10

TEN REASONS WHY YOU **REALLY SHOULD** BUY A CASCADE SWIMMING POOL!

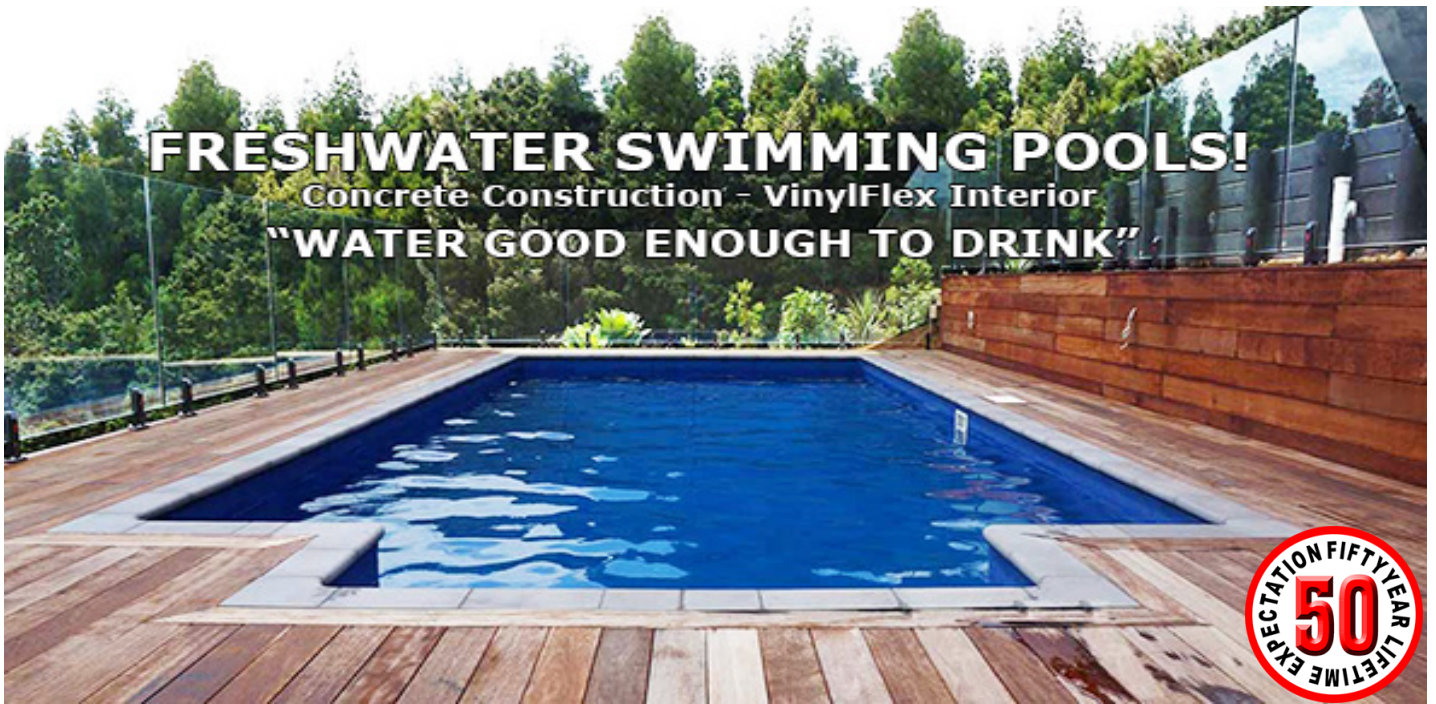

- 1: **LIFETIME GUARANTEES:** Cascade is New Zealand's only pool company that can claim more than Fifty Years of continuous building of beautiful family swimming pools for lucky Kiwi families - and with extended Lifetime Expectations based on actual history.
- 2: **TRANSFERRABLE WARRANTY:** For people changing homes - upgrading or downsizing every now and then – if this is you, and you have followed our maintenance program, you will benefit from our transferable Lifetime Expectations. Even if you sell in 10 years' time, our lifetime expectations still have years to run.
- 3: **24,000+ POOLS:** Since our first pools back in 1971, we have installed over 20,000 new and refurbished pools. To the best of our knowledge, no other pool company under continuous Single Family ownership has constructed even one thousand pools in their entire pool building history
- 4: **FIFTY YEAR LIFETIME EXPECTATION:** We have many thousands of pools that are still providing healthy entertainment for Kiwi families. Our FRESHWATER Hybrid Concrete Pool with VinylFlex Interior has a structural lifetime expectation of FIFTY (50) years
- 5: **FLEXIBLE VINYL INTERIORS:** Cascade's VinylFlex Aqualux interiors provide the lowest maintenance pools available - they practically 'look after themselves'.. and since the 1950's VinylFlex type pool interiors have continued as the world's best selling swimming pool Interior for residential swimming pools
- 6: **AQUAGENIE + OZONE** Cascade's unique treatment system is the cheapest way of providing a **safe and healthy environment for your children** - at amazingly low running costs
- 7: **STYROBECK INSULATION:** NZ Building Code requires insulation for all new homes. Cascade has been using wall insulation for more than 30 years, providing environmentally friendly heat-retention insulation for pool walls. Up to 90% overnight heat retention is retained when in conjunction with our SolarTrap pool cover for a warmer pool than neighbours in the same street.
- 8: **FRESHWATER SWIMMING:** Our Activated Oxygenated pool water kills viruses like Covid, and Cryptosporidium and Guardia pathogens which, sadly, we are familiar with in New Zealand. **Amazingly, not all bacteria and viruses are affected by Chlorine or Salt Water.** In an actively maintained FRESHWATER pool, there will be no residual pathogens, bacteria, germs or Chlorine smells involved while keeping your children safe - helping prevent the pool from going green.
- 9: **LIFETIME WARRANTY:** Cascade's Lifetime Expectations are based on the experience of more than fifty years of summer swimming. Some imported or locally-made pools have really only been available here for a few years and have not yet experienced the very high UV Radiation levels of New Zealand summers.
- 10: **LONGEST HISTORY:** CASCADE is backed up by the company's long History - and Lifetime Expectations are personally signed by the Directors of the company. Have other pool companies offered you a personal guarantee signed by the actual company's Owner?

