Why You Should Choose

Comfort: Coldbuster Floor Heating simply creates the best ambiance of any heating choice!

Even Heat Distribution: Allows even spread of heat across the whole room. No cold/hot spots!

At Floor Level: Heat the area from the floor, not from the wall or ceiling. Remember, hot air rises!

Heat The Floors: Heating the floors is the big bonus. Everyone loves a warm floor!

Cost Effective to Run: With advanced thermostat controls, you can heat just the areas you're using and schedule usage resulting in huge ongoing savings.

Low Purchase Cost: Coldbuster Floor Heating can cost far less to purchase than other heating choices.

Incredible Investment: Luxury image compared to low cost means Coldbuster Floor Heating adds far more value to your property than it costs. This means huge value-add!

Unobtrusive: Nothing visible and nothing to store. No sound, no smell, nothing hot to touch. No outside venting required.

Safety: No high voltage or hot surfaces. The heater element is fully earthed and waterproofed, offering protection against fire and shock (must be connected to an RCD).

Allergy & Environmentally Friendly: No volatile organic compounds (typical in air circulation units), no nitrogen oxides (typical in gas heating), no smoke, fumes, dust or electromagnetic radiation.

Maintenance Free: No moving parts, no wear and tear! Durable and reliable products that last!

Speed: Response time can be as low as 30 minutes to full strength depending on the type of floor heating.

Easy and Quick Installation: All our floor heaters are DIY kits, with easy to follow installation guides. Videos are available online and our extra friendly staff are but a phone call or email away. No special tools or experience required. But we can install if you like!

Long Warranty: Heaters - 25 yrs
Thermostats - 3 yrs

Myths Vs Facts

Myth Floor heating is costly to purchase because it's a luxury item.

Fact Coldbuster Floor Heating delivers affordable luxury at reasonable cost (heat a small bathroom for as little as \$250!).

Myth Floor heating is costly to run because it's electric.

Fact Coldbuster Floor Heating running costs are far cheaper than people expect:

It's highly cost-efficient due to our smart programmable

thermostats. Even more so with solar power! And no ongoing maintenance costs!

Myth Floor heating is mostly just for bathrooms.

Fact Coldbuster Floor Heating is the best way to heat every area where floors are being laid.

Myth Floor heating is mostly just for cold hard floors like tiles.

Fact Since Coldbuster Floor Heating is the best way to heat an entire area - not just the floor - it is suitable for tile, carpet, timber, vinyl, laminate and polished concrete.

Email your floor plans or drawings to sales@coldbuster.com.au

Under Tile Heating

The ideal choice for heating below ceramic tiles, slate, porcelain, limestone, marble and terracotta.

Suitable for installation on concrete, screed and suspended timber sub-floors (with fibre cement sheeting over the timber).

Tile heaters are supplied as pre-configured strips on a self-adhesive fibreglass mesh roll. The heating element is taped to the 500mm wide mesh at a consistent spacing.

The high grade, waterproof, Teflon-coated heating element ensures both safety and durability.

In-Screed Heating

The ideal choice for heating the majority of floor finishes, including stone, porcelain and ceramic tiles.

Designed to be installed directly onto your existing sub-floor. The screed bed can then be laid over the floor heating cables.

The heaters are rated at 18W per linear meter and supplied as a cable on a reel. The 6mm thin cable is designed with durability in mind.

Under Timber Heating

The ideal choice for heating below engineered or natural timber floors, vinyls and laminates.

Under timber heaters are designed the same as the under tile heaters. The key difference is that timber heaters have a 'moderate output' in order to control for expansion and contraction effects of your flooring.

In-Slab Heating

The ideal choice for heating polished concrete and also suitable for other floor finishes.

Designed to be secured onto the reinforcement grid of your project. Slab is then poured on top. The concrete slab will retain and slowly release heat over an extended period of time, even once the heater is turned off.

The heaters are rated at 30W per linear meter and supplied as a cable on a reel. The 6.5mm thin cable is designed with durability in mind.

Under Carpet Heating

Super-thin heater designed for easy installation between the underlay and the carpet.

Carpet heaters are supplied as pre-configured strips of aluminium foil mat rolls.

The heating element is sandwiched between two layers of aluminium foil, 500mm wide, at a consistent spacing to ensure safe heating output and shield all electromagnetic radiation.

