

POSITIVE ENERGY HOMES

A well-designed home serves as a stage on which a man's life unfolds leaving the human condition healthy. Its design and construction must be environment friendly and energetically balanced while providing enough energy resources to support the recovering Earth. These conditions directly support the natural process of growth and well-being.

OUR DESIGN PRINCIPLES:

1. Thermal Comfort: 21-25 degrees through the year
2. Air Quality: Constant fresh air supply
3. No air leakages- Energy Reduction up to 90%
4. Nature's Design Secret / Golden Ratio
5. Orientation- Heart-based Feng Shui
6. Home as a sanctuary with a dedicated space for a refuge for gratitude/meditation/yoga corner
7. Visual and non-visual connection to Nature
8. Complexity and order
9. Zero Net Carbon emission
10. Natural materials and natural sensory stimulants

WE CREATE HEALTHY, COMFORTABLE HOMES THAT ARE SUSTAINABLE AND AFFORDABLE

ON LINE COURSES - DO IT YOURSELF

HEALTHY

- No condensation or mold
- No noises or air pollution
- Direct contact with Nature
- Gratefulness/Meditation

COMFORTABLE

- max. CO2: 1000ppm
- 20°C – 25°C
- Fresh air continuously

SUSTAINABLE

- no draughts
- low heating / cooling load
- max. 15 kWh/m2a
- build to last

AFFORDABLE

- to build
- to live-in-through reduced energy usage

NEW GENERATION OF ENERGY EFFICIENCY

POSITIVE ENERGY INTERIORS

OUR DESIGN PRINCIPLES:

1. Natural Materials
2. Nature's Design Secret/ Golden Ratio/ The Divine Proportion
3. Heart based Feng Shui
4. Ultimate Balanced by Elements
5. Prospect and Refuge by Elements
6. Contact with direct Nature or form of Nature
7. Visual and Non-visual Connection With the Nature
8. The Gratitude Corner by Dynamic and Diffuse Light
9. Guided Meditation with Spiritual Heart
10. Energy Channeling- Reiki Tummo

ART OF LIVING

HUMAN CENTRED DESIGN

We deliver a holistic approach to the contemporary interior design in which you would want to spend an extended time in it. We will ask you to pay attention to natural elements that surround you and connect with them. We believe that a home is a sanctuary that needs re-connection again. By doing so, we can increase the quality of our lives, our enjoyment in the present moment and reconnect with ourselves in a space which shapes our daily reality. The whole universe is made of balance, and science as well as eastern philosophy supports that in numerous examples. We use historically and scientifically proven methods to design you a valuable space center in abundance of wealth and happiness.

GRATITUDE CORNER: STOP AND RELAX

Gratitude Corner within your entry or living space is specially designed for us to retreat to and remember everything that we take for granted in our lives. We propose a pure station where we can stop regularly, retreat from the daily demands and be grateful for everything we have right now.

IF ONE IS TRULY GRATEFUL, HE BECOMES AUTOMATICALLY JOYFUL. NO MAN IS GRATEFUL AND JOYFUL, BUT UNHAPPY.

POSITIVE ENERGY WITHIN YOU

Due to the fast pace of living all around the globe, people have lost a vital biological connection with the natural environment. Therefore, in a way I am free to say we lost our connection with ourselves. I believe that this illusion is keeping us away from present moment awareness, which was proven the healthiest state of mind one should have.

The house we live in is a gift we have and we should use it to retreat from the demanding world out there daily. I will introduce you to the center of peace, calmness and joy you can always access. Give me a buzz and let us start this exciting journey...

MARTA KABLAR

EDUCATION & ONE TO ONE COACHING

I hold a master's degree in Architecture from the University of Belgrade, Serbia. I recently completed a Certified Passive House Designer course in Perth. I've completed vast development and construction projects in Australia and overseas. Throughout the last three years, I put my nose to the grind continuing my professional, personal, and spiritual development from the best teachers born nowadays and on top of that, I can clearly see how we are systematically disconnected from our homes. I am passionate about changing that and helping you improve the quality of your life by paying attention to the Positive Homes & Interiors Principles I can gratefully offer. Our genuine interest in sustainable building components, our relationship with our internal and external space, as well as our relation with the Earth are the main attributes of design solutions I propose.

WHY PASSIVE HOUSE?

Imagine a sustainable home that provides the maximum comfort for you and your family by keeping stable internal temperatures and a continuous supply of fresh air! This building standard, originally developed in Germany, can reduce heating needs by an astounding 90%. This target is reached by making the house incredibly well insulated, virtually airtight, and by orienting and designing the house to maximize passive solar gain.

Did you know that houses in Australia are among the coldest and most poorly designed worldwide?

Did you know that according to the World Health Organization 80% of the health issues we have is due to the air we breathe?

Australian Buildings are not comfortable, healthy, or energy efficient. The Australian Building construction codes are changing slowly. The problem is that the global predictions for this improvement are for the year 2050. By then the impact ON US and our PLANET will be huge, as we spend 90% of our time indoors. In contrary, all European countries are leading in this advancement building standard and building Near Zero Energy houses from 2021.

BECAUSE THIS STANDARD IS WORLD'S LEADING STANDARD FOR ENERGY EFFICIENT, HEALTHY, COMFORTABLE, ECONOMIC AND ENVIRONMENTALLY FRIENDLY BUILDINGS.