We are a third generation family business.

FRESHWATER SWIMMING POOLS!

Concrete Construction - VinylFlex Interior
"WATER GOOD ENOUGH TO DRINK"

CASCADE HAS BEEN BUILDING FAMILY POOLS SINCE 1971- MORE THAN FIFTY YEARS!

Forget crowded beaches and expensive and tedious travel to overseas bug ridden locations!

Now you can "holiday in your own backyard all year 'round" with a bespoke swimming pool from Cascade:

We'll build to your shape, your size, and your depth - your very own individual unique pool!

Our exclusive SOLAR HEATED FRESHWATER AQUAGENIE system provides chemical-free pure water that is "good enough to drink" - and with our contemporary pool designs that trap and retain FREE SOLAR HEAT from the sun - a "Solar Heated Pool" if you like, that will be up to 5 degrees or more warmer than other home pools in your neighborhood!

Our 'Chlorine-Free PROZONE pools need an absolute minimum of any pool chemicals: 95% chemical free! Prozone kills 100% of all known germs, pathogens and bacteria including Covid varieties to keep your family safe!

No Chlorine smells or Salt stains ever again and you can enjoy chlorine-free swimming in the lowest maintenance pools available in New Zealand!

We build beautiful and fun, low maintenance pools - in a range of colourful flexible interiors in which your family will love swimming, and with the addition of a small Heat Pump you may extend your home swimming season for up to eight months annually. With a Lifetime Expectation of 30 Years, a new VinylFlex can be retro-fitted in just two days - for another 30 years of use!

FREE ON-SITE MEETING and WRITTEN QUOTATION

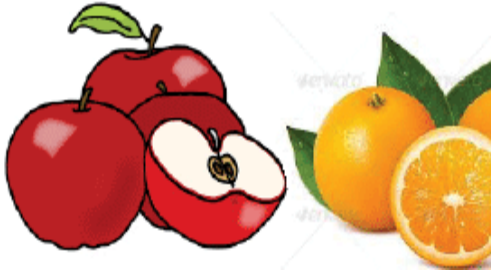

FRESHWATER™

WATER GOOD ENOUGH TO DRINK!

You can't compare "Apples with Oranges"

SWIM IN CHLORINE-FREE WATER.... No "Chlorine Smell" or smarting eyes!

CASCADE'S FRESHWATER™ POOL is unlike the others ...
The **World's First** COMBINATION of Design and Materials that save you time and money, & provides safe swimming for your kids!

Cascade provides **FRESHWATER™** pools:

Low pool chemicals are our exclusive Cascade innovations! The best - safest - choice for your home pool!

And no more endless checking the pool chemicals to prevent it going green

FREE HEAT from the SUN is captured to heat your pool at NO COST!

ONLY CASCADE 'SUCCESSFULLY UTILISES' THE FREE SUNLIGHT FOR YOUR POOL HEATING by using our SUNTRAP Cover and INFILL-FOAM™ pool wall insulation

INFILLFOAM

INFILLFOAM/SUNTRAP combination that creates a fully INSULATED pool using NZ Building Code Styrobeck insulation, which cuts heating costs significantly.
Adding a small heat pump provides up to eight months extended swimming!

The **SUNTRAP THERMAL BUBBLE COVER** combines with **INFILLFOAM** and forms a "FREE SOLAR HEAT PANEL" IN YOUR BACK YARD!
The whole **FRESHWATER™** POOL acts as a Solar Collector!

Because your pool should be a PLEASURE!

A compelling reason to buy a Cascade pool, our exclusive Aquagenie creates **total water circulation** that no other pool skimmers can provide.

The Aquagenie Skimmer/Filtration System fitted to all our FRESHWATER pools works better than any other skimmer, recirculates pool water far more efficiently, skims better all of which SAVES YOU WORK and MONEY!

