

Automation Packages

# [ The Future is Now ]

### Let your home support you

Imagine this. It is a hot day and you are just about to leave your office. You want to arrive home to a nice cool house so you open an app and instruct your home to draw the blinds and turn on the air conditioning.

You then flick to the security cameras to confirm that the box of wine you ordered has arrived before setting the spa temperature so it is ready for your return. While you are at it, you scroll through your settings until you find the calm lighting you want. Now the only thing you need to do is instruct google to play your party list and get ready for an excellent night in.

Or maybe you're more practically minded

### No more last minute panic

Have you ever had that experience where you head out for the night only to be gripped by fear half way down the freeway that you forgot to lock the door or switch off the light? Not anymore. With smart technology, wherever you are you can check to make sure doors are locked, lights are turned off and the garage door is closed.

### Saving you time and money

A smart system can also save you time and money, as you can rest assured you haven't left any lights or devices running when you are not at home. With the touch of one button, you can shut down your house when you leave. What are you waiting for?

### Smart technology, smart homes

Having a Smart Home is now more achievable than ever before. Thanks to the flexibility and scalability of wireless Z-Wave technology, both existing and new homes can be transformed into the perfect environment for you and your family.

Though there are options to control lighting, swimming pools, security, heating and cooling, locks, doors, windows and voice control products such as google home, you don't have to start with a large and expensive package.

With over 2400 smart home automation products on the market, there is a Z-Wave product to fit every function and price point.

# Eight reasons *why* Z-Wave is #1

**Easy.** Installation does not require any rewiring of your home's current electrical.

**Trusted.** The biggest brand names on the market use Z-Wave in their smart home products.

**Affordable.** You can get started with a minimal investment and easily add more smart products.

**Experienced.** There are already 100 million products in smart homes worldwide.

**Reliable.** On the market for over ten years, Z-Wave has quality products that deliver reliable results. Otherwise we wouldn't recommend them!

**Smart Home Leader.** is the clear leader in the home automation industry. Everyone in the know chooses Z-Wave.

**Secure.** Wave technology uses the same encryption as online banking which is why 9 out of 10 leading security companies choose it.

**Spoilt For Choice.** With over 2400 smart home automation products on the market, Z-Wave products provide many choices to suit your needs - styles, price points,

## How does Z-wave work?

Z-Wave is a wireless home automation technology that allows you to control household appliances, functionality and lighting, transforming ordinary homes into connected smart homes. After the system is set up, you use a simple app that you download for free onto your phone, tablet or computer, to control appliances, devices, windows, doors and locks from anywhere in the world.

## The App

The mobile app is the central control for your entire system, so even if a smart device has its own app, the mobile app will integrate it into the one, simple-to-use interface. It is free to download and runs on smartphones (iOS and Android), tablets, or in a browser on any Windows, Mac, Chromebook or Linux computer. It can operate devices both individually or as a group where required. Your Z-Wave system will continue running 24/7 to monitor your home, regardless of whether you have the app open.

## Smart Lighting

Using your Z-Wave controller you can seamlessly, efficiently and easily integrate natural daylight, electric light and window shadings into a total lighting control solution. This control of your entire home even while you're away delivers maximum efficiency and security, and means you're always welcomed home to the perfect level of lighting, inside and out. And because the Z-Wave is expandable, you know you can start off small and grow the system as your budget allows.

### Device Types

Dimmer  
Switch  
Motion Sensor  
Door/Window Sensor  
RGBW LED strip controller

## Security

In the past, it wasn't until you returned home at the end of the day or holiday that you became aware of issues such as water leaks, fire alarms or break-ins. With Z-Wave, you gain the peace of mind of instant alerts if risky situations occur so you can deal with problems as they happen, even if you are not at home. You can also view your camera's live stream from anywhere in the world. With your alarm system, door locks and security all running from the one app, and the capacity to flip to 'away' mode to lock doors, arm the alarm and activate the camera, Z-wave means it has never been easier to stay safe.

