# ABOUT US

*We are now living in a high speed, high tech world. With huge furniture made of engineering timber, steel and glass, it can sometimes feel like we've completely rejected the natural world. What could be more inspiring and uplifting than dining or meeting around a cross section of a tree?*

*A touch of live edge wood gives a natural atmosphere to a room while also providing a rustic, homely feel.*

*"Bring the nature into your home" – This is our company slogan Natural Timber Stone will bring the nature into your home.*

*Natural Timber Stone furniture handcrafts beautiful live edge tables from a variety of wood slabs. We try to keep it as much natural as possible. Live edge tables have their own character and patterns and are completely unique, no table is alike even if the slab comes from the same tree.*

*We supply to you very unique, special and different home décor products.*

*We guarantee that you will not be able to find another product that looks identical to the one you purchase from us.*

*All our products are made from natural hard wood and individually handcrafted by artisans and after a very-consuming grinding, polishing process the raw wood pieces are turned into a piece of artwork infused with the skill and soul of artisans who create them.*

*Each product that we provide is a separate individual piece with its heart nurtured and formed by mother nature – which is then taken by artisans who add their soul to grind and polish it by hand to form a beautiful piece of functional artwork without losing any of the original natural qualities that nature provided.*

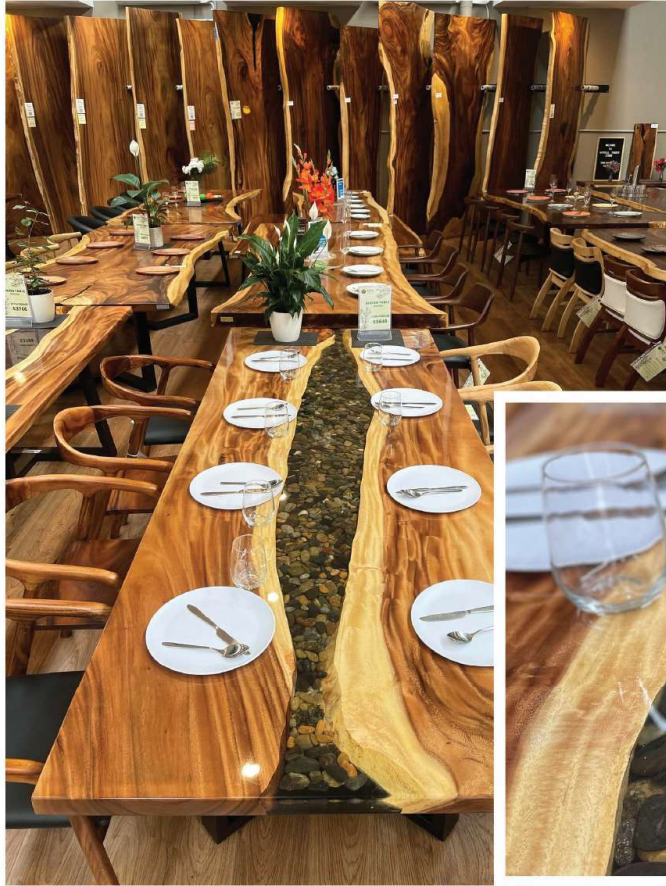

*Each unique artwork brings joy and happiness as well as an overwhelming sense of pride in its creation for artisans like us.*

# COMMITMENT

*“Our products are affordable, sustainable furniture and proudly 100% one-piece timber.”*

*Tabletops are made from a base of kiln dried timber fibre which has been treated so that it will not rot or mould and then mixed with epoxy resin. The top is compressed and shaped under very high pressure; decorative sheets are added.*

*Several layers of epoxy resin create an effect of a river between two lands. These unique design features will become a perfect highlight of your interior.*

# Live Edge Table

- Product Type: Live Edge Dining Table
- Using: dining table, meeting table, reception table,...