OzoneMAX OZONE: KILLS ALL GERMS AND BACTERIA:

UV Light Kills **ALL** bacteria and pathogens, not just the 65% like Chlorine does! BETTER THAN SALT! BETTER THAN MAGNESIUM!
SALT pools are NOT CHLORINE FREE! Electrolysis converts salt (sodium chloride) into CHLORINE by charging the pool water with electricity! Does not kill Crypto or Gardia germs.

AQUALUX VINYL FLEX

Crack-Proof interiors fit like a glove over the concrete pool shell.

Smooth to the touch yet non-slip, the longest lasting low maintenance Interiors (up to 30 years when properly cared for) that will never crack or peel: So our pools never need repainting or re-plastering, saving thousands in on-going maintenance. A great colour range, embossed surface fits like a glove.

Attractive and powerful, SpaElectrics LED pool lights - Colour-changing Pool Lights best quality 12 watt LED lights provide a gentle and attractive glow to your pool. Red, Blue, Green, Yellow, White - or click to the automatic colour-changing effect that kids love when it's party time for the family.

Finally, an Automatic Pool Cleaner that really works ... the Dolphin S200:
It works, so YOU DON'T have to!

Simply place in the pool, switch on ... and walk away.
After a timed period or series of re-starts, when it stops, simply empty the basket!
That's all there is to keeping your pool walls clean and the floor clear of leaves and dirt.

