

Suppliers of quality screens for french, bi-fold and sliding stacker doors and windows. Specialising in large openings and difficult-to-screen areas. Keep the bugs out and let the fresh air in!

Providing full enjoyment and utilisation of open plan living

Freedom Retractable Screens® Australia proudly introduce their **Infinity Zipline™ Series** to the architectural, design and construction market.

Freedom Retractable Screens® are the industry leaders of retractable insect screens, offering the perfect fusion of style and cutting-edge technology for residential and commercial applications. Led by marketplace demand, worldwide industry research has allowed Freedom Retractable Screens® to design and manufacture the most technologically advanced systems.

Years of dedicated research and development enabled us to design and manufacture this unique retractable insect screen with patented mesh-to-track retention system for Australia's harsh climatic conditions.

The Infinity Zipline™ Series is the strongest system on the market due to its outstanding wind and pressure rating. Perfect for Australian living, this unparalleled system is suited to all openings especially large windows and door spaces.

Only the highest quality components are used in our extensive product range which include our "soon to be released" solar screens.

We believe that keeping at the forefront of research, development and manufacturing, in addition to installation service, guarantees the specifier or builder are confident that they have the highest quality product available worldwide for their project.

Infinity Zipline™ screen corner solution

Freedom Screens unique patented Brake System

The Infinity Zipline™ Series is easy to operate with the patented brake system that allows the screen to stop in any position along the track without the screen springing back.

Freedom Retractable Screens® NATA tested wind rating

Mesh locked into track to resist high wind mesh blowouts.

“The testing is complete; we could not break the Infinity Zipline™ Screen.”

Jeffrey Profke, CEO of ANTL, a NATA accredited laboratory.
