How to use Various ways to use Big Ant

Solid • Durable • Aesthetic

-BIGANT crate is definitely not the average storage bin container that you can find at a big box store. It's better and of the sturdiest among all plastic collapsible crates.

-The body of robust construction features a rugged base of heavy-duty plastics matched with 4-side straight walls of at least 1/2" thick. Two release locks mounted at the front and backside allow crate collapse and fold easily.

-And the result of this robustness? It's so sturdy that a 200-pound adult can stand on top without crushing and yet It's so easy to operate that anybody can do it.

-Private Brand: PB product with a company logo is possible by changing the logo plate printing

-Volume ration before and after crate collapses. It showcases the space-saving capability of a convertible crate. With BIGANT, the length and depth remain the same but the height's reduced to only 1/4 and the ratio is 4:1 for all sizes.