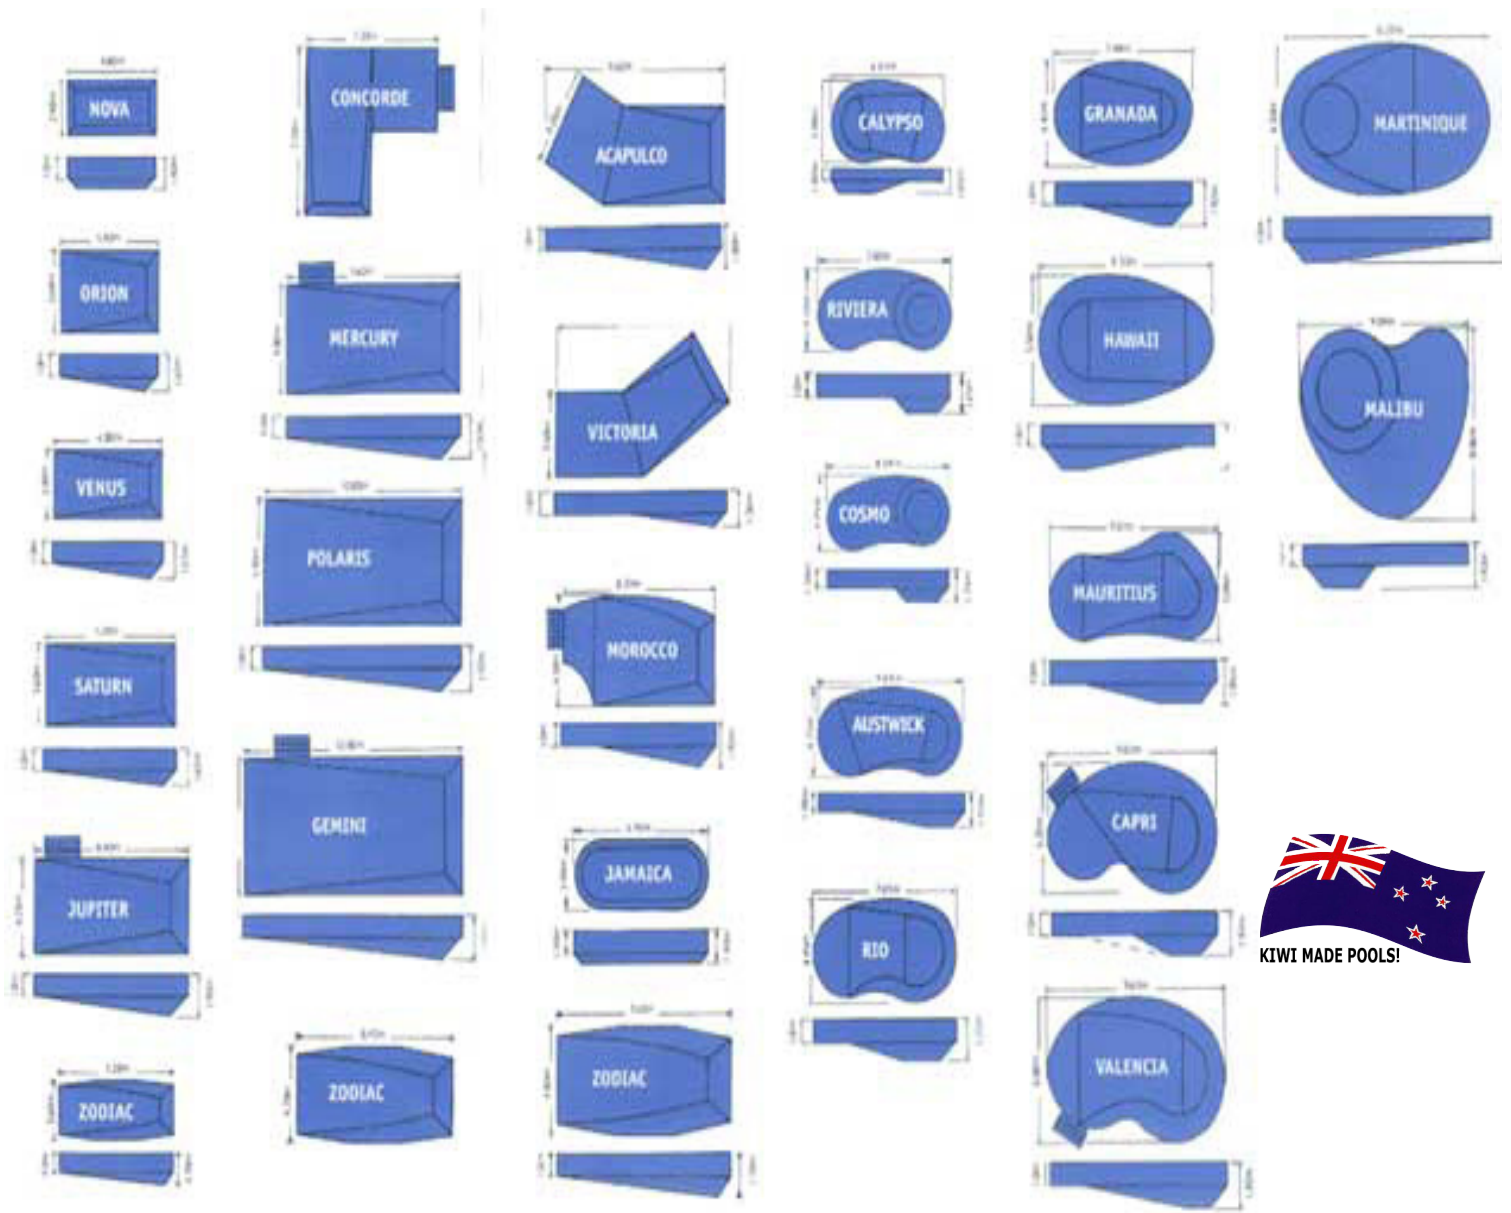

"Lifetime Guarantees"

The Consumer Guarantees Act (1993) and Fair Trading Act (1986) assures you of suitability of purpose, acceptable durability and extended lifetime relative to cost - We call this "Lifetime Expectation" and quantify it with our expected lifetime.

Structure: Cascade's 50 Year '**Lifetime Expectation**' for our hybrid concrete pools in properly maintained in FRESHWATER pools and in normal stable non-acidic soil conditions is that they should remain 'suitable for the intended purpose' for up to Fifty Years.

