

>> CITY TOWERS

Doing our bit for the environment

The thin plastic mesh that holds the tower together is commercially recyclable, so please keep your mesh once you have finished with your City Tower. You can return it to us, or we can pick it up with your next firewood delivery and we will recycle the plastic.

In addition to this, we are committed to using City Towers as a way to raise awareness and support for important New Zealand environmental projects. That's why for every City Tower purchase you can pick a charity for us to donate to.

You can choose between native tree planting with Trees That Count, saving the Kakapo with DOC Kakapo Recovery or Keep New Zealand Beautiful who work on everything from beach clean ups, to picking up litter.

Ask us for more info
or order your tower today!

NEVER STACK WOOD AGAIN!

NEW
PRODUCT

Starting from the ground up, we have created an entirely new way of heating your home with firewood delivered in a way designed to fit around your busy schedule to bring more convenience and options that better work with you.

Our City Towers contain 2 cubic metres of firewood compressed into a tower shape on a shipping pallet.

What's so good about City Towers?

With each pallet comes a whole new level of convenience from quality, to ordering, through to a stack-free delivery, while bringing carbon neutral energy and supporting three New Zealand conservation projects to upkeep and restore our corner of the world.

CONVENIENCE

You cannot beat a fire when it comes to the ambiance and warmth it brings to the home, but let's face it, we don't always have the time or the energy to deal with the handling of firewood. The City Towers system has been designed to bring less effort, and more simplicity so you can enjoy the best form of low cost heating, without the hassle.

QUALITY

Firewood quality is the single most important factor when it comes to low cost heating. The science of firewood is simple; more water equals less efficiency, and less efficiency equals higher cost heating.

PREMIUM DELIVERY

In Christchurch, our premium service is available, where we will deliver the City Tower using a mobile loader which can take the firewood where we have never been able to reach before. Whether it is in the garage or woodshed, along the fence, or outside the back door. Once it is where you want it, you can open the netting and retrieve your firewood directly from there with no need to stack it away. No more blocking the driveway, no more hauling wheelbarrows, and no more stacking!
