Service Free 5yr Guarantee

Easy to Operate

Tested & Certified

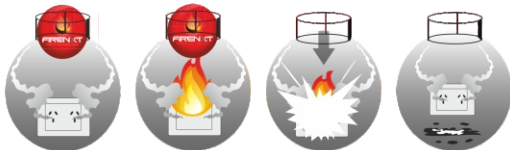

# The FireNXT Fire Extinguisher Ball

The FireNXT is a revolutionary ball-shaped fire extinguisher that self-activates when it comes in contact with a naked flame, automatically activating and extinguishing a fire up to 3 cubic meters before the fire has a chance to spread and become destructive.

## Operation & Application

**Applications;** Recommended for residential, industrial and commercial use in homes, cars, hotels, kitchens, server rooms, public transport, exhibition centers, festivals, schools, hospitals, construction, mining, petrol stations, manufacturing.

**Automatic Use;** Install the dry powder fire ball and bracket in a fire prone area; above kitchen stove or electrical outlets. Upon flame contact, the fire will ignite the lead wire, activating the fire ball and dispersing dry powder to put the fire out.

**Manual Use;** The fire ball can be manually thrown into a fire. The dry powder fire extinguisher ball will activate in 5-15seconds upon flame contact and extinguish the fire. Ignition temperature is 70°. No special training required and even children can use it.

- ✓ **One Ball Extinguishes FIVE Types of Fires** - Suitable to use on Class A, B, C, E and F fires.
- ✓ **Lightweight** - Weighing only 1,050g and in the shape of a 150mm diameter ball.
- ✓ **Easy To Use** - Simply mount the ball in a fire prone area. The ball will automatically self activate upon flame contact.
- ✓ **Safe** - Non-hazardous to both the environment and humans, with low to no corrosion on electrical equipment.
- ✓ **Maintenance Free** - No annual service costs or maintenance required for 5 years.
- ✓ **Cost Effective** - Low cost fire extinguisher that works alongside standard fire fighting equipment.
- ✓ **Installation is Simple** - Install above or adjacent to any high-risk areas such as electrical components, stove tops, gas cylinders or flammable chemical articles. Can be affixed to walls or stand alone. Bracket included.
- ✓ **Usage** - Suitable to use in home, commercial, transportation or industrial environments.
- ✓ **Applications for Use** - Keep your FireNXT Fire Extinguisher Ball handy in the boot of your car, boat, kitchen etc. It can be used in commercial buildings, retail and public areas, heritage buildings or places of religion, in industrial sites server rooms and mining
