*“I believe that instead  
of making trendy  
objects we should try  
to make objects  
that outlive trends”*

**Asger Risborg Jakobsen**

Studied architecture at The Royal  
Danish Academy in Copenhagen

Based in Copenhagen, Denmark

# *Asger Risborg Jakobsen*

Even as a child Asger Risborg Jakobsen found joy in creating all kinds of tools that he played with in the fields and trees around his home. Later Asger chose to make his passion his way of living by studying architecture at The Royal Danish Academy in Copenhagen. After three years he felt the joy of designing fading away and needed a change.

This time, he wanted to try something completely different. Asger started studying medicine and quickly became fascinated with the architecture of the human body. He gradually rediscovered his joy of designing and now combines working in both fields. In his creative work, Asger finds inspiration in the simultaneous complexity and simplicity of nature – and he is driven by creating designs that outlive trends and that can endure everyday use over many years.

“I find lighting fascinating. It is both a practical and essential tool that enables us to unfold our lives after the sun sets. At the same time, it is an aesthetic element that affects us and our surroundings. It transforms the appearance of materials and shapes. It changes the atmosphere. Everything changes with the light.”

With his strong focus on longevity in terms of durability, functionality and aesthetics, Asger Risborg Jakobsen is not subject to short-lived trends and tendencies.

“I believe that instead of making trendy objects we should try to make objects that outlive trends. The objects we make will of course always reflect our time and in this way, nothing is genuinely timeless, but I aim to create contemporary classics.”

*“I wanted to create a lamp that combines the delicate qualities of rice paper lanterns with the durability to endure everyday use over many years.*

*I wanted to create a big lamp that could diffuse a lot of light in a comfortable way, but without blocking the view”*

Asger Risborg Jakobsen

## *Hill*

Hill is a large, geometric lampshade that fills the room without blocking the view. Created by Danish designer Asger Risborg, Hill is light as a cloud, but sharp as a rock. A lamp that is both complex and simple while creating a very soft light that spreads into the room in a calm, uniform way.

# *Anker Studio*

## **Anker Studio**

Consists of designers Christian Troels and Jonas Birkebæk Poulsen both educated from Design School Kolding.

Based in Svendborg, Denmark

Danish design duo Anker Studio consists of Jonas Poulsen and Christian Troels Hansen. Both have been interested in creating and designing since childhood, which has resulted in a curious approach and a strong creative power in everything they do.

Jonas and Christian each take on different roles while working closely together. Their collaboration often helps them overcome the challenges that come up during the design process.

“When you’re two people working together, you’re forced to say what you’re thinking about out loud. That way it becomes real, and it forces you to make up your mind about it to a greater extent than when it’s just thoughts in your head. When you articulate your problem out loud, you often find another perspective on the solution.”

For Anker Studio, good design is a design that people remember and fall in love with. Something that is part of a bigger story and that will be cherished for years. When working with lighting, Jonas and Christian find the balance between functionality and aesthetics fascinating.

“The best thing about working with lighting is that it has a large range between functionality and art. Some lamps are only functional, while some are more emotionally and aesthetically driven. The emotionally driven pieces become like an art object in the home. That’s what makes the work fun. There’s room for differences”.

*“Some lamps are only functional, while some are more emotionally and aesthetically driven.*

*The emotionally driven pieces become like an art object in the home. That’s what makes the work fun.*

*There’s room for differences.”*

Anker Studio

## *Versale*

The Versale series by Anker Studio is the epitome of Scandinavian minimalism cut to the very core. A perfectly round shade with a uniform light surface only disturbed by the piercing frame.

The whole series can easily create the perfect ambience anywhere you need a pleasant, glare-free light.

**Rune Balle & Christian Bjørn**

Consists of designers Christian Bjørn and Rune Balle. The duo has carried out a large number of creative design tasks for both national and international clients

Based in Copenhagen, Denmark

*“Quiet is better than loud.  
We like to create designs  
that are very simple.  
Designs that people  
feel safe about”*

## *Bjørn+Balle*

The designers combine minimalistic Scandinavian design with international trends. It's about image creation and recognizability. The overall identity of the product is its form, function, details, structure and materials, which all comes together. A product never stands alone but is part of an environment where the story being told supports the design.

Bjørn + Balle have both carried out a large number of design tasks for both national and international clients at many different areas, such as product design, furniture design, interior design, identity programs and exhibitions, and together they have great success with lighting design.

Bjørn + Balle has delivered a wide range of innovative technical solutions for the industry, as well as beautifully designed products for the consumer market.

## *Blanche*

The Blanche series by Bjørn + Balle is carried out in a classic design with elegant art deco references. Brushed brass details encircle the opalized diffuser that emits a soft light both upwards and downwards. The slim design makes the pendant perfect above a dining table. Dimmable for obtaining the perfect light for every situation.

