TAPWARE COLLECTION

# TAPWARE MADE FOR NEW ZEALAND

50 YEARS  
FORENO.

Foreno is proud to be celebrating half a century of creating quality water fixtures for New Zealand homes and businesses, which we think is an achievement to make a 'splash' about.

To mark this significant milestone and to salute our Northland heritage, we have launched a 50th anniversary tribute collection, 'North' – inspired by the late Geoff Pearson who founded the Foreno brand in Whangarei, where it remains to this day.

New Zealand owned and operated, Foreno products are engineered to excel in our uniquely challenging conditions, including options for those on low and unequal water pressure systems. Our tapware is also affordable, easy to install, and well-constructed.

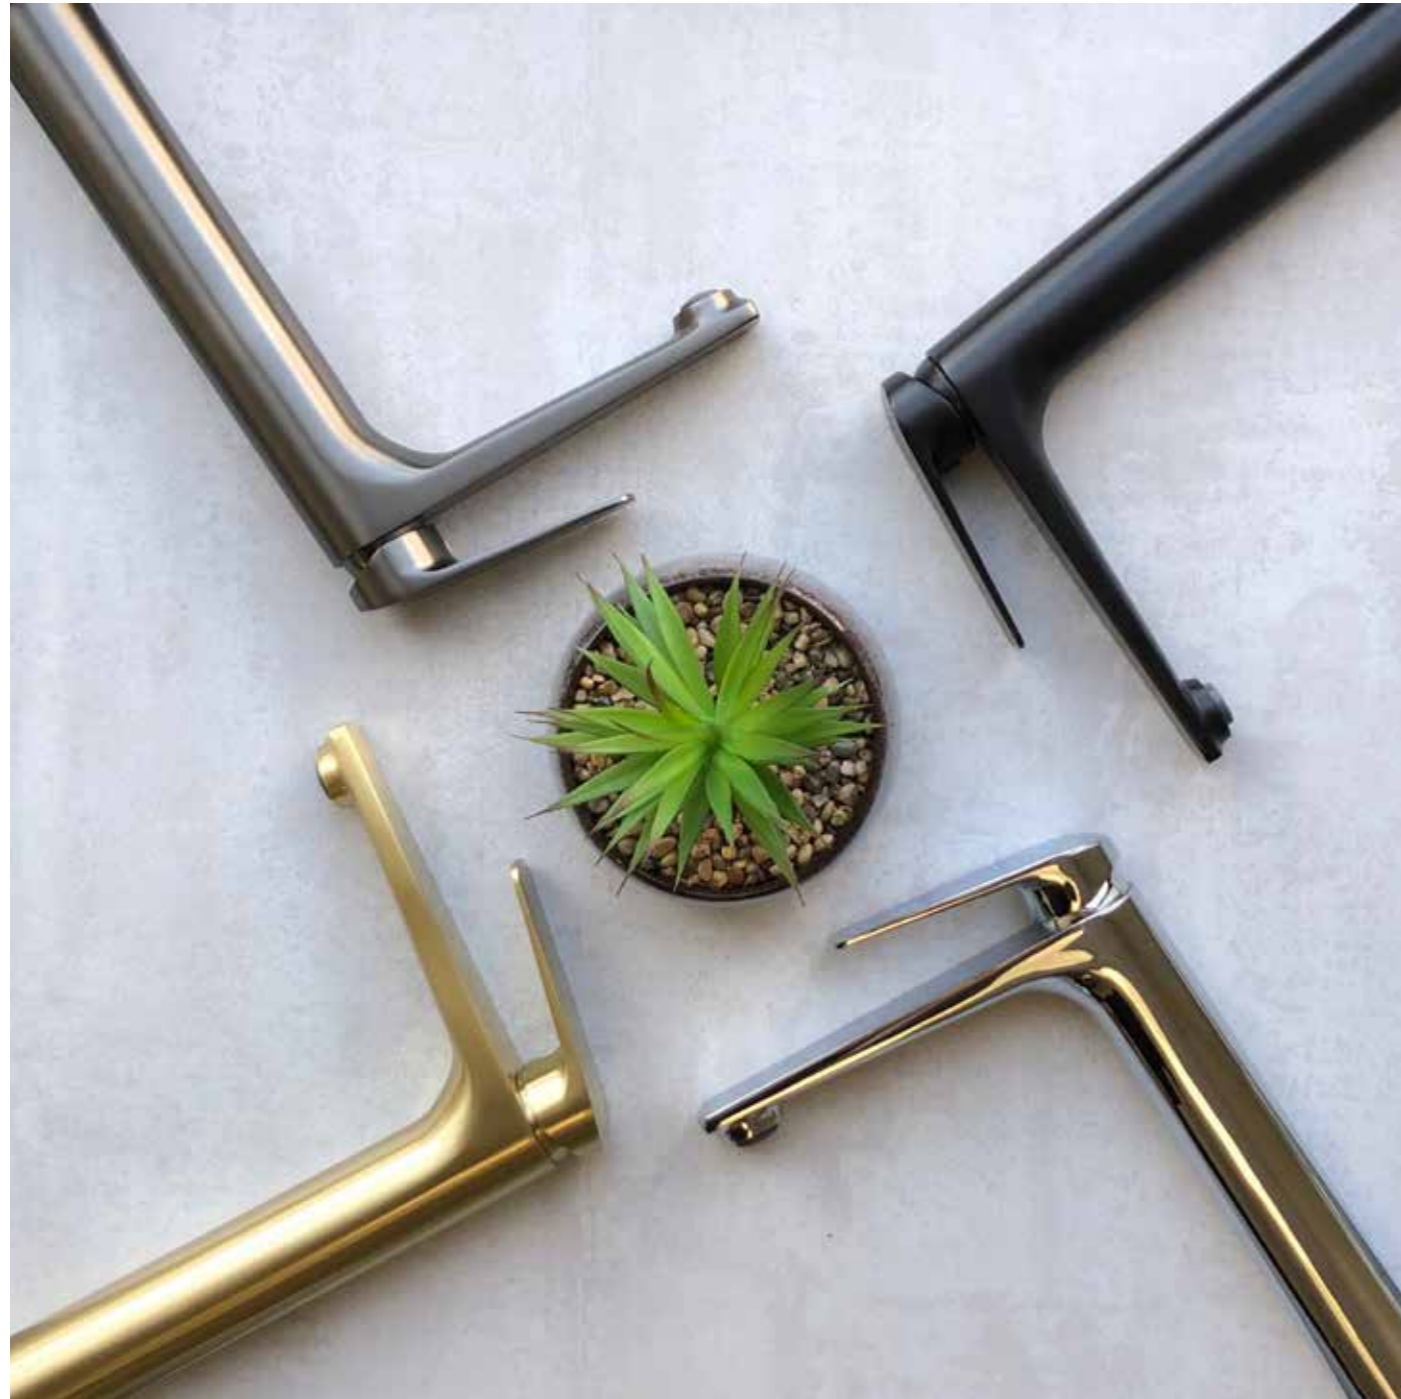

We design for New Zealanders, and have a tapware solution for everyone – from plumbing professionals to the DIY enthusiast.

