FUTURE PROOF YOUR HOME

WHY SHOULD YOU CONSIDER A BETTER BUILDING STANDARD?

THE PASSIVE HOUSE STANDARD

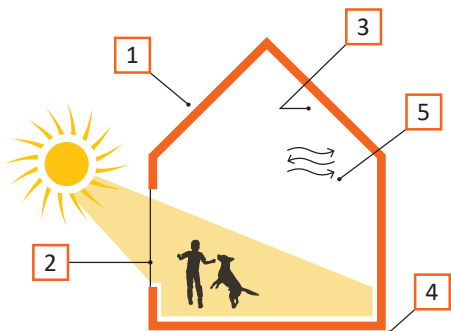

The Australian Passive House Association promotes the international Passive House (Passivhaus) high-performance building standard as a simple, quality-assured approach to designing and constructing better buildings. The Passive House Standard is a proven methodology for achieving high-performance from buildings of all types, and is the only internationally recognized performance-based building energy standard.

The Passive House Standard has been used for over 25 years to create highly efficient buildings in all climate zones, from the Antarctic to the equator.