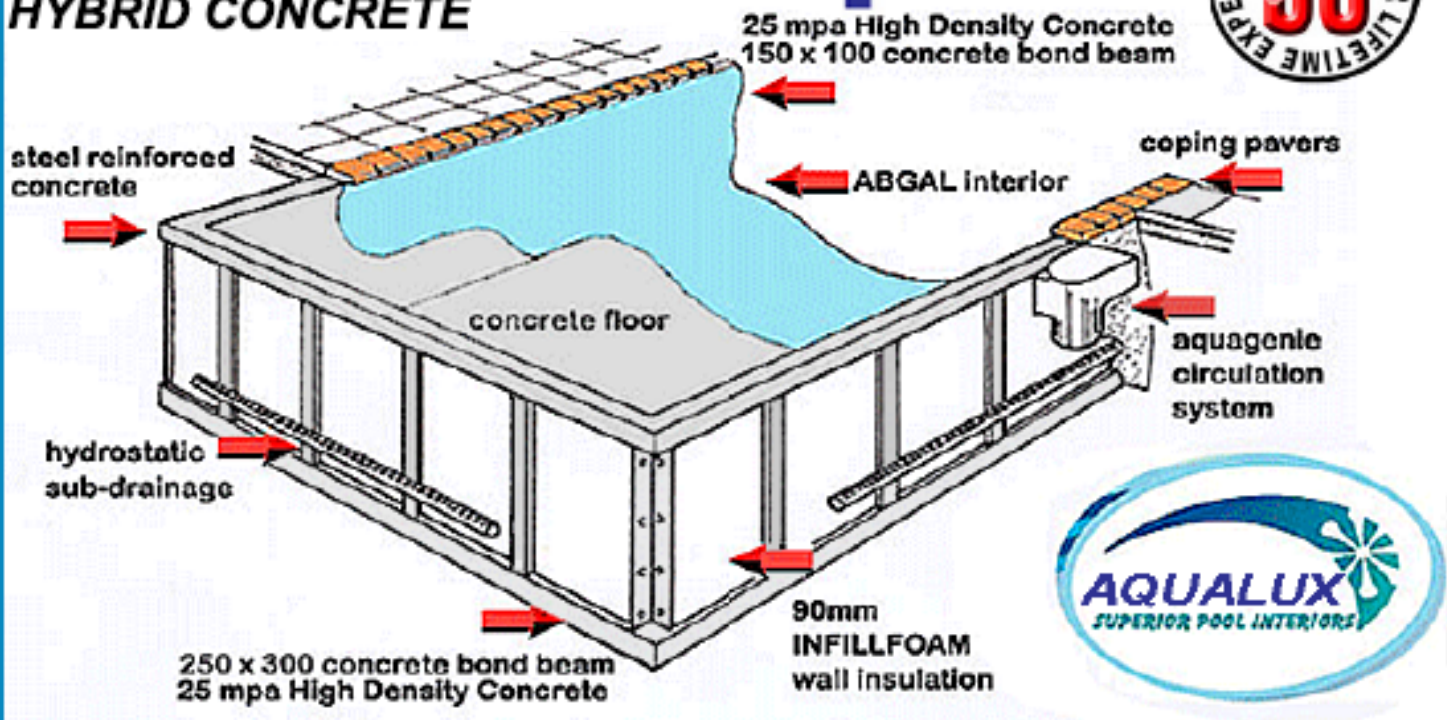

Interior: Our Embossed slip-proof and colourful pool interiors properly maintained in non-chlorine and correct chemical pools could retain a '**Lifetime Expectation**' of up to 35 years! A great selling point if you ever decide to move on - with still heaps of lifetime remaining!

EXPECT NOTHING LESS THAN A CASCADE FRESHWATER SWIMMING POOL!