Heater Kits Include:

- Floor heater
- Installation monitor with battery
- Installation manual
- 25 year warranty

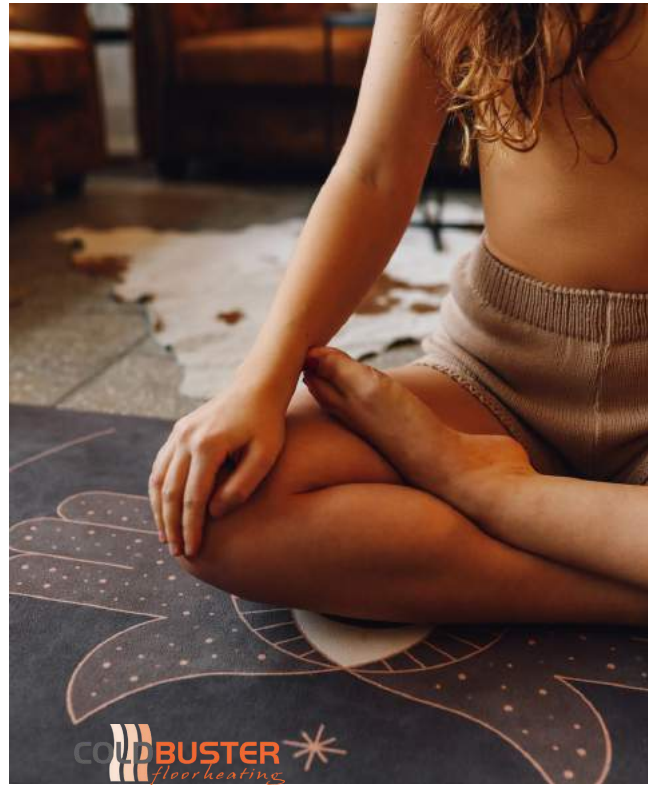

All Coldbuster floor heaters are single ended with a twin conductor element and a single 3m cold tail to connect to a thermostat.

Thermostats Warranty - 3 yrs

MWD5-V

- Voice Compatible with Google Home and Amazon Alexa
- WiFi and app controllable
- IP21 rating
- Energy monitoring through the thermostat interface, QR code or SWATT application
- Adaptive feature (warm by the set programmed time)

CB Dual

- The only 2-zone floor heating, programmable thermostat in Australia.
- 1-zone floor heating plus timer
- 8 Amps each
- Large touch screen
- 5+2 / 7 Day schedules
- Key-Lock function
- Vertical mount

MTC Manual

- On/Off switch
- Manual non-programmable thermostat
- Adjustable temperature control
- Vertical / Horizontal mount
- Locking mechanism
- Heat-On indicator light

CB Basic

- Manual or Basic Programmable
- Up/down temperature control touch buttons
- 2 or 4 events/day
- Can switch 16 Amps
- Adaptive function
- IP21 Rating
- Vertically mounted

Email your floor plans or drawings to sales@coldbuster.com.au

MWD5 WiFi

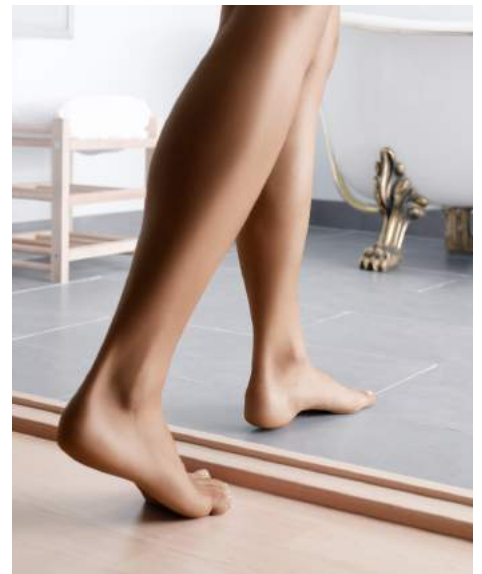

- Programmable thermostat
- Touch screen with on/off switch
- Wifi/App controllable
- 4 or 6 zones / day
- 5 different modes
- Running cost monitor
- Adaptive feature (warm by set programmed time)
- Mount vertical or horizontal
- QR code read-out for tech help
- Auto winter / summer time

MCD5

- Programmable thermostat
- Touch screen with on/off switch
- 4 or 6 zones / day
- 5 different modes
- Running cost monitor
- Adaptive feature (warm by set programmed time)
- Mount vertical or horizontal
- QR code read-out for tech help
- Auto winter / summer time

ETV

- Manual thermostat
- Compatible with home automation
- Can switch 16 Amps (3840)
- DIN rail mounted thermostat
- No on/off switch
- Has set back mode if connected to an external timer
- Floor sensor mode only
