Right now, people just like you are going about their day with the support of a Platinum Elevator. From an ageing couple enjoying full access to their home, to busy professionals moving between building levels in style, every journey is a testament to the journey we've taken to become one of Victoria's most trusted elevator suppliers.

It began with our people. We founded something great by recruiting people who genuinely want to help others. This simple fact means our clients receive more honest answers, and less hard sell. We listen to what matters most to you, and genuinely keep your best interests at heart, leading to well-considered solutions that fit your lifestyle and your budget. It is our hope that you leave our Melbourne showroom feeling relaxed, informed and importantly, unhurried.

Handover Celebrations

The Difference Is in The Detail

From enabling people to stay in the home they love, to making buildings more accessible to everyone, every elevator makes a difference to peoples' lives. And when it comes to choosing your lift supplier, the difference is in the detail.

At Platinum Elevators, we strive to set an incredible standard from the ground up. It starts with a local showroom right here in Melbourne, where we invite you to touch and operate our quality elevators which are 100% Italian made. See the high-level design and engineering that goes into every Platinum Elevator and discover just how many finishes we include as standard. Our expert local team will be on hand - not to sell, but to answer every question as you look to make an educated decision. It's not uncommon for customers to visit our showroom up to five times before they make a decision.

Proudly 100%

Quality Assurance On A Global Scale - ISO 9001 Certification

We are pleased to announce that Platinum Elevators has been awarded ISO 9001 Certification for the supply, installation, and servicing of elevators.

What is ISO 9001 certification?

ISO 9001 is the most recognised quality management system standard in the world. It can be used by any organisation regardless of size. Over one million companies in 170 countries are ISO 9001 certified.

For an organisation to receive its ISO 9001 certification, it must follow the requirements outlined in the ISO 9001 standard. To meet this standard, a company must possess the ability to provide products and services that meet customer requirements and demonstrate consistent improvement.

What is the purpose of ISO 9001?

ISO 9001 helps ensure that the products and services supplied to customers are consistent and of superior quality. Customer satisfaction is ISO 9001's primary concern, therefore the standards under ISO 9001 are developed to maintain and exceed customer satisfaction.

The importance of ISO 9001 certification

Earning an ISO 9001 certification increases the value and credibility of an organisation or company. If the company you are dealing with is ISO 9001 certified, it means that they have the necessary systems in place to be able to provide you with superior products and the highest level of customer service possible.

Should I check if a company is ISO 9001 certified?

Yes absolutely, any discerning buyer should check with potential suppliers of the lift (not the manufacturer) to ascertain whether they are ISO 9001 certified. This assurance will give you peace of mind and confidence that you will receive the industry's best available products and a superior level of customer service.

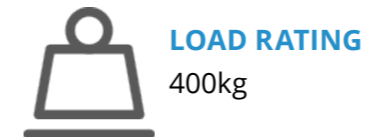

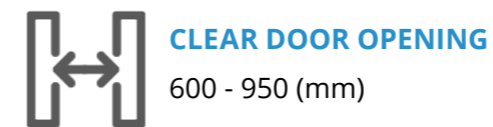

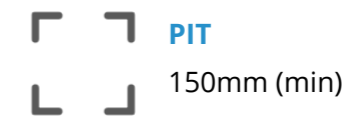

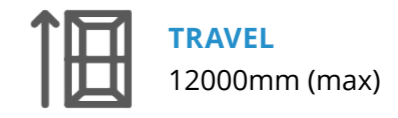

About The Sovereign Lift

Industry Leading

Technical Data

Complying to AS1735.18 - Passenger lifts for private residence.

The Sovereign Lift is one of the most attractive and captivating home lifts on the market. Platinum Elevators guarantee a minimum 400kg load rating with every Sovereign Lift cabin configuration as "standard," making the Sovereign Lift an industry leading mighty, powerful home lift with manual swing landing doors. The Sovereign Lift cabin is completely customisable, with dimensions starting from 600mm wide x600mm deep, all the way up to 1100mm wide x1400mm deep, offering complete flexibility with design.

Safety features - peace of mind

- Battery backup & cabin lighting in case of power failure
- Automatic return to lowest floor
- Full height light curtain protection beams across cabin entrance
- Over load alarm and indicator
- Creeping speed feature

Each Sovereign Lift package comes with

- Guaranteed 400kg load rating
- Digital cabin display
- Full height control operating panel - sleek button integration design
- 4 x LED ceiling lights
- Glazed panoramic manual swing doors, lockable at 90 degrees
- Full height flat integrated door handles
- Wide range of luxury cabin finishes

Complete Design Flexibility

If you are building a new home or looking to retrofit a lift into an existing home, Platinum Elevators highly skilled consultants can assist you with design, ideas and concepts to ensure you get the best product in the most suitable location.

Platinum Elevators will custom design the largest possible cabin size to suit any existing shaft or we can customize a Glazed Metal Structure to surround the lift in both indoor or outdoor applications creating a luxurious state of the art feature.

“You will be amazed where we can incorporate a lift into any building design, minimising space and saving on builders works.”