### Device Types

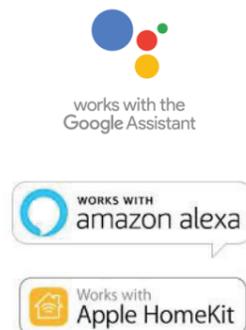

Wi-Fi Cameras (Indoor & Outdoor)  
Door I Window Sensors  
Motion Defectors  
Glass Break Sensors  
Outdoor Alarm  
Smart Door Locks/Intercoms  
Outdoor and Indoor Sirens

## Temperature Regulation

Wouldn't it be nice to come home to a cool house after spending a day at the beach? Temperature and humidity control are a breeze with Z-Wave. Not only can you program your devices to run during certain times of the day, you can also switch on your air conditioner and set the temperature before you head home. With temperature regulation you can enjoy the luxury of perfect temperature year round.

### Device Types

Heating/Cooling Systems Thermostats  
Temperature & Humidity Sensors  
Light Sensors

## Lock Control

By having a smart lock on your front door, you open up a world of opportunities to control access to your home. You can monitor if someone has arrived home safely, grant access to friends and relatives whenever you choose and remotely lock/unlock your door from anywhere. Lock control means it has never been easier to control the comings and goings at your house.

### Device Types

Smart Locks  
Motion Sensor  
Door/Window  
Sensor Gate Motors  
Intercoms

## Voice Control

Voice Control products like Google Home and Amazon Alexa have completely revolutionised the way we interact with technology. When paired with your Z-Wave controller, you can control almost any device just by asking Google or Alexa to help you. Now at the end of the day all you need to do is fall into bed and say, "Hi Alexa, run Goodnight." Your lights will switch off, the blinds will shut and doors will lock, so you are ready for a good night's sleep. Sweet dreams!

### Device Types

Amazon Alexa  
Google Home  
Apple Siri

## Safety Devices

Going away on holiday shouldn't be a stress. With safety devices always at the ready you can know your home is taken care of. If a problem arises, these devices let you know about it, regardless of whether you are home, away, asleep or on vacation. Not only that, but the system responds immediately and automatically to problems such as shutting off the main water valve when internal flood is detected or turning on ventilation in your bathroom when humidity increases. Now you can really relax!

### Device Types

Flood Sensor  
Smoke Detectors  
Carbon Monoxide Detectors  
Temperature & Humidity Sensors

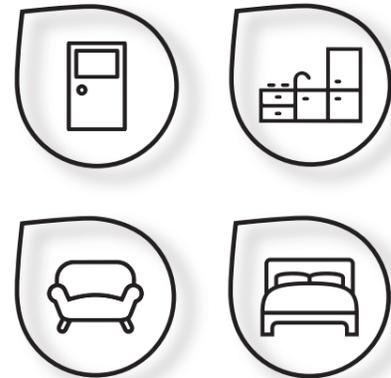

# **New & Existing Apartment & Townhouse Packs**

# 1 Bedroom *Basic Pack*

This pack offers control of 6 on-off light switches, 1 motion sensor, 1 door window sensor and a 2 zone alarm integration. Smart application and voice control makes this system the perfect starter pack.

## What is included in the pack:

- 1 Smart Hub Controller
- 6 On-off automated light switches
- 1 Motion sensor
- 1 Door window sensor
- 2 Zoned alarm integrated
- 1 Indoor siren
- Smart App- free no monthly charges
- Programming and Installation
- Labor lifetime warranty
- 3 year product warranty

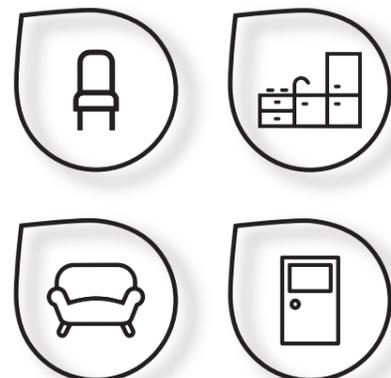

**\$3,350** gst exc

# 2 Bedroom *Standard Pack*

This pack offers control of 6 on-off light switches, 2 dimming light switches, 2 motion sensors, 1 door window sensor, 3 zone alarm integration and 1 split system temperature control - everything from 1 smart application.

