

Biofield Tuning Sound Healing Body Treatments

Sound Wellbeing
an ancient practice
for modern times

Biofield Tuning

uses sound waves created by tuning forks applied in the biofield surrounding the body to gently shift the rhythms and patterns of the body's electrical system to its own unique balance.

Sound Healing

with instruments such as Drums, Tibetan Bell, Singing bowls or Tuning forks calms the mind and balances the body.

"Visiting you has been such a gentle healing experience, the biofield tuning shifted off the daily anxiety and panic attacks, finally being able to access the clarity and knowing of who I truly am to be able to steer myself to my path."

E.P - BRISBANE
