**EMBRACING NATURAL
DECONSTRUCT AESTHETICS**

HIGH QUALITY IS AN ATTITUDE TOWARDS LIFE

Breaking the traditional appearance of doors and windows,
and integrating minimalism into the lines of the frame. eye-catching.

Behind the beautiful appearance is the guarantee of excellent
performance. Simplicity and sturdiness coexist, energy saving and
comfort accompany.

A door and window brand with a life attitude.

Inno high-performance panoramic system doors and windows.

Safety, beauty and fashionable are the soul core and craft attitude of
high-performance door and window system. From material selection to
craftsmanship, we adhere to the strictest.

The detection system allows every material and every process of the
doors and windows of the system to have pure and noble Facade
pedigree, creating a product that is as good as.

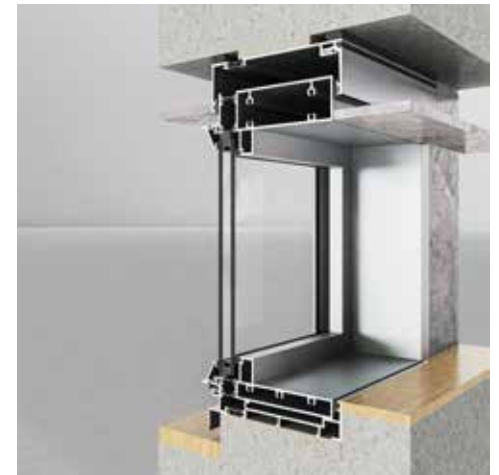

The perfect system of doors and windows truly combines "rigidity and
beauty" to the extreme.

high-performance system doors and windows, to be the strongest
patron saint of the owner's family.

Thermal transmittance diagram

The highquality INNO series can provide good insulation performance. When using high-quality insulated glass, this system is an ideal choice for passive buildings.

STANDARD PRODUCTS

- The thermally broken and narrow frame design ensures excellent energy efficiency performance.
- The multi-layer sealing design guarantees superior waterproofing and anti-air leakage performance.
- The air infiltration rate does not exceed 1.6 L per second per square meter under a pressure of ± 150 Pa.
- Sub-head optimization enhances both the visual experience and ease of installation, enabling the window to accommodate structural tolerance ranging from -15mm to +21mm.

Simplicity is the essence of great design

Windows bring so much to a building: natural light,
connection with the outdoors,

Ventilation, and a sense of space. But with continually
tightening energy provisions,

designing beautiful functional spaces is becoming more
challenging than ever before.

INNO new thermally broken extremely narrow window
allows you to create designs that achieve compliance,
deliver energy efficiency and ensure comfort in hot and
cold climates.
