

ALIQUANTUM

## ALFRESCO & ENTERTAINING

Aliquantum produces a range of stainless steel and timber products that are primarily designed for the modern "Alfresco" living area. The products are also well suited for restaurants, hotels and pubs. Our products are designed to appeal aesthetically as well as to perform in outdoor, covered outdoor and indoor areas.

Our product combines the warmth of timber with the sleek coolness of stainless steel. Whether you are after a mostly timber or a mostly stainless steel solution, Aliquantum's furnishings can be customized to suit your needs. The quantity of timber in relation to stainless steel is really quite subjective. We will work with you to achieve a design that suits your tastes and will add style to your home or alfresco area.

Aliquantum uses quality timbers including Jarrah, Merbau, and Pacific teak. Much of the jarrah is recycled from Aliquantum's balustrade business unit. We also work with other timbers Oak, mahogany or Walnut on request. All our timber is hand selected and sourced from **responsible** timber suppliers. Any suppliers operating unsustainable harvesting techniques are ignored.

So please, add a touch of elegance with an Aliquantum setting.

## **DINING TABLES and SETTINGS.**

At Aliquantum, we have designed a range of dining tables that fully exploit the social dining experience. Our bar height tables are extraordinarily good at bringing people together in a social setting. The height of the table combined with stance of the bar chair results a place where people can sit and talk for hours without those back pain moments.

We also make standard height tables for the more traditional home. You chose whether you wish to use bench seats or individual chairs. We will work with you to get the designs you require.

