Opening Louvre

Why should you wait for good weather to enjoy your outdoor space? Our opening louvre roofs are designed to be enjoyed all year round. You can create a haven in your own backyard, a place to relax, entertain, and connect with nature regardless of the season.

The Ultimate Opening Roof creates a visually stunning and functional outdoor living area all year round. Whether it is a flat or gabled roof, you can design an Ultimate Opening Roof to suit the personal style of your home.

Highlights

- Our beams support a 6m span between posts, minimizing the impact on your view.
- Free standing or fixed to house, our structural frame provides clean, aesthetically pleasing lines and with regular cleaning, are virtually maintenance free. They are also designed to incorporate wall in-fills such as outdoor blinds.
- 180 degree louvre blade rotation – effective sun blockage or maximisation all day long.
- Fully automated and operated off remote control
- Rain sensor come as standard with all opening roofs. Our rain sensor will automatically reopen after rain stops to 30 degrees for water to drain off the roof.

Comfort Control

Summer or Winter – The Ultimate Opening Louvre provides the best of both worlds!

In summer, block out the heat and keep cooling costs down by simply closing the roof or opening it partially for shaded ventilation. The Ultimate Louvre provides control over the amount of shade you need. For those with sensitive skin or those concerned about health risks due to sun exposure, the Ultimate Louvre is the perfect answer – full light can be enjoyed without direct sunlight.

During the summer months a place is often sought providing shade from the sun's heat with cool ventilation. The Ultimate Louvre offers a solution, as natural convection draws the warm air up through the open louvres to give you cooling breezes below.

In winter the slim line louvres can be positioned to allow the sun's natural warmth and light into spaces. The push of a button allows you to control the light needed to create the right atmosphere. The Ultimate Opening Louvre Roof has a uniquely designed louvre that provides a complete overlap and maximum rain protection. In light rain the louvres can even be left partially open and the water will drain away in the contours of the louvre.

Ultimate Glazed

For those looking for a modern and contemporary roof that still allows the daylight our Ultimate Glaze is a very cost effective polycarbonate roofing system.

Ultimate Glaze offers 99.9% UV protection and is extruded with an industry leading thickness of 2mm.