## What is included in the pack:

- 1 Smart Hub Controller
- 6 On-off automated light switches
- 2 Dimmer automated light switches
- 2 Motion sensors
- 1 Door window sensor
- 3 Zoned alarm integrated
- 1 Indoor siren
- 1 AC Split System Controller
- Smart App- free no monthly charges
- Programming and Installation
- Labor lifetime warranty
- 3 year product warranty

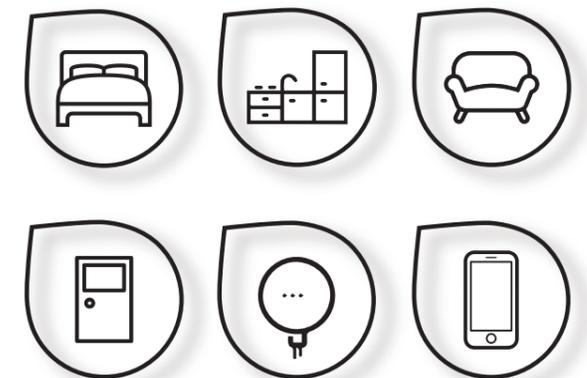

**\$4,498** gst exc

# Smart Living Pack

This pack offers both safety and ultimate convenience. Now you can control 12 on-off light switches, 3 dimming light switches, 3 motion sensors, 4 door window sensors, 7 zone alarm integration and 2 split systems climate control. No apartment is complete without it!

## What is included in the pack:

- 1 Smart Hub Controller
- 12 On-off automated light switches
- 3 Dimmer automated light switches
- 3 Motion Sensors
- 2 AC Split System Controllers
- 4 Door/Window Sensors
- 7 Zoned alarm integrated
- 1 Indoor siren
- Voice Control Programming
- Smart App - free no monthly charges
- Programming and Installation
- Labor lifetime warranty
- 3 year product warranty

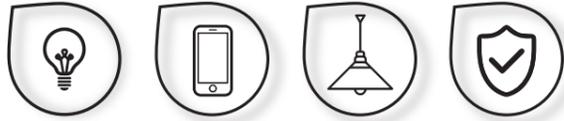

**\$5,599** gst exc

# **New *Build*** **&** **Existing Home Packs**

## STARTER Pack

Control 10 on-off light switches, 3 dimming light switches, 1 motion sensor, 1 door window sensor and 2 zone alarm integration using the smart application or verbal commands.

### What is included in the pack:

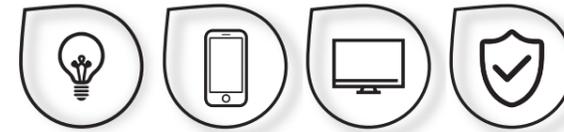

- 1 Smart Hub Controller
- 10 On-off automated light switches
- 3 Dimmer automated light switches
- 1 Motion sensor
- 1 Door window sensor
- 2 Zoned alarm integrated
- 1 Indoor siren
- Voice Control Programming
- Smart App - free no monthly charges
- Programming and Installation
- Labor lifetime warranty
- 3 year product warranty

**\$5,799** gst exc

## STANDARD pack

You will control 12 on-off light switches, 5 dimming light switches, 2 motion sensors, 1 door window sensor, 3 zone alarm integration and 1 garage door controller for security and comfort.

Maximum reliability and secure factor!

