Complete Home Filtration System

With large components of our systems made in Australia we are proud to display the Australian made logo on our CHF cover.

The **all-in-one** solution

for **Australian households**

A system designed specifically for Australian conditions, with a UV protective casing and high flow capacity. These units are WaterMark certified for your peace of mind, with our manufacturing facility being ISO9000 certified.

All filtration media used is NSF certified to ensure our products and manufacturing procedures are of the highest quality and deliver optimum performance at all times.

Softer, cleaner, better tasting water to **every tap** in your home

PREMIUM WATER UPGRADE PACKAGE

The Premium System combines the filtering and softening technology of the Complete Home System with the purification technology of reverse osmosis for maximum contaminant removal, up to 99.9%.

This system is recommended for consumers who require specific contaminant removal such as fluoride, hormones and pharmaceuticals from drinking water which are impossible to remove through filtration alone.

Utilizing state of the art membrane technology this system is best for the more discerning water customer or homes with bottle fed babies or with specific health concerns where Doctors or other health professionals have recommended distilled or pure water.

This unit comes with an option to alkalise final drinking water if required. A pump can also be added to boost pressure at the drinking tap in low pressure areas.

BENEFITS TO YOUR HOME

Customers report:

- ✓ Saving money on gas and electricity
- ✓ Cleaner plumbing pipes
- ✓ Hot water system lasts longer
- ✓ Appliances can last longer

tap in the house

Reduced
requirement for
detergents

Better skin & hair
health, bathe with
safe clean water

Increased lifespan
of all water using
appliances

What our **customers** say about **us**

Mel from Complete Home Filtration was extremely knowledgeable in relation to the filtration system and provided excellent details about the benefits and technology of the system.

Graeme Macey

Since installing our Complete Home Filtration system Our shower water is much softer, our kitchen jug no longer stains and our drinking water is much nicer to drink. We could not be happier.

Kevin Hadwen

We have had our system since Feb 2020, noticed difference from day one. Water nicer to drink, better for washing clothes and much better to wash hair. Thanks to this company for their expert service and product.

Lynne Baker

We have had a Complete Home Filtration system for about 2 years and it has improved our water quality no end. It saves the build up of calcification and also makes the water taste better. One of our better decisions.

Andy Reavell

Its the best thing since sliced bread! We can drink from any tap inside or out with pure tasting water. Cleaning the shower is so effortless also, having none of the hard water staining. My hair and skin feel so much nicer

Leanne Donaldson

Really happy with the service and the product. We have had filters for 12mths now and just changed the filters 2mths ago as recommended for a family of 5. My husband changed them was simple

Shannon Ferguson

Best thing ever we decided to do. Since we had it installed we can actually enjoy water from the tap and our shower screens stay clean of calcium built up. Can not recommend it enough.

Claudia Smith

Such a worthy investment. Our water quality was terrible before. Now we can drink quality water from any tap without the nasty taste or chemicals. Especially noticed a huge change in our hair and skin which improved a lot.

Jenny Abello

No home is truly complete without a Complete Home Filtration system.
