

AUGUSTA[®]
ZOYSIA LAWN

NEW Augusta Zoysia Lawn. A revolutionary golf course turf grass now available for your lawn! If you are looking for the very best lawn then an Augusta Zoysia Lawn is for you. Augusta Zoysia is fine and soft, yet tough and low maintenance, with amazing 'Eye Appeal'. A beautiful dark green colour, fine leaf which is soft to the touch, high shade tolerance of over 75% and up to 50% less mowing. High heat and drought tolerance. Uses up to 40% less water and fertiliser.

EMPIRE
ZOYSIA[®]

Empire Zoysia really is 'The Dream Lawn'. PBR Protected so only licensed breeders can grow this amazing lawn variety. A luscious dark green colour. Medium leaf blades, soft to the touch. Semi shade tolerant only requiring 4-5 hours full sun per day. One of the most drought tolerant turf varieties. Grows well in clay and sandy soil areas. High salt tolerance. Good resistance to weeds, insects and diseases. Ideal for residential, commercial, sports and public areas.

Nara[™]
NATIVE ZOYSIA

Nara Native Zoysia is Australia's most beautiful native lawn. Highly drought tolerant. Evergreen winter and summer. Slow growing and low maintenance. Nara Native Zoysia is a great all-rounder that is able to grow extremely well under harsh conditions, yet looks and feels amazing. Being an Australian Native plant, Nara Native Zoysia is able to cope with dry, hot and humid conditions with ease. Ideal for residential, commercial, sports and public areas.

Palmetto[®]
SOFT LEAF BUFFALO

Palmetto Soft Leaf Buffalo is The #1 selling brand of buffalo grass in the World. Palmetto has a very soft leaf, great shade tolerance, outstanding Winter colour, great at out-competing weeds, low allergenic, less thatch, less mowing, disease and pest tolerance and good wear recovery. Most people want a lawn that they can simply mow, fertilise once or twice a year and still have it looking great all the time.

Prestige[®]
Darkest Green Buffalo

Prestige Darkest Green Buffalo is the right choice if you desire the darkest green lawn. It's the next generation buffalo grass which has amazing shade tolerance and maintains its lush dark green colour throughout Winter. Very strong and durable, High shade tolerance, Recovers well and fast after damage, High level of weed resistance, Low thatching.

Sapphire[®]
SOFT LEAF BUFFALO
Stenolaphrum secundatum B12 (1)

Sapphire Soft Leaf Buffalo is the only finer textured buffalo in the world that has a shade tolerance of 70% each day which makes for a perfect lawn. Generally, Sapphire is a mow and grow grass that requires little work. With a luscious deep green colour and a tinge of blue (sapphire), it's sure to make your lawn stand out from the rest on the street. Colour is maintained throughout the Winter months also providing your lawn has been fertilised.

SIR WALTER BUFFALO GRASS

Sir Walter Buffalo Turf is a deep green colour with Broad leaf blades and soft to the touch. Excellent shade tolerance only requiring 2 to 3 hours full sun per day. High drought tolerance and wear tolerance. Non-allergenic. Ideal for home, commercial and public areas.

OZTUFF Australian Couch

Oz Tuff Australian Sports Couch is a high quality but low cost turf grass. It can be used for many different applications including domestic lawns, parks and community and elite sporting fields and ovals. Deep green colour. Fine leaf blades, soft to the touch. Not very shade tolerant, needs to be in full sun areas, requiring 7-8 hours full sun per day. High drought tolerance. High wear tolerance. Salt tolerance. High maintenance.

AgriDark Premium Sports Turf

AgriDark Premium Sports Turf Sporting fields/stadiums, cricket wickets and households. Mow to 20mm-35mm. Suitable for cylinder mowing. Low water requirements compared to other sports couches. Dark green colour all year round. Excellent wear tolerance, however if signs of wear become apparent, it will repair itself quickly.

WINTERGREEN COUCH GRASS

Wintergreen Couch is the industry standard in couch lawns. Lush green colour. Fine leaf blades, soft to the touch. Not very shade tolerant, needs to be in full sun areas, requiring 7-8 hours full sun per day. High drought tolerance and wear tolerance. Ideal for residential, commercial and public areas.
