

*All pools are personalised to each customer, every pool individually designed because after all, everyone is unique.*

***Precision Pools is a family owned & operated Company, with thousands of pools built by its Directors.***

Knowledge & imagination are key concepts in the design & construction for your dream pool, there are no limits & endless possibilities when it comes to creating your own personal relaxation haven.

Our goal is to build for you the ultimate pool that both compliments your home & that will also suit your budget, giving you the perfect lifestyle change you have earned.

Precision Pools believes in keeping up with the times & moving forward in technologies & environmental ideals, we have taken the necessary steps in providing you with all the latest Eco friendly high quality filtration equipment. 'Harnessing Natures Properties' Water, Minerals & Sunlight which will leave you feeling rejuvenated & balanced.

Each precision pool comes with master builders contract insurance, to ease your mind during construction. We will personally guide you through the process by supervising each stage of your pool. At Precision Pools we consider precise supervision to be very important, as this will ensure that each product & process will maintain the highest quality in Construction services.

At completion of your pool we will make sure your pool is in perfect working order & you are fully educated in its operating & maintenance, so that you are confident & ready to splash in to your very own Precision Pool.

***Initial stages after signing with Precision Pools are as follows -***

- Your own personal design & house plan are sent to an engineer for steel specifications & design.
- After your plans have returned from the engineer, fully certified, we can then commence construction.
- Your pool will then be marked out by your supervisor & formwork will then be erected to shape ready for excavation .
- Reinforced Steel will then be placed within the excavation to engineers specifications, All internal plumbing work will be done during this process.
- Your pool will then be inspected by the engineer & signed off ready for concrete.
- The concrete will then be sprayed in & moulded to the required shape.
- All external plumbing work will then be traced back to your filtration location.
- All coping, tiles or tilebands will then be laid.
- Followed by the installation of your filtration equipment.
- Once your fences are up & have been inspected, we are ready to spray your pool with pebblecrete giving you a silky smooth interior.
- Now you're ready to fill!
