

Potting Mix 6L & 3L

Best for: potting up indoor plants.
Use: when potting up new plants.

Created specifically for indoor plants,
our potting mix is:

- Specifically graded coir
- Open organic substrate including perlite.
- With zeolite and primary and trace elements
- Three forms of controlled release fertiliser feeding up to 9 months.

The perfect balance, our mix is moist enough to prevent drying out in warmer conditions and reduces the issues caused by fungal disease.

About Our Company

We are a family-owned, small business that are cray plant lovers, passionately specialising in plant care products for your plants. We have over 28 years experience in horticulture and aim to provide the best products, customer service and advice to our customers.

Our plant care range works in unison together to enable the best possible way of delivering nutrients to the plant. Whether it goes directly through the stomata of the leaf, or by activating the soil through soil biology. We know how plants work and we know what the best solution is to allow your plants to perform at optimum levels to help them remain healthier and stronger for longer!

Plant Co.

A plant care range
suitable for all your
plant care needs!

Soil Activator

Best For: Potting Soil & garden beds
Use: Every 2 - 4 weeks

Full of naturally occurring organisms, our beneficial bacteria plant food can fuel and enhance plant and performance!

- Increases available nutrients in the soil
- Improves plant vigor and restores soil fertility
- Enhances root development
- Adds and stimulates beneficial soil biology
- Reduces crop water stress
- Reduces fertiliser leaching and runoff

Controlled Release Fertiliser

Best for: Indoor pots and planters
Use: Every 3-4 months at the beginning of each season.

Tailor made to the growth cycle of plants, our controlled release fertiliser is a perfect blend to keep your indoor and patio plants healthy during any season!

As a balanced premium controlled release fertiliser, this is high in nitrogen and utilises polymer technology

Indoor Plant Food Foliar Spray

Best for: Indoor plants
Use: Every 7-14 days during active periods of growth or when required.