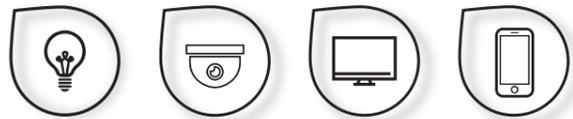

### What is included in the pack:

- 1 Smart Hub Controller
- 12 On-off automated light switches
- 5 Dimmer automated light switches
- 2 Motion Sensors
- 1 Door window sensor
- 3 Zoned alarm integrated
- 1 Indoor siren
- 1 Garage door controller
- Voice Control Programming
- Smart App - free no monthly charges
- Programming and Installation
- Labor lifetime warranty
- 3 year product warranty

**\$8,999** gst exc

## PREMIUM Smart Pack

Use both the smart application and voice control for your garage door, feel secure with 1 digital smart lock at the front door, 4 camera CCTV system for added peace of mind. You will also have a 4 zone integrated alarm as well as control of 12 on-off light switches, 5 dimming light switches, 2 motion sensors, 2 door window sensors and 1 split system temperature control. Life has never been easier!

### What is included in the pack:

- 1 Smart Hub Controller
- 12 On-off automated light switches
- 5 Dimmer automated light switches
- 2 Motion sensors
- 2 Door window sensors
- 4 Zoned alarm integrated
- 1 Indoor siren
- 1 AC Split System Controller
- 1 Smart door lock
- 4 IP 4.0mp Dome Cameras
- 1 IP NVR Recorder
- 1 Garage door controller
- Voice Control Programming.
- Smart App - free no monthly charges
- Programming and Installation
- Labor lifetime warranty
- 3 year product warranty

**\$13,399** gst exc

## Stronger *Wi-Fi* Packs

# Home BASIC Pack

- 📶 Tired of zoom meeting disconnections?
- 📶 Working from home and need reliable internet?
- 📶 Slow or no internet access in certain rooms?
- 📶 Wi-Fi does not work well when more people are logged in?
- 📶 Tired of slow Wi-Fi?
- 📶 Can't connect to wireless printer?
- 📶 Forgot the Wi-Fi password?
- 📶 Some devices cant connect to Wi-Fi.

Troubles with your **wifi connection** at home?

- **Improve connectivity.**
- **Enjoy reliable wireless network coverage.**
- **Maximise coverage in areas you need the strongest Wi-Fi.**
- **Make your Wi-Fi more effective.**
- **Make your network scalable, and fault tolerant.**
- **Forget about your plug in booster.**
- **Connect your Smart home devices.**

## What is included in the pack?

- 📶 1 x data run to a new central location for your new access point.
- 📶 1 x ALY data switch.
- 📶 1 x GS7660 Wi-Fi 6 Access point.
- 📶 Programming and Installation.
- 📶 Labour lifetime warranty.
- 📶 2 year product warranty.

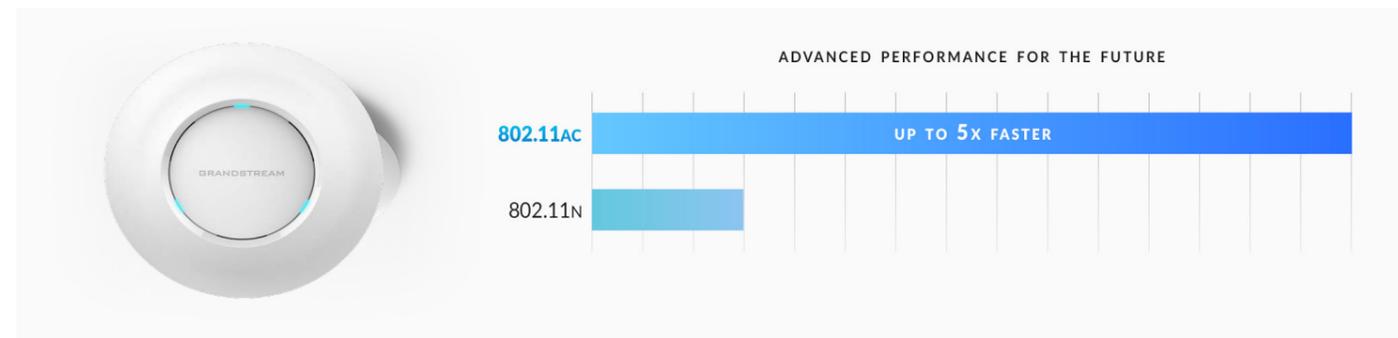

**\$689\*** gst exc

\*Single storey & terracota tile roof properties.

