- Other Bespoke Timber Work

KWILA - ROYALE KITCHENS

Working with Nature

The WOODSMITHS are pioneering a new way of thinking when it comes to benchtop surfaces. Timber provides a beautiful surface that will make any interior stand out, it gives a focal point to any kitchen, bathroom or living area. However, the benefits of timber go further than that. Trees are one of the main stores of carbon and will hold this even after it has been harvested. This means your benchtop is holding CO2 that would otherwise be in the atmosphere. The WOODSMITHS have a large range of sustainably harvested timbers with FSC and PEFC certifications, harvested to the highest levels of sustainable practice. Commercially grown forests such as American Oak are not only sustainable but are growing at large rate. By selecting a timber benchtop, you are doing your bit to help this reforestation and support the benefit that provides for entire ecosystems. Being natural, timber is nontoxic and studies have shown how wood is far more effective in absorbing and removing bacteria than any other material. Nature has given us the perfect material, strong, beautiful, healthy and sustainable and through innovation we can create stunning interiors and do our bit to save the planet.

THE WOODSMITHS

IT'S THE FINISH THAT COUNTS

The Hi-Build Finish... No Worries

Impact Resistance: Even softer timbers such as macrocarpa become much stronger with the generous coatings of Hi-Build Resin that the The Woodsmiths apply as standard.

Chemical and Solvent Resistance: Hi-Build Resin is highly resistant to all household cleaners, chemicals, solvents and bleaches... virtually "stain-proof."

Easy Care and Maintenance: The silky smooth glass-like finish makes cleaning a breeze. All standard non-abrasive cleaners can be used. We recommend using a microfibre cloth and warm water.

Heat Resistance: The Hi-Build Resin surface is heat resistant. Boiling water is no problem for example. However we recommend that heat resistant mats, tiles, glass, marble or stainless steel should be used where hot pots, pans and cups are frequently used. We can also insert these into your top.

Repairable: Dents can often be repaired by pouring boiling water on them and rubbing with a towel. Major ruptures can easily be repaired "on-site" by filling with resin and buffing.

Special Formula: Hi-Build Resin is made for use on any timber species. Being hard and yet flexible it allows the timber to move naturally without cracking. It is also UV resistant.

Totally Sealed: Bench tops from The Woodsmiths are totally encased with the resin to make them all-round water proof.

Comprehensive Warranty: All bench tops finished with Hi-Build Resin are covered by a full ten year warranty against faulty workmanship and/or materials.

If you have any problems with your bench top, The Woodsmiths will be there to rectify it within 7 days.

RECYCLED RIMU - KITCHEN & INTERIOR CO.

Other Finishes

Natural Oil Finish: gives a lovely look that only handfinished oiling can achieve. This will grow in character and personality as the bench top is used and enjoyed. Five Year Warranty.

Two Pack Lacquer: for the ultimate in clean, crisp finishes, lacquer offers a superb bright sharp finish totally in keeping with the modern settings of today. Five Year Warranty.

It doesn't stop there. The WOODSMITHS go the extra mile to ensure that their work reaches you in perfect condition and on time.

All wood work dispatched from The WOODSMITHS is encased in expanded polystyrene specifically manufactured for the purpose to ensure maximum protection during freight and handling.

BENCHTOPS

STAINED OAK BAR TOP - NORTHERN CLUB, DBJ

ECO - BAMBOO

BESPOKE SOLID WOOD BENCHTOPS

These tops are the showpiece in many NZ homes. Each top is made to each individual customers' needs and taste. Starting as rough sawn lumber, every top is made from grain matched laminations which gives clients freedom of timber choice, thickness and lamination width.

FINGER-JOINTED BENCHTOPS

These tops are a contemporary option to our standard timber tops. Finger jointed tops are constructed from 40mm wide timber laminations made from short lengths of timber. Available in 3 popular European timbers; Ash, Oak and Walnut, this material is cost effective and minimises timber waste.

Current sheet sizes are: 5400 x 1200/700 x 30/40mm

ECO-BAMBOO BENCHTOPS

Laminated Bamboo Bench Tops are very hard, durable and incredibly economical on your pocket and the environment. Bamboo is an FSC certified, extremely fast regrowing material, the only benchtop available made from a natural resource that can renew every 5 years!

Current Sheet sizes are:	3000 x 720 x 30/40mm
4200 x 720 x 30/40mm	2440 x 1250 x 19/30/40/60mm
3600 x 1250 x 30/40mm	2440 x 720 x 30/40mm

WHAT OUR CUSTOMERS ARE SAYING...

QUALITY AND SERVICE

"The team at the Woodsmiths could not have done a better job. Where all other suppliers were not able to provide a product which would deliver to my expectations and requirements, they have. The kitchen bench top looks a million dollars, it was delivered on time and fitted perfectly. Thank you to the Woodsmiths!"

WOULD NOT HESITATE TO INSTALL SOLID WOOD AGAIN

"We are delighted with our Rimu benchtop. It's the first thing people notice when coming to our home. Not only is it practical to use but perfectly complements the kitchen design. We wouldn't hesitate to install this product again if we ever move to another house!"