**Bønnelycke MDD**

A Multi-Disciplinary Design company  
with a desire to work constructively and innovatively

Based in Aarhus, Denmark

*“Great design is giving people what they want, and a little bit more”*

## *Bønnelycke MDD*

Bønnelycke MDD was established in 1988. Driven by a nosurpressable urge and desire to work constructively and innovatively, Bønnelycke mdd started his career with the design of lamps, furniture and interior decorating.

Quickly, he became known as an unconventional architect with no whims and fancies. His ability to challenge and optimize the manufacturing process itself is to be found in Henrik's original professional background as a toolmaker. "It could be fun" and "of course it can be done" – are phrases often used in his company.

From day one, the core of his work has been to create products simply because they are needed. Designs by Bønnelycke MDD grow out of a specific need or requirement expressed by the customer – and by the general public as such. This has resulted in a comprehensive portfolio of projects and designs allowing the company to slowly but steadily expand over the years.

# *Nobu*

Nobu is a reinterpretation of the classic architectural lamp, where the industrial expression and classical form are maintained. Nobu has integrated LED, which contributes to a good light output and simultaneously it is easy and convenient to turn the light on and off with the built-in touch function on the lamp head. In addition, Nobu has a flexible arm and lamp head, so you can direct the light to what you wish to light up. Nobu has lots of applications as both a table base, clamp and wall bracket are included. Nobu is suitable at the desk but can also be used as a bedside lamp or mounted on the wall in the kitchen. Design by Bønnelycke MDD.

Nobu Table

# *Charlotte Høncket*

**Charlotte Høncke**

Holds a degree from Aarhus School  
of Architecture in Industrial Design

Based in Aarhus, Denmark

*“I like exploring new materials, shapes and techniques and I never choose the easy way out”*

Charlotte Høncke has always had a great passion for design and knew from a very early age that she wanted to pursue a career in design or architecture. In 2002 she graduated from Aarhus School of Architecture in Industrial Design, and a few years later she chose to become self-employed working with design full time.

Charlotte finds inspiration everywhere she goes – from nature, architecture or travelling the world. New ideas often require new methods for designing and creating which sometimes forces her to explore new ways.

“I like exploring new materials, shapes and techniques and I never choose the easy way out. That sometimes causes challenges, both for me as a designer but also for the manufacturer. But exploring new methods is also what makes the job diverse and exciting.”

Lighting design is something that Charlotte Høncke finds particularly interesting because of its versatility and the need for balancing functionality with aesthetics.

“Besides having to provide the right, functional light, I also think lamps need to be beautiful when turned off. Lamps are one of the elements that bring most atmosphere into the interior, and I personally like to have many different types of lamps in my home to create just the light and atmosphere I want.”

# Maple

Maple is designed by Danish designer Charlotte Hønlcke and its organic shapes are reminiscent of large flower petals, effortlessly embracing a cosy, evocative light. Maple is perfect above the dining table or in a dark corner that needs brightening up with an airy design that does not feel heavy or dominant in the room.

*“I’m very proud of Maple. I really like the simple, organic shapes and the way the light unfolds and hits the shades.*

*It almost resembles large flower petals that embrace the light in an effortless way”*

Charlotte Høncke

# Maria Berntsen

## **Maria Berntsen**

Holds degrees from both  
The Royal Danish Academy Art  
and L'Ecole d'Architecture

Based in Copenhagen, Denmark

*“To me, success is when my design brings joy in the everyday lives of people”*

With her own design studio in Copenhagen, Maria Berntsen has since 1992 focused on architecture and design. Maria Berntsen is a well-established name in the design industry and has over the years collaborated with a wide range of Danish and international companies, where her extensive experience has resulted in many successful designs.

“At the start of a new project, I look for an idea with nerve, functionality and identity. By modelling and visualizing, I test the idea, how it might be used, and its presence.

Good design communicates and establishes a dialogue with the receiver. Design is not just about functionality – it is as much about the emotional connection and impact. To me, success is when my design brings joy in the everyday lives of people”

## *Glossy*

Glossy is the epitome of tasteful and sophisticated design. Danish designer Maria Berntsen has created a table lamp that oozes of Nordic minimalism, where the combination of brushed steel and opal white glass contributes to an incredibly elegant design. Glossy is named after the shiny surface of the opal white glass, which lets a soft and comfortable light shine through.

*“Glossy is my favourite lamp. I feel that it successfully balances form and a mix of materials. The entire construction and expression of the lamp is simple and timeless.*

*It makes me proud and incredibly happy that the design has been acknowledged with a Red Dot Award”*

Maria Berntsen

reddot winner 2021  
lighting design

# *Align*

Align is a series of contemporary and elegant table lamps by Danish designer Maria Berntsen that encourage interaction and curiosity. The inner shade of the lamp is static, while the outer shade can easily be moved for a changeable light that fits any need.

Align Table

Align Table

## *Stay*

Stay is designed by Maria Berntsen and is a modern, yet timeless lighting design at the same time. The oblique cut of the shade creates an open and pointing shape that allows for lots of light to shine through. The Stay wall light emits a soft, comfortable light both upwards and downwards – creating the perfect light for your bedside or kitchen table.