FRESHWATER + aqualux

HYBRID CONCRETE

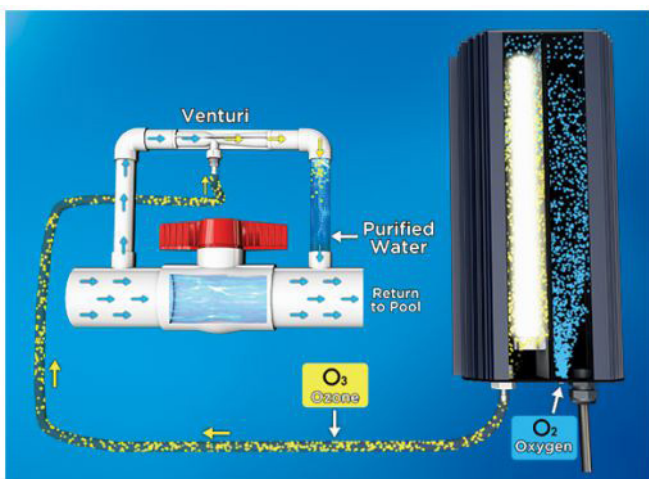

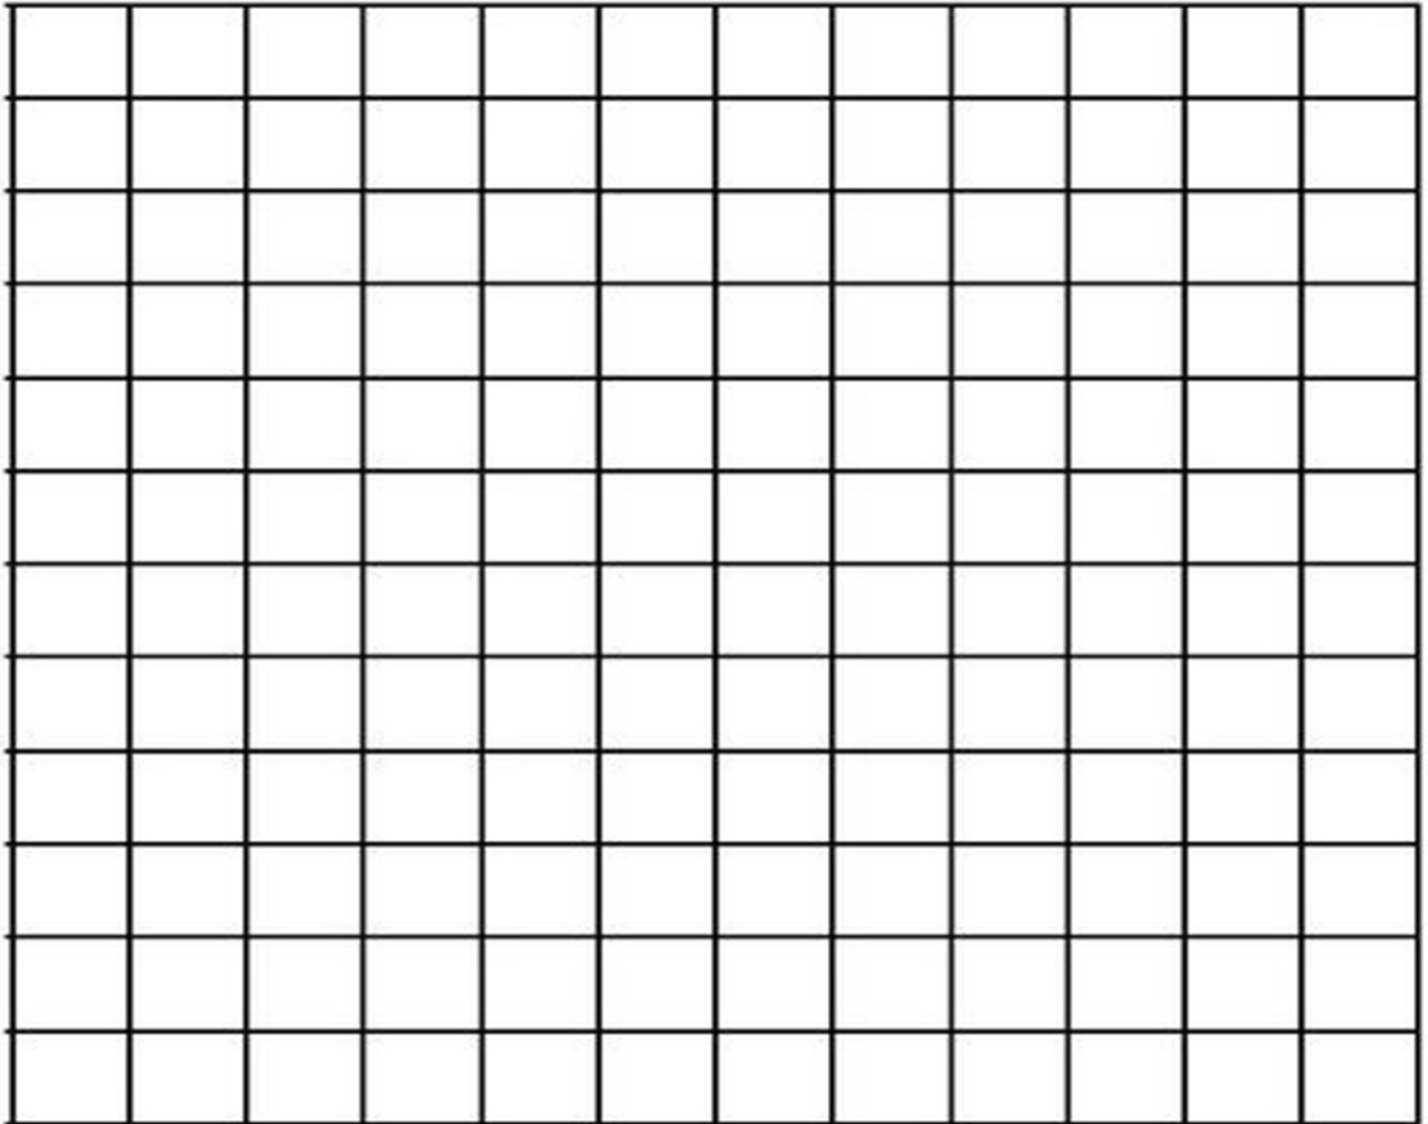

DESIGN YOUR OWN POOL

Use the grid below to design your own swimming pool.

Each square = 1 Square Meter

Because your pool should be a PLEASURE!

PLUNGE POOLS! *Use that Empty space ...*

Recent Government changes to the Building Code allow pools less than 35k litres to be installed without a Building Approval - just approved Pool Fencing.

These PLUNGE POOLS may seem small, but they retain all the features of our Cascade full-size swimming pools ...

And at Affordable Prices!

2.4 x 3.6

2.4 x 4.2

**Trendy Small pools
No Building Approvals
required - so rapid
installations ...**

2.4 x 4.8

2.4 x 12.0
All sizes inside wall to wall

Small pools ... Small prices!

CASCADE

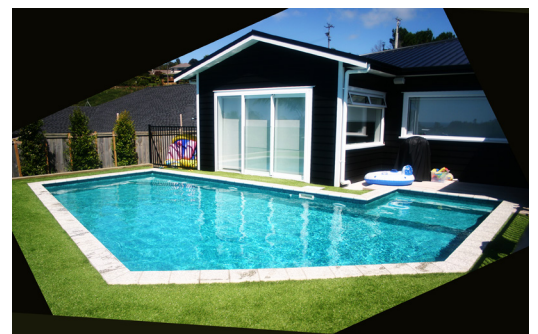

Why get a CASCADE Hybrid Construction pool?

Cascade is a New Zealand tradition - with more than 20,000 Kiwi Families enjoying their beautiful Cascade swimming pool!

- ✓ Minimal maintenance requirements
- ✓ Environmentally aware design years ahead of other pools
- ✓ INFILLFOAM Effectively creating a Solar Panel in your yard
- ✓ FRESHWATER pools with water good enough to drink!
- ✓ 100% Ozone - Total elimination of Germs and Bacteria
- ✓ Hybrid Concrete/PVC robust and long-lasting construction
- ✓ 30 year Interior Lifetime expectation with two day replacement

Tell us what you want, and we will build it!

