

DEVIwarranty™ is a series of five individual, best-in-market warranties to give you full peace of mind while using DEVI products in electric heating systems.

DEVIwarranty™ For all Electric Heating products, we provide two warranty types: Product warranty and Full-service warranty.

The Product warranty is valid for the agreed warranty period that may vary from 2 up to 20 years depending on different product types.

The Full-service warranty is valid for resistive ready-made heating cables and mats.

Electric underfloor heating is a major opportunity for Europe. This can play a significant role in helping Europe reduce emissions, increase energy efficiency in buildings, and ultimately enable Europe to meet its ambitious climate targets.

The future is electric – get ready to a new journey

Electric Heating Cable Solutions

Intelligent solutions
with lasting effect
devi.com

For 80 years our solutions for Outdoor safety and Indoor comfort have been improving the quality of people's lives! We celebrate our jubilee as we get ready for a new journey to improve the life of future generations backed by 80 years of experience.

Why is **Electric Heating** Energy Efficient and Environmentally Friendly

- **Comfortable room temperature with the lowest possible energy consumption:** energy losses are reduced by up to 20%
- **Highest heat efficiency:** 99% of the energy emitted is converted into heat
- **Fast reaction of a system:** heating and energy are spent only when needed
- **Independent control of temperature regulation:** high level of user independence from part to total
- **Exceptionally high level of energy utilization:** you can safely reduce the temperature and with that - the energy consumption
- **Environmental friendliness:** no use of harmful substances
Ideal heating system for an ideal world (increased use of renewables to reduce emissions)

Comfort Solutions by Electric Heating to enable great indoor atmosphere

- Easy and quick installation
- Quick responding floor heating
- Invisible heat source
- High durability, no maintenance
- Long life-time with up to 20-year full warranty

Safety Solutions by Electric Heating to keep roofs and surfaces dry

- Efficient snow removal - area is kept free from ice and snow 24/7
- Safe traffic and working areas for people
- A maintenance free system with 20-year full warranty on cables
- Smart 2-zone control with low energy consumption
- Keeping pipes and equipment safe
- Avoiding unforeseen repair costs after winter
- Reduces the risk of roof collapse due to extra snow loads

Electric heating systems are used for:

- Multifamily houses
- Single family houses
- Low energy buildings
- Airports and heliports
- Vineyards and agriculture
- Marine and Transport
- Hotels and commercial buildings
- Stadiums