All of our products are 100% tested before they leave the factory and are backed by industry leading warranties and customer support for that extra piece of mind.

From the Foreno team, thank you for your support and we look forward to another 50 years of tapware – Made for New Zealand.

# How to determine your water pressure type:

Water pressure systems vary throughout New Zealand, so it is important that you select the correct tapware for your home.

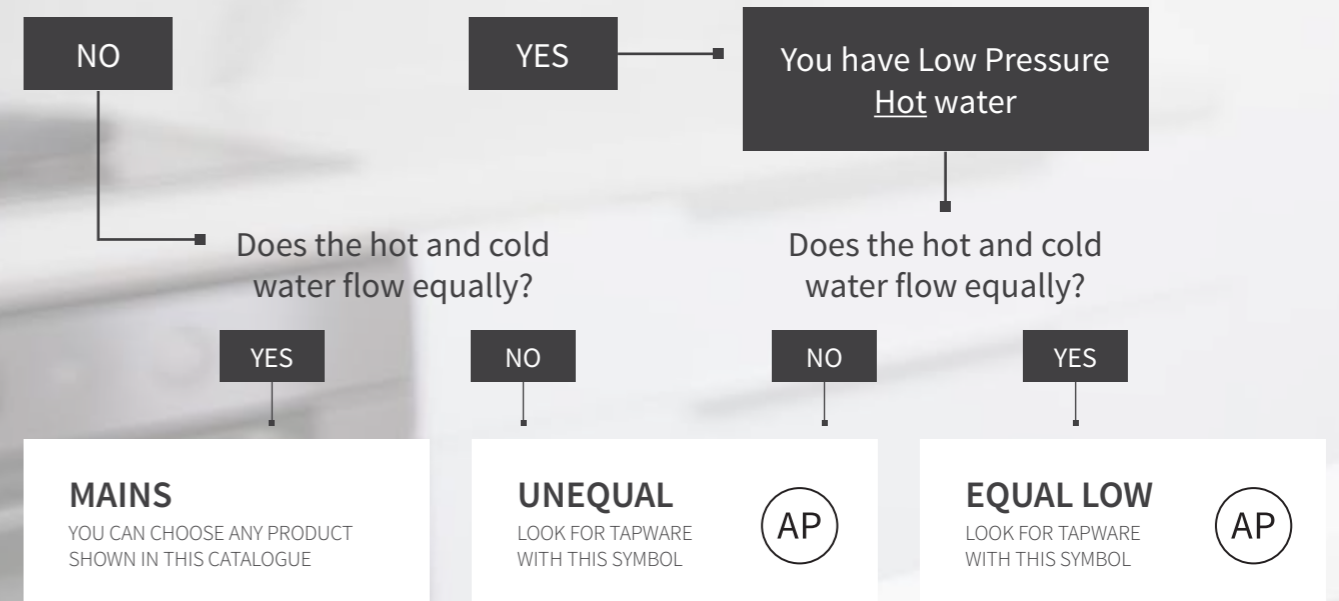

## THERE ARE 3 PRESSURE TYPES:

- Mains - above 150kPa
- Unequal (Mains and Low)
- Equal Low

While most of our products have been designed to operate on all pressures, some do require Mains Pressure to operate efficiently.

## IDENTIFYING YOUR WATER PRESSURE TYPE:

Do you have a copper pipe protruding from your roof?

If you are still not sure, please talk to your Plumber.

### #PROTIP

If you have **very low water pressure** (<35 kPa) look for products with this graphic:
