TRANSFORM YOUR SPACE FOR LESS

Australian Made Cabinetry

- All cabinetry is fabricated locally in Sydney to Australian standards
- MODULR+ cabinetry is Australian Made certified

Easily customisable

- Our versatile cabinets can be used in kitchens, laundries, bathrooms, outdoor kitchens, wardrobes, offices and more!
- Make your space your own with customisable finishes and accessories - the possibilities are endless

Speedy Delivery Timeframes

- Thanks to our unique Titusonic® assembly technology, we can turn around whole kitchen orders in just 10 business days
- We also ship all over Australia, so you can get your order delivered anywhere in the country

Upfront Online Pricing

- Budgeting is crucial for any build or renovation, so we've taken the guesswork out with our live upfront pricing - available online 24/7 for all of our products including cabinetry
- Plus, create an online account to save quotes and projects so you can cost up different options

Powered by Titusonic®

Powered by Titusonic®

- MODULR+ is the world's first and only ultrasonic welded cabinet system
- We use the European-engineered Titusonic® ultrasonic fastening technology to assemble cabinets with a completely glueless process that is quicker, cleaner and stronger than traditional joinery methods

High Quality Inclusions

- All MODULR+ cabinetry comes with lifetime guaranteed European soft-close drawers and hinges included as standard
- MODULR+ doors and panels use a recycled PET foil to create our OptiMatt Matt OptiGlaze Gloss and OptiGrain Textured Woodgrain finishes for a safer, more sustainable decor product

CREATE YOUR SANCTUARY

MODULR+ has a comprehensive range of vanity solutions to elevate every bathroom. Whether your focus is family-friendly storage or a luxury spa aesthetic (or both!), we have something to suit. Scan the QR code opposite to browse our freestanding vanities, floating vanities and shaving cabinets, and choose from standard flat doors, sharknose profile doors or shaker profiles - available in our full range of OptiBoard PET matt, gloss and textured woodgrain finishes! PLUS use promo code **SAVEHS24** for further savings.

MORE THAN JUST KITCHENS

Our cabinets (and our Kitchen Builder) can be used for more than just kitchens. In fact, we even have a range of accessories to suit other areas of the home, such as our laundry hampers and appliances. Our solid-back cabinet configurations offer versatility for laundry, wardrobe and entertainment unit applications, with options for wall, tower and freestanding base units, as well as custom-fit panels.

For more information, check out our Inspiration Gallery online!

A QUICK GUIDE TO BENCHTOPS

Choosing the right benchtop has become a complicated process. One benefit of the MODULR+ system is that you're not locked into any one option - you can order a made to measure Standard Laminate or Compact benchtop from us, but if you want to supply your own, that's fine too! Likewise, you can order a pre-sized engineered stone top for any of our vanities or ALFRESCO+ outdoor kitchens, but you could also source an alternative elsewhere. We import the stone for our vanities and ALFRESCO+ components pre-sized to minimise cutting but we always recommend a qualified tradesperson wet cut any holes required for sinks and taps using the appropriate safety wear.

Natural Stone eg. Granite or Marble	Porcelain	Wood	Standard Laminate	Compact

GETTING STARTED

It can be daunting embarking on a journey to your dream kitchen and knowing where to start can sometimes be the hardest part. Here are a few quick tips to get you headed in the right direction. You can also find tons of **helpful resources** on our website - including our **downloadable budget planner!** Visit www.modulr.com.au/resources for more info.

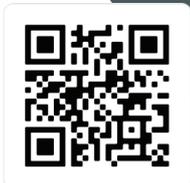

CHOOSING YOUR LAYOUT

Layout is the very first thing you need to consider when building or renovating a kitchen.

Most kitchens fit into one of **five possible layouts** and which one works best for you will depend on your space, the level of work you're willing to do, and your priorities like cooking or storage. If you're not looking to knock down walls, you might be limited in the layouts available to you, but there are tips and tricks to make even the smallest kitchen more functional. You can visit our **online Layout Guide** to get you started, or get in touch with one of our **design or trade partners** for a more customised solution.

LAYOUT GUIDE

Scan me

Once you've settled on a layout, you'll have a better idea of what your budget will involve and you're ready to move onto the next step - cabinets! And don't forget, if you sign up for a **free online account**, you can save multiple quotes and projects, which can help you get a realistic cost comparison of different layouts you might be considering.

Visit www.modulr.com.au/layout-guide for more info.

1

Break it Down

Once you've chosen your layout, start by dividing it into sections or 'runs' of cabinets, taking into account any structural features like pillars or walls. Measure these sections to ensure your cabinet units fit within the overall width and depth.

3

Make it functional

You know better than anyone what you want out of a new kitchen, so take your priorities into account right from the start - think about where you want to put hot pans out of the oven, cleaning 'zones' for your dishwasher, sink and pull-out bins, and other ways to make your kitchen the true heart of your home! Check out our **online Layout Guide** for more inspiration.

2

Work from the corner

Corners can be tricky but if your layout has a corner, we have options available to make the most of your space. Consider a blind adjustable unit in place of standard L-shapes, and pull-out units for full access.

Visit www.modulr.com.au/corners for more info.

PET FOIL FINISHES

We are proud to offer PET foil decor finishes across our entire range of doors and panels. Our Stefano Orlati PET OptiMatt Matt, PET OptiGlace Gloss and PET OptiGrain Embossed Woodgrain double-sided foils are made from 100% post-consumer recycled PET plastic. Our foils are bonded with an E0 substrate, so unlike many traditional laminates, they won't emit toxic chemicals like formaldehyde when exposed to heat from nearby appliances. They also offer unparalleled fingerprint resistance and a 10 year indoor warranty.

Ready to place your order?

Use our **Visualisation Service**

You know what you want. Let us help you get there. With our online Kitchen Builder, you can save projects to your account while you customise your add-ons to make it perfect for YOU. But we know it can be hard to picture how it's all going to come together. So, once you have your project finalised, use our online visualisation service. We'll use the products in your project to create a visual render of your finished kitchen based on the layout you've provided.
