GUTTERING that *really* works!*

THE EASY FALL™ GUTTERING SYSTEM

THE BACK OF OUR LEAFGUARD IS HIGHER THAN THE FRONT WHICH, ENDS THE POSSIBILITY OF FLOODING INTO EAVES OR FASCIAS.

THE EASY FALL™ GUTTERING SYSTEM HAS A REGISTERED DESIGN, NO. 340294

The EASY FALL™ Guttering System, our signature product, has been installed throughout the Sydney Metropolitan Area from Newcastle to Nowra, and from the coastal suburbs to the Blue Mountains since 1993.

At EASY FALL™ Guttering Pty Ltd we are committed to providing only the highest quality materials made from Bluescope Steel, so that the guttering and leaf-guard installed on your home is built to last. We stand by this with a written 25 year Rust-Free Warranty on the EASY FALL™ Guttering System and EASY FALL™ Leaf & Ember Guard.

GUTTERING PROBLEMS SOLVED:

**OVERFLOWING
RUST
INCORRECT FALL
FLOODING**

**PAINTING
LEAKING PERGOLAS
LEAVES
DIRT**

EASY FALL™ BRACKET

THE BIGGEST PROBLEM WITH GUTTERING IS **INCORRECT FALL.**

The answer is the EASY FALL™ Guttering System, which ends the problem of overflowing gutters – as the rainfall is constantly directed to where it should go – along the sloping inner PVC channel to the downpipes – providing continuous drainage of water.

- The brackets are adjusted to attain correct fall within the system.
- We achieve over 80mm (3 inches) of fall inside the system whilst keeping a straight appearance on the outside.
- This means ALL the water will flow away to your water tank or downpipes faster than ever before.

A LEAF & EMBER GUARD that works!*

MINI EASY FALL™ GUTTERING / LEAF & EMBER GUARD

LEAF & EMBER GUARD ON QUAD GUTTER

BUSHFIRE HAZARD: RESISTS BURNING EMBERS

Made from COLORBOND® Steel, the EASY FALL™ Leaf & Ember Guard has been independently tested to directly assess fire hazard in accordance with AS/NZS 1530.3:1999. Results were ZERO for ignitability, flame propagation and heat release.

STRENGTH

Adds considerable strength to your existing gutter.

EASY TO CLEAN

Shallow dish design facilitates cleaning off excessive debris with a hose, blower or soft brush. "Click-in" Leaf Filters can be easily removed to flush out dirt with a hose.

EASY INSTALLATION

Whilst we have standard profiles to suit most gutters, the EASY FALL™ Leaf & Ember Guard can be designed to retro-fit all guttering profiles. We have various sizes depending on the roof type and gutter used.

Mesh leaf-guards actually act as a trap for leaves and twigs, and make it very difficult for you to clean out the dirt that accumulates in the gutter underneath. The answer is the EASY FALL™ Leaf & Ember Guard, which effectively manages the problem of leaves blocking your gutters by its raised leaf-filters and its smooth shallow dish feature.

Whilst leaves do blow off the leaf guard in strong winds, depending on the aspect of your house and the vicinity of trees, the occasional removal of leaves with a leaf blower or hose will be required.

LEAF & EMBER GUARD ON BOX GUTTER

Box gutter leafguard is designed to suit each job on request, depending on the size of the box gutter.

NOTE: the box gutter leaf guard will need cleaning periodically.

GUTTERING that *really* works!*

PRODUCT SPECIFICATIONS

EASY FALL™ GUTTERING

MINI EASY FALL™ GUTTERING/LEAF & EMBER GUARD

*Conditions Apply.

The EASY FALL™ Guttering System is guaranteed to function correctly when installed to Easy Fall Guttering's training & product specifications, and as such works well during heavy rainfall.
