Cruelty Free & Vegan

OUR STORY

Welcome to the Cannabella Family. When we say family, we mean family.

Cannabella was founded in 2017 by us (Matt, Tim, and Michael Stiegler), three brothers from Australia's sunny Gold Coast.

It all started when Matt began researching natural skincare alternatives to help alleviate the side effects of chemotherapy, when our Mum was being treated for cancer that year.

He researched the incredible healing properties of hemp online, and began experimenting by melting down Mum's skincare products and adding hemp oil and natural botanical extracts to them.

The results were astounding. Mum immediately saw dramatic results in her skin, which began to heal, feeling soothed and supple again. Friends and family members with chronic skin conditions like eczema, psoriasis, and acne were keen to try our homemade products, and they reported astonishing results. This inspired us to refine and perfect our products, and in 2018 Cannabella was born.

Today we're a leading Australian natural skincare provider with a mission to reconnect people with the healing powers of plant-based skincare.

Made from 100% unfiltered hemp oil, Cannabella products are infused with natural, plant-based botanicals. We still handmake our products using 100% natural, sustainable, & cruelty-free ingredients.

Raw, unfiltered hemp seed oil is globally recognised for its health, wellbeing, and skin renewal benefits.

Hemp seed oil contains the perfect balance of fatty acids that mimic those of our own skin, making it the most compatible oil to use for skincare.

Hemp seed oil loves all skin types; oily skin, dry skin, ageing and aged skin, damaged, inflamed and sore skin.

It is suitable for treating psoriasis, rosacea, eczema and acne prone skin.

It's also packed full of antioxidants, omega 3 and omega 6 fatty acids, vitamin E, linoleic and oleic acids, and chlorophyll.

Hemp seed oil (and products made from it) are classified as nutritional supplements because they contain a unique mixture of plant-based compounds with multiple therapeutic benefits.

Unfiltered hemp oil is preferred over processed hemp oil, because of its high chlorophyll and omega vitamin content. This naturally helps heal skin without clogging pores, making it perfect for all skin types.

The natural hemp (and alfalfa grass)-sourced Chlorophyll we use in Cannabella products is shown to reduce the signs of ageing, fight damage, soothe irritation, and reduce congestion.

THE CANNABELLA RANGE

Let nature heal you with 100% Botanical skincare formulated with premium Australian grown, unfiltered Hemp seed extracts.