- A NZ first! 'Free Solar Heated' swimming, recycled INFILLFOAM insulation, SUNTRAP solar bubble cover gives customers a warm, cheapest-to-heat and operate swimming pool
- 95% Chlorine-free Freshwater with Prozone sterilisation system - the process that in most areas sterilises your drinking water these days.
- Eliminate most pool chemicals, water so soft, safe and pure that you can actually drink it! No more 'stinging' eyes - and no 'Chlorine Smell' - ever!
- Rapid installation. Our average family size pool shell can be installed in less than a week - receiving the custom AQUALUX interior from Australia may take another two weeks cutting the overall waiting time from excavation to first swim by weeks!
- 50 Year Lifetime Expectation - and the longest lasting pool interior available - Twenty-five Year quality Lifetime on Aqualux colour range of interiors

WE BUILT OUR FIRST POOL IN
1971

 Easiest pool for an economical Heat Pump to maintain
 your pool at 28° for up-to eight-months swimming!

WHY DO WE RECOMMEND OZONE? BECAUSE CHLORINE STINKS!

World acknowledged Lenntech Laboratories Report
Ozone applications: Purifying Swimming pool water - "good enough to drink!"

Water quality can be **vastly improved and costs reduced** in the long term when Ozone is applied for swimming pool water treatment. Pool finishes will last longer, and maintenance reduced. (Lenntech direct quote!)

These are the main benefits of Pool Ozonisation (Also known in the USA as 'Activated Oxygen'):

1. Substantial decrease in chlorine use - tests show an up to 85% or more reduction.
2. Improves the filtration and coagulant (i.e. dirt trapping) capacities.
3. A reduction of coagulant use (less media changes) and less backwashing of the filter required
4. Water use will be decreased, because of an increase in water quality
5. Ozone oxidizes organic and inorganic matter in the water
6. No unwanted byproducts - such as chloramine gas (which create the "so called" Chlorine-smell ... it doesn't*)
7. Chloramine smells are fully diminished by ozone application. Chlorine is a colourless odourless chemical.

Ozone is a more powerful oxidant and disinfectant than Chlorine - removing 100% of germs, viruses and bacteria. Chlorine-resistant pathogens (Cryptosporidia, Giardia etc) cannot multiply in water that is treated with ozone

Swimming pool water pollution is mainly caused by swimmers. They create a very dynamic pollution, dependent on the number of swimmers. Swimming pool pollutants can be divided up into three groups: micro-organisms, undissolved pollutants and dissolved pollutants.

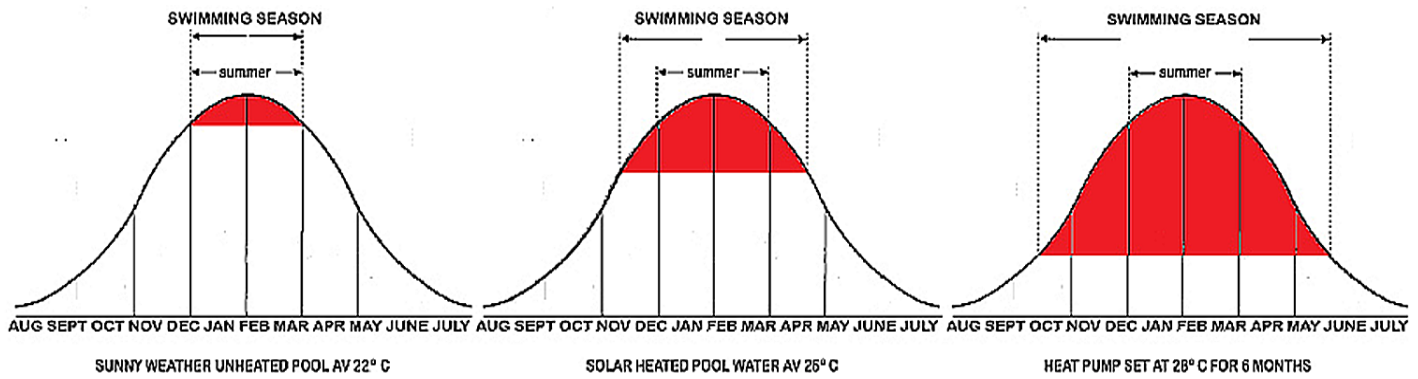

Each swimmer carries a large number of micro-organisms, such as bacteria, fungi and viruses. Many of these micro-organisms may be pathogenic and can cause disease. Undissolved pollutants mainly consist of visible floating particles, such as skin flakes and hair, but also of colloidal particles, such as skin tissues and soap remains.

Dissolved pollutants can consist of urine, sweat, eye fluids and saliva. Sweat and urine contain water, but also ammonia, ureum, creatine, creatinine and amino acids. When these substances are dissolved in water, they cannot harm swimmers, however, when these compounds react with chlorine in swimming pool water, incomplete oxidation can cause chloramine formation.

This causes the so-called "chlorine-smell", which irritates the eyes and respiratory system. In a number of cases, stable compounds can be formed, which can only be removed from swimming pool water by water refreshment (ie partially empty and refill the pool several times).

Because of its strong oxidation and disinfection mechanism, Ozone is recommended for home swimming pool water treatment, less costly than chlorine to maintain a safe swimming environment for your family.

YOUR NEW SWIMMING POOL IS A BIG INVESTMENT!

DO YOU WANT TO SWIM IN COLD WATER? ... NOT IF IT'S A CASCADE POOL!

