

## WHO WE ARE

Beams Co. was founded in 2020 by Herman, Sharon and Chamani Wong. The journey started when Herman was recovering from heart surgery and the trio decided to create a health & wellness brand that encourages everyone to take control of their own health.

## OUR MISSION

Switching on the genes for health and turning off the genes for disease.

Our mission is to kickstart everyone's day and help them live an energy-filled healthy life with coffee enhanced with natural plant-based ingredients.

## SUSTAINABILITY

We want to inspire people to feel good through conscious choices. We design eco-friendly products that don't compromise on quality and without the expense of our own environment.