Luxury Design Metal Structures

Suitable for Indoor & Outdoor Applications

Platinum Elevators offer a huge range of Metal Structures which are suitable for indoor and outdoor applications. The entire lift product range can be incorporated into a luxury Metal Structure. Platinum Elevators can even custom design a Metal Structure for you, so we guarantee the best fit design for your project.

Peace of Mind
24/7 Service Support

Regular Servicing can increase the longevity of your lift.

Our fully equipped vans mean that most remedial works required can be done efficiently and cost-effectively by our experienced service technicians. In the rare chance of a breakdown, simply call our 24/7 Service Department. Being local means we are in the same time zone and never too far away should we need to attend your premises.

Safety first.

During your service, your lift will also be taken through a series of emergency procedures as part of a full safety audit. This is designed to give you and your passengers full confidence in the safety and security of your lift.

Client's review ★★★★★

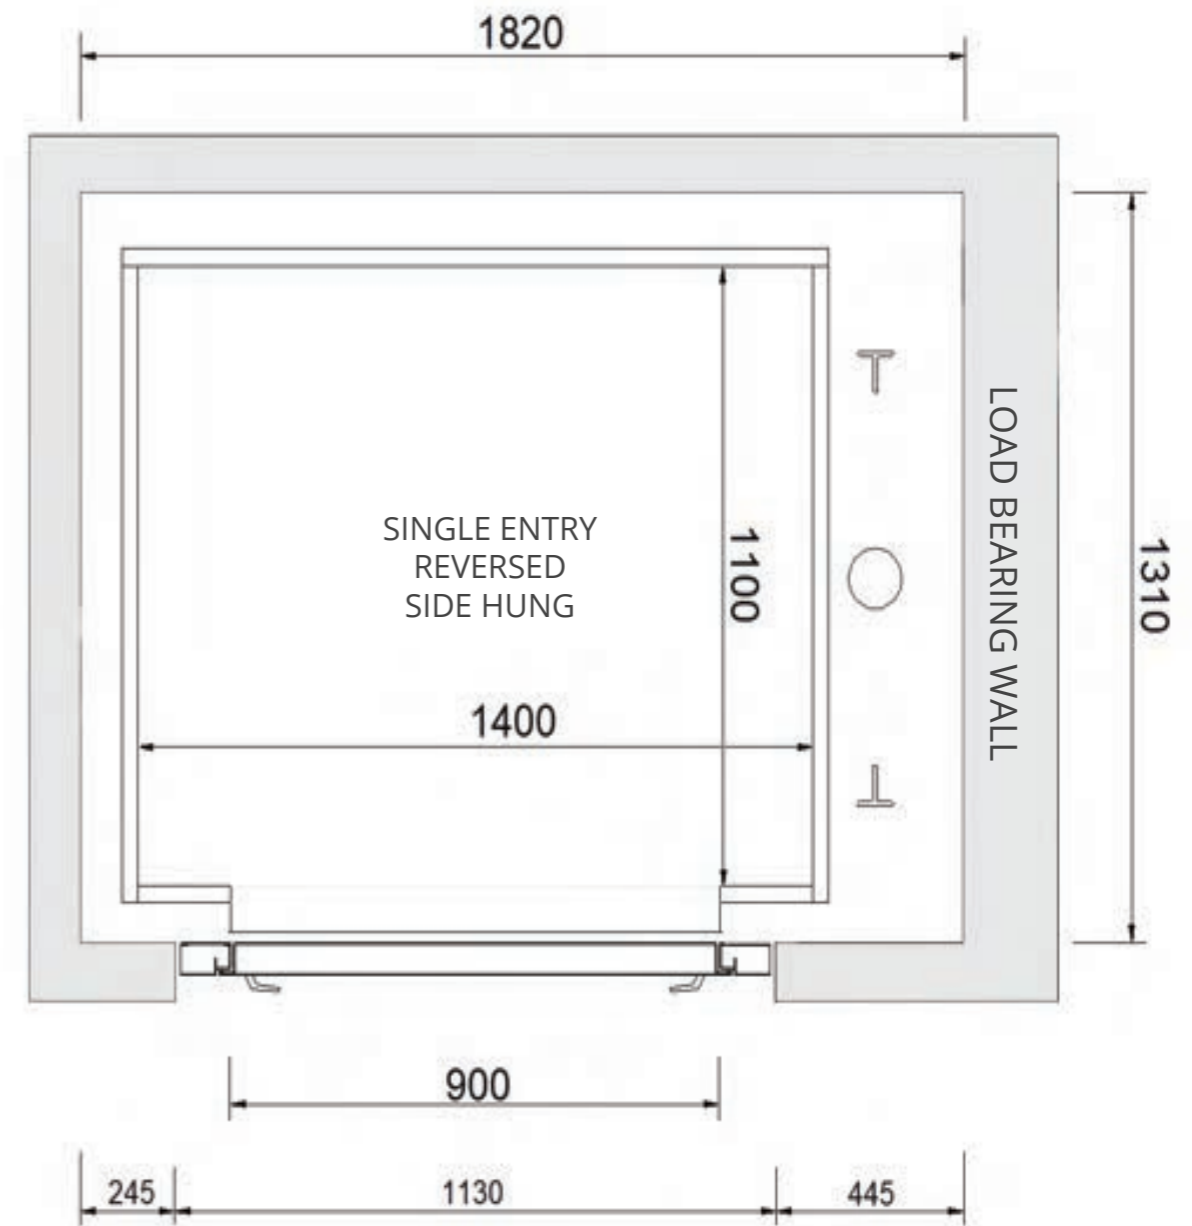

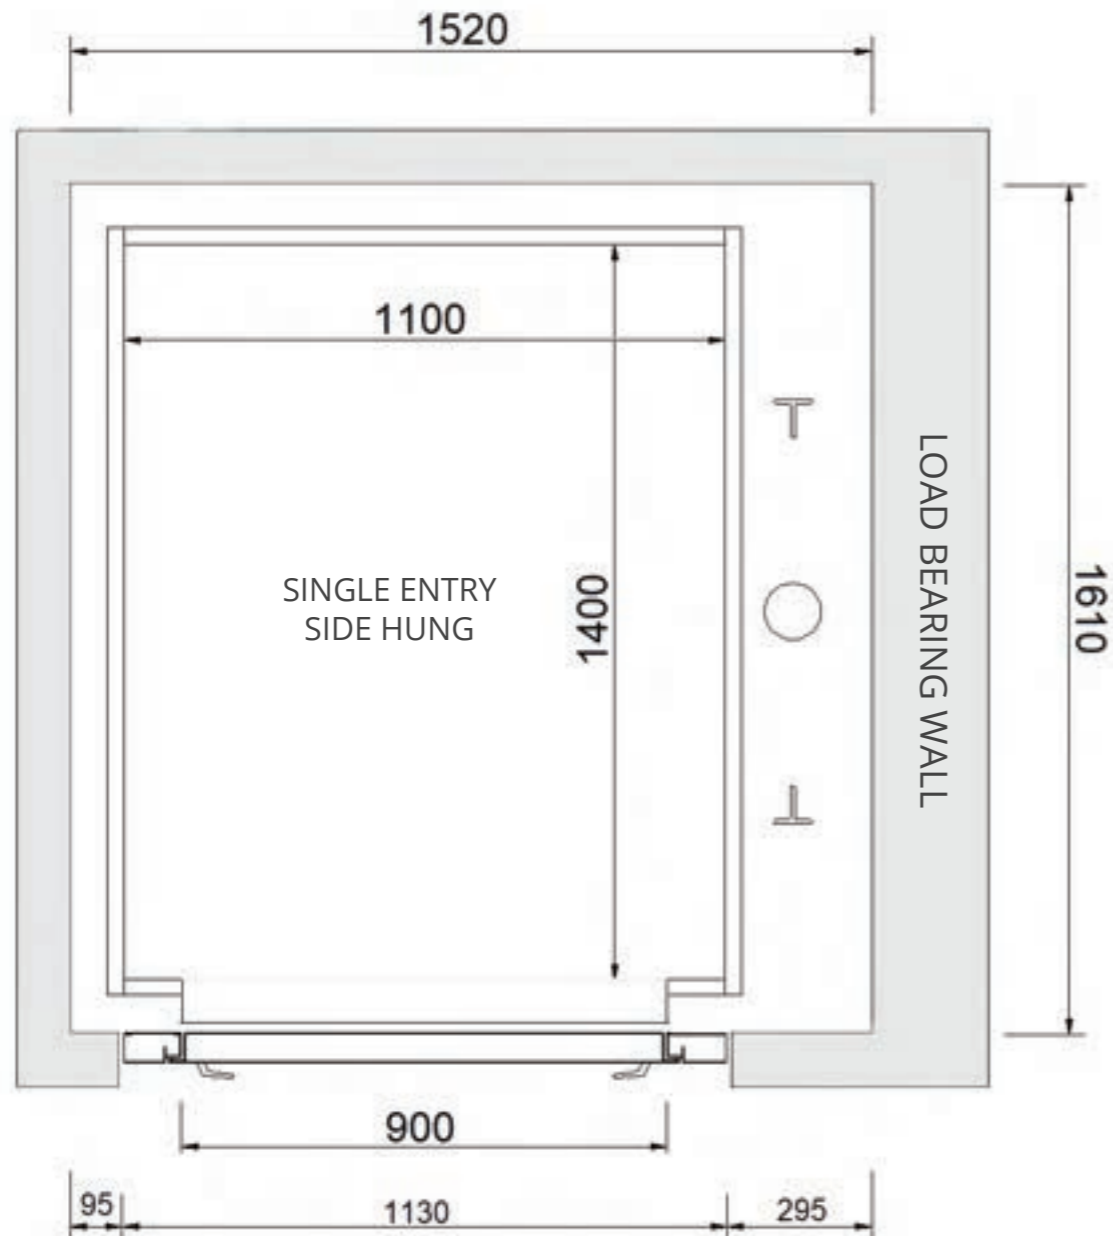

"We had a fantastic experience with Platinum Elevators. From sales right through the design and installation process we could not wish for better service or people to see it through to completion."
