

# FREQUENTLY ASKED QUESTIONS

[www.lerasmarthomes.com.au](http://www.lerasmarthomes.com.au)

## What defines a "smart" home?

A home that offers the residents effortless and intuitive control over their entire living environment via connected technology.

## What are benefits of having a smart home?

In a nutshell, smart home offers convenience, energy efficiency and peace of mind. In an age when we are busier and more time-poor than ever before, the convenience and ease smart homes offer are qualities that more people seek.

## How can we make our homes smarter?

Consider the features you need and actions you would like your home to perform, then ensure you get the basics right by choosing the best technology and platform to build off. Remember, the aim of smart home is to make your living environment more intuitive. Not all smart devices communicate in the same way, so the system you choose needs to be flexible and compatible with different types of manufacturers and devices.

## What are some common misconceptions about smart homes?

We hear that smart homes are a gimmick that makes us lazy – that was probably a common sentiment when the car first came on the scene, too. Just like the automobile, the smart home isn't about laziness, it's about creating efficiency within our busy lives.

## Live Smart.

With a LERA installed Smart Home, have total control of your domain and be safer and more comfortable.
