, we Bulk Bill the majority of eligible fertility related services covered by Medicare.

Our aim is to be as transparent as possible when it comes to what you'll actually be paying. We take the time to thoroughly explain all the fees and out-of-pocket expenses you'll incur during your fertility treatment. Out-of-pocket expenses may be reduced for those with private health insurance.

At Adora, all of our egg collection procedures are performed in an accredited Day Surgery under the care of an anaesthetist, which is considered safer and less painful than a procedure carried out under a local anaesthetic.
