DESIGNS

The Design Process

HERE'S HOW OUR PROCESS WORKS

1 Discovery & Consultation

The first step is all about you! We begin with a consultation to :

- Understand your needs
- Define your style and goals
- Discuss your lifestyle and budget

2 Concept Development

Once we understand your vision we:

- Create mood boards
- Develop concept designs
- Explore colour palettes and materials
- Present layout options

3 Design Refinement

After presenting the initial concepts, we work with you to:

- Refine the preferred design
- Tailor colour, tile, stone, appliances, fixtures, fittings, lighting and furniture choices
- Finalise design details based on feedback

4 Technical Drawings & Visualisation

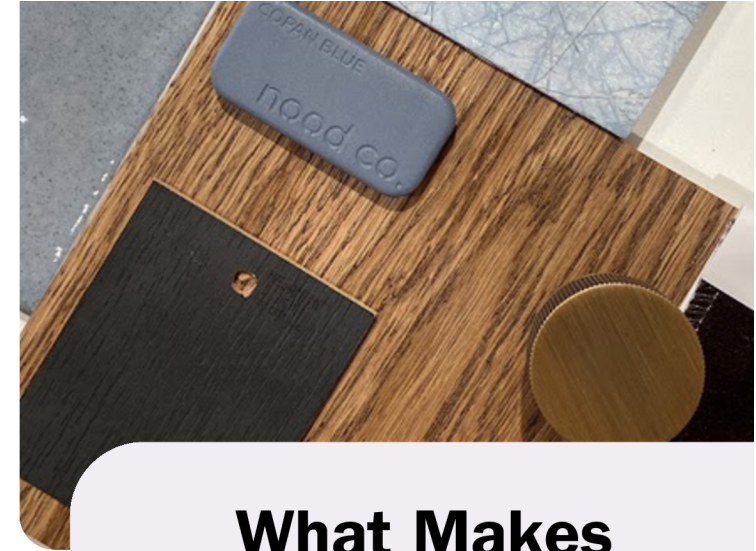

With the design finalised, we produce detailed technical drawings and schedules that detail every aspect of the project:

- Produce detailed technical drawings
- Schedule finishes, fixtures, appliances, and lighting
- Create 3D renders and walkthroughs

5 Handover & Project Involvement

Once the design is complete, we hand over:

- Detailed plans to builders ,cabinet-maker/trades
- Stay involved throughout construction
- Troubleshoot issues as they arise
- Ensure final delivery meets high standards

What Makes DISKO Different?

Holistic Approach:

We consider the entire space and final outcome, not just individual elements.

Personalised Service:

Your space should reflect your personality, and we're here to make that happen.

Expertise & Experience:

With expertise and experience, we bring creativity and technical knowledge to every project.

Stress-Free Process:

We consider every last detail from stone to skirting boards so you can enjoy the transformation without the stress.
