

A woman with dark hair is shown from the chest up, standing in a shower. She is looking upwards with her mouth slightly open, and her hands are raised towards the water. Water is spraying down on her, creating a misty atmosphere. The background consists of light-colored, rectangular tiles. Overlaid on the image in a blue, cursive font is the text "love your glass".

WHO WE ARE

Our Diamond Fusion Glass Defenders come to you!

Our experienced and professional team will visit your home or commercial site and apply our Diamond Fusion Glass Defender range of products to your glass. We have a product to suit most budgets and situations.

WHY PROTECT YOUR GLASS OR TILES

Unseen to the naked eye, glass has microscopic ridges and valleys. Glass is sometimes referred to as porous - this creates a trap for grime, soapscum, and the many minerals contained in water.

Our range of glass protection products fill these tiny valleys, leaving the glass smooth and water repellent. These surfaces become low maintenance, or easy to clean, similar to a high quality nonstick frying pan.

Ongoing care depends on which product is used, the environment, the surface it's exposed to, and how you maintain it. We can also manage the ongoing care for you.

Diamond Fusion easyClean™

Our Flagship product and the World's only True lifetime glass protection.

Diamond Fusion easyClean forms an instant permanent chemical bond with the surface, creating a double layer of protection. Layer one seals the surface, forming a barrier so the mineral from water cannot penetrate the surface. Layer two then caps this, forming an extremely durable water repellent surface, leaving the easy to maintain surface that we all want.

Diamond Fusion easyClean is an unbeatable application for all silica based surfaces, such as Showers, Splash-backs, Tiles, Glass Balustrades, Exterior Glass, plus Automotive, Marine, and Commercial Glass.

Clear-Fusion PRO™

Simply the best "bang for your buck" single layer product available anywhere.

Clear Fusion Pro is an excellent solution to provide a low maintenance surface to any Glass or Silica based surface, such as Showers, Tiles, Exterior windows, Balustrades, Splash-backs, Commercial glass, Automotive, and Marine.

WHAT WE TREAT

At Diamond Fusion we treat a variety of glass and silica based surfaces.

SHOWER GLASS & TILE PROTECTION

Make life easier and protect your shower glass and tiles. Our surface protection make it easier to keep glass clean without using chemicals.

SPLASH BACKS & MIRRORS

Glass or tiled splashbacks can stop being such a chore! A simple wipe with a damp cloth will remove splatter, or toothpaste splashes.

EXTERIOR GLASS & BALUSTRADES

Hard water stains and dirt from the environment can destroy the clarity of your windows and balustrades.

USED SHOWER GLASS RESTORATION

Shower cleaning sprays don't work. By using our Mineral Removal products, we can Restore most stained shower glass to looking great again.

COMMERCIAL GLASS

Reduce maintenance time and costs on your glass roofs & facades, shop fronts, hotel showers, railings, skylights & more!

AUTOMOTIVE & MARINE

Increase the clarity, and impact resistance* of your glass. Our products make ongoing care, easy.

Clear-Fusion V™

Great value non permanent protection.

As with our other products, application can be to any silica based surface.

Lifespan of Clear Fusion V is dependent on its environment and care, but this can be extended dramatically with the use of our aftercare products.

DIY and After Care

DIY Mineral stain removers & protection, plus our full range of aftercare gear is available at:

www.diamondfusion.co.nz

Also available DIY plastic and stainless steel protectant.