The actual Auckland seasonal Bell Curves above (provided by friends of the Auckland University Science Faculty) shows the potential comfortable temperature (28°) you should get from your new pool, with annual Auckland temperatures ranging from 5° C to 28° C

CASCADE'S USE OF POOL WALL INSULATION AND SOLAR BLANKET WILL DO THIS!

Pool temperatures generally follow the air temperature - but lag behind 10 or 15 days: If we have a 'warm spell' of 28° C for two weeks, the pool will eventually 'catch up'. A 'nice' swimming pool temperature is 28° C.

An unheated pool will follow the average air temperature for only a few months each year - usually January to March - so to enjoy an extended swimming season you should set your Heat Pump for 28° C. Cascade's INFILLFOAM insulation and SUNTRAP cover means you will be able to utilise the smaller, less costly-to-run Heat Pump than other pools need.

- Solar Heat is a great source of pool heat, and your FRESHWATER pool takes full advantage of this with INFILLFOAM Insulation in the walls and Solar Bubble Pool Cover giving up to 4° to 6° degree cumulative boost per day when left on in sunlight hours when not swimming, and used overnight to reduce the pool cooling to as little as 1° C.
- Your Heat Pump is the best method of extracting 'Free Heat' from the Sun by using ambient air temperature to extract heat - even when the sun is not shining. It converts '*input to output*' at a 4:1 or more ratio: 2Kw in becomes 8Kw in heating ability! Set the thermostat in early Spring (when daily air temperature is >20°) and enjoy pre-Christmas swims.
- Cascade FRESHWATER pools with INFILLFOAM pool wall insulation cuts heating cost by up to 80%, and the Bubble Cover adds heat during sunny days, and retains heat at night! Your Heat Pump with a + 10° range will reliably convert the pool to a comfortable 28° and the Bubble cover eliminates up to 92% of heat loss in the cooler night air! in the heat of Summer - the Heat Pump will not need to come on at all!

ENJOY THE USE OF YOUR SOLAR HEATED CASCADE POOL AS MUCH AS POSSIBLE!

Your Family Health & Lifestyle improves, and your kids will love you for it!

cascade

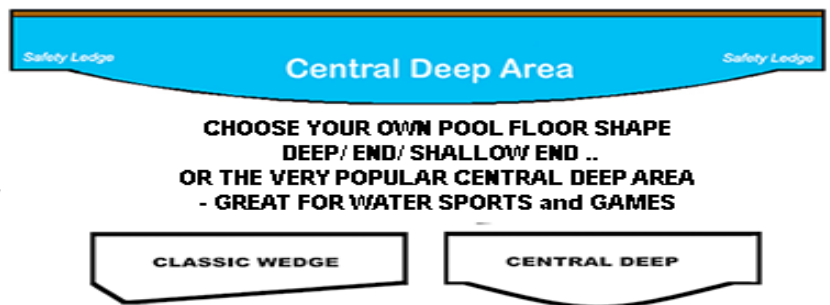

stay cool - in your FRESHWATER Cascade Pool

Enjoy our bespoke, easily cared-for pool BUILT specially for your family! With **INFILLFOAM** wall insulation for a warmer pool than your neighbour's! Our Solar Design traps the **FREE SOLAR HEAT** for extended swimming! Enjoy our Chlorine-Free swimming pools - with no Salt or Chlorine taste or Smell!

More than FIFTY YEARS ago, we built our first Classic Pool, and today you can benefit from our history with this multi-generation family-owned swimming pool company. Our combination of high-strength hybrid concrete structures with flexible Aqualux Interiors are crack resistant in unstable ground and proven to hold water even in earthquakes!

We build pools our customers want: Use the DESIGN SHEET on the front inside cover. Why go with traditional "deep end - shallow end" design - it's not the safest type of pool design. A Central Deep with Shallow sides and ends is a far safer design for young children - yet many pool companies force you to go with what suites THEM and not YOU! Think about Cascade's ability to make your pool a safer, FAR more child- child-friendly swimming pool design - like this:

*Now your kids can play pool games with no disadvantage of them having to take turns in sharing the deep end in a game of Volley Ball ...--
- not very convenient for the smaller kids! And - they can dive into the pool from any side or end! No more yelling "Keep away from there - that's the deep end" to the children.*

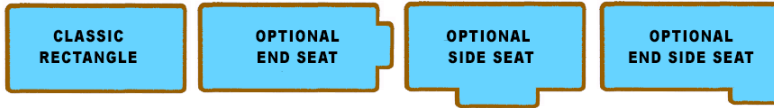

WARM WATER ADVANTAGE: CASCADE'S NZ Building Code approved insulation FRESHWATER Structural Hybrid design is New Zealand's biggest seller of Environmentally sound Chemical-Free swimming pools - using FREE Solar heat from the Sun, for extended season Chlorine-Free swimming!

BEEN THINKING ABOUT A POOL? - ACT NOW if you want to swim NEXT SUMMER!

The swimming pool industry is very busy: don't miss out! Average of FIVE DAYS from excavation to concrete shell installation! T&C