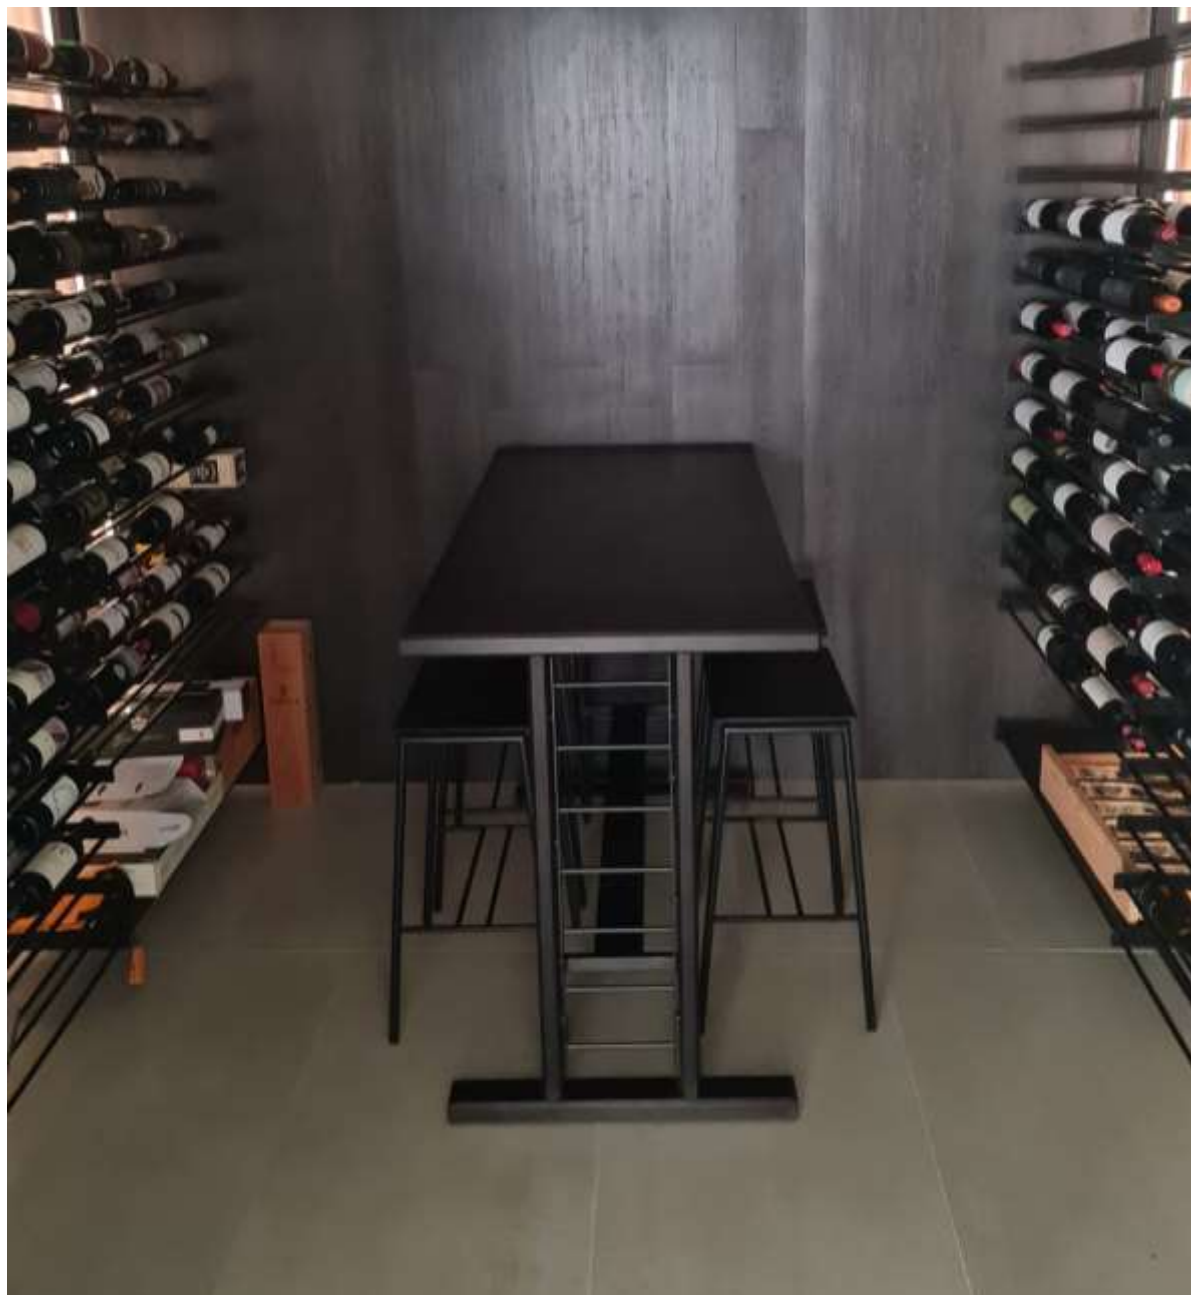

## SEATING.

Our range of seating options suit a wide range of uses such as the more upright positions (alfresco dining, indoor dining, waiting rooms/executive suites), easy comfort seating for your own home (Indoor and outdoor) and the more decadent day bed seating.

## ACCESSORIES & KNICK KNACKS.

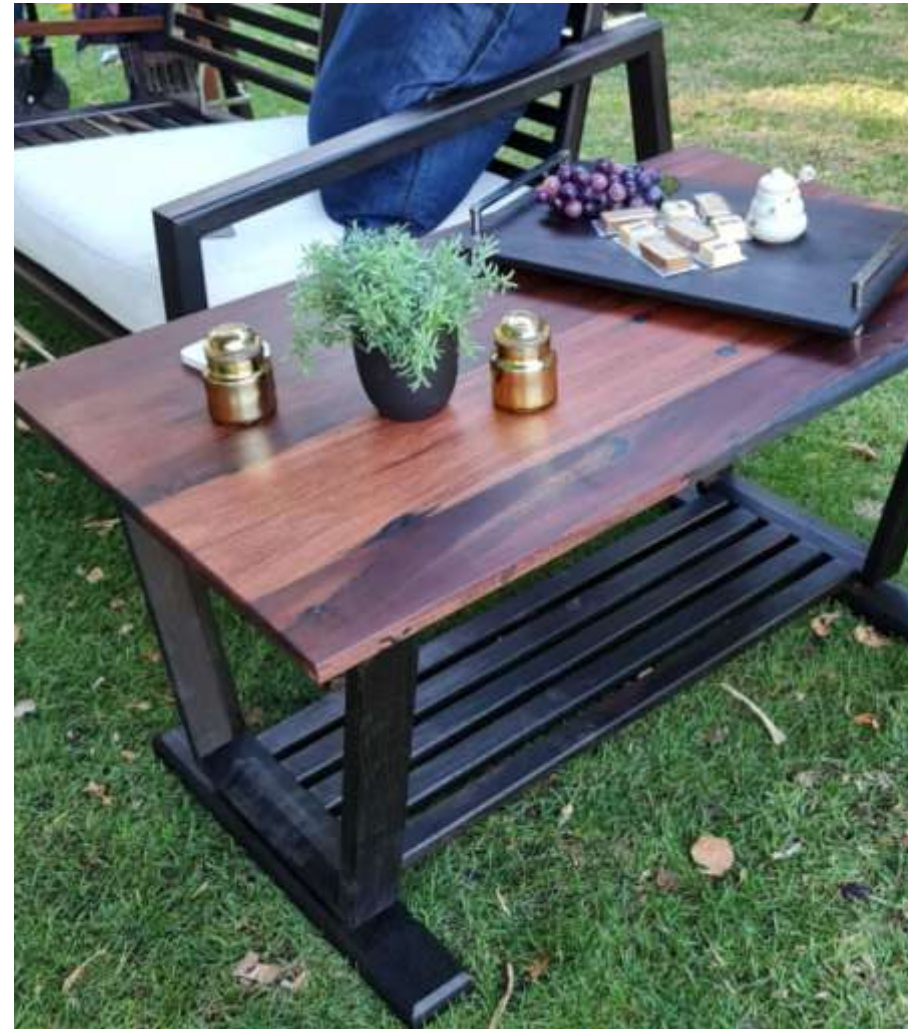

At Aliquantum, we love making furniture from the timber we harvest from our balustrade division. But there is nothing more satisfying than making useful yet attractive knick-knacks from sections of timber that are unsuited to furniture making but are too good to be thrown away. These are selection of products that we fabricate for our customers.