**\$489\*** gst exc for each extra access point  
\*Installed on the same day.

Standard routers supplied by your Wi-Fi provider are not designed to handle your network traffic.

# Home PREMIUM Pack

- 📶 Do you have a large home?
- 📶 Tired of zoom meeting disconnections?
- 📶 Working from home and need reliable internet?
- 📶 Slow or no internet access in certain rooms?
- 📶 Wi-Fi does not work well when more people are logged in?
- 📶 Tired of slow Wi-Fi?
- 📶 Can't connect to wireless printer?
- 📶 Forgot the Wi-Fi password?
- 📶 Some devices cant connect to Wi-Fi?

Troubles with your **wifi connection** at home?

- **Improve connectivity.**
- **Enjoy reliable wireless network coverage.**
- **Maximise coverage in areas you need the strongest Wi-Fi.**
- **Make your Wi-Fi more effective.**
- **Make your network scalable, and fault tolerant.**
- **Forget about your plug in booster.**
- **Connect your Smart home devices.**

## What is included in the pack?

- 📶 1x data run to a central location. 1
- 📶 x Ubiquiti US8 Data switch.
- 📶 1 x Unifi Cloud Key.
- 📶 1 x Unifi Wi-Fi 6 pro access point.
- 📶 Programming and installation.
- 📶 Labour lifetime warranty.
- 📶 3 year product warranty.

**\$1315\*** gst exc

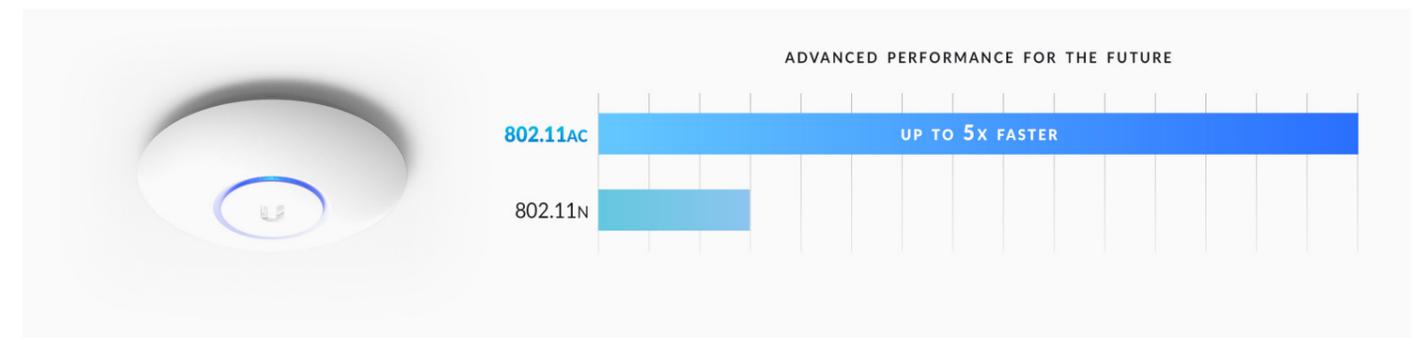

\*Single storey & terracota tile roof properties

**\$689\*** gst exc for each extra access point

\*Installed on the same day.

Standard routers supplied by your Wi-Fi provider are not designed to handle your network traffic.

# Short Stay *Rental* Control Package

Want to keep your AirBNB rental protected and make sure your guests have a great stay? This system allows you to control access to your property and makes check-in and check-out a breeze.

How? The Hikvision camera is the perfect solution to monitor who is coming into the property while the Aeotec Multi-Sensor tells you the status of individual rooms including temperature, movement detection, humidity and more.

