

Proudly Designed & Manufactured In New Zealand.

RIGS is a New Zealand-based company that started providing a unique, patent-pending fascia solution suitable for upgrading all types of metal fascia and spouting systems that have been installed over the last 40 years.

To date, there has not been such a well-developed product to address wide range of outdated applications and building methods. RIGS Fascia can be used to revamp a troublesome internal gutter system, used as a timber fascia cover or suited for replacement of all other metal fascia systems which are becoming problematic

Need To Replace Your Gutters Or Fascia?

Why Should You Upgrade Your Fascia & Gutter Systems?

Enhance and modernise the visual appeal of your property.

Bid farewell to those pesky water leaks and overflowing gutters.

Experience the speed and ease of changing to the RIGS System.

Choose RIGS for your fascia/gutter conversion and watch the savings by adding value to your home.

This unique fascia system can be used to convert any existing metal fascia system (internal or external).

Frequently Asked Questions.

How do I know I have issues with my internal gutter system?

There are many telltale signs that you have or are heading towards having issues with your system. These are some of the more obvious signs.

- Water leaking down windows/out of corners/through soffit linings or out through holes in the bottom of some fascias.
- Black mould on soffit linings.
- Brown spots on fascia (fascia usually rusts from the inside, once there are brown spots on the outside then the corrosion is usually extensive but hidden).

How long can I expect the replacement process to take?

This will largely depend on the size and age of your house but generally it will take between 3-6 days to complete the process.

How much will it cost to replace my gutter system?

Contact us for a free quote and estimate. Once you provide the address, we will be able to submit an accurate quote/estimate based on an actual site visit or via satellite imagery of your home.