Not only that, but the Remotec A/C Controller will allow you to automatically turn off the air conditioner if no one is around and the Philio Smoke Sensor will send notifications to your mobile device if smoke is detected.

The simple set-up and use of these devices is a perfect way to start using Home Automation to protect and monitor your property.

### Key Benefits:

- Simple installation
- All setup guides and information provided
- Fully supported by our technicians 24-7
- Save energy with advanced monitoring
- Modular so you can always add new devices and features

### Best Suited for:

- Airbnb
- Stayz
- Booking.com
- Short term rentals
- Long-term rentals
- Granny flat

### What is included in the pack?

- 1 Smart Gateway Controller
- 6 Lighting Modules
- 1 Motion Sensor
- 1 AC Split System Controller
- 1 Yale Assured Keyed Deadbolt
- 1 IP Dome Camera
- 1 Door/Window Sensor
- Smart App - free no monthly charges
- Programming and Installation
- Labor lifetime warranty
- 3 year product warranty

**\$6,450** gst excl

## **Ageing *in place* Control Package**

## Our needs change as we age

Though older people have an overwhelming desire to live independently in the community, most recognise that their needs and capabilities change as they age. Have you considered the important supporting roles smart home technologies can play in creating more functional living spaces for people looking to 'age in place'?

## Working alongside your support team

Working with your occupational therapist, health consultant or architect we can help you to take advantage of smart home innovations to achieve a more user-friendly living environment in the home.

## Giving you more independence and choice

These technologies can help you live independently for longer, making the choice of staying at home rather than moving into care easier.

## Helping people with disabilities

For clients with acute disabilities, smart home technologies can be explored as an add-on benefit to any medically designed aids they may have been issued. These smart technologies can create easier to use day-to-day living environments that provide more independence.

## Checking in without physically being there

Home Automation also allows others to be notified of someone's movements around the house. For example, a carer or adult child can be notified that Mum is up and about because she has opened the medicine cabinet to take her medications or opened a door. You can also check in on crucial safety issues such as the front door being left unlocked or no movement detected.

## Key benefits

- Lights automatically turn on/off as they enter or leave rooms to help prevent falls
- Doors & windows open/close, lock/unlock automatically and remotely
- Climate kept at a comfortable level
- Panic button
- Smoke, gas, CO2 and shock (glass breakage) detectors for peace of mind
- Remotely unlock door for carers and friends
- All changes in status can be notified to the carer via a free App on their smartphone or Tablet PC.

## What is included in the pack?

- 1 Smart Gateway Controller
- 12 lighting modules
- 4 Motion sensors
- 1 AC Split system controller
- 6 Door/window sensors
- 2 Panic buttons
- Smart app - free no monthly charges
- Programming and installation
- Labor lifetime warranty
- 3 year product warranty

**\$7,998** gst excl

*Please note that while Z-Wave home automation can significantly help in remote control, monitoring and notifications, it is not graded on a health care level and should not be used in place of life supports.*

# FAQS

## **How is Z wave technology different to Wi-Fi?**

Z-Wave is a lower power alternative compared to Wi-Fi, but with a much bigger range than Bluetooth. Unlike Wi-Fi, where devices have to connect to a central hub, Z-Wave devices all link up together to form a mesh network. This means the devices themselves – sensors, bulbs and so on – don't require Wi-Fi at all.

## **Can I use the normal switch on the wall?**

Yes, the automation system allows you to control the light in a traditional way from the switch.

## **How many devices can I control in my home?**

1 controller unit can control up to 232 devices.

## **I'm not sure what I want. Can you help me?**

Yes. While we do have packages available to suit most people, we are more than happy to discuss your particular needs to create a package that is just right for you.

## **My house is old, can I upgrade to this system?**

Yes. Though you may need to do a bit of preparation work if your electrical system is not up to scratch. We have adapted many older homes to have all the smart technology bells and whistles.
