

A photograph of a modern outdoor living space. In the foreground, a large, round, light-colored concrete coffee table sits on a wooden deck. Behind it, two wooden armchairs with light-colored cushions are positioned. To the left and right, parts of wooden sofas with light-colored cushions are visible. The background features a dark grey fence, a large green tree, and a house with a blue roof under a clear blue sky.

Inspiring Australian outdoor living

DESIGN. PERFORMANCE. SUSTAINABILITY

COEN
COMPOSITE WOOD
BUILDING A BETTER ENVIRONMENT

Creating maintenance free outdoor spaces

+ DESIGN

Created for the Australian outdoors, COEN Composite Wood enhances varying building designs and landscapes. Our range of profiles, colours and finishes are timeless and designed to last.

+ PERFORMANCE

Providing superior durability without the upkeep of timber, COEN Composite Wood won't warp, twist, splinter or rot, and comes with the confidence of a 15 to 25 year warranty.

+ SUSTAINABILITY

Offering the added benefit of ecological credentials, COEN is made from 90% recycled materials, is non toxic and does not require chemical based treatments, helping to minimize your environmental impact.

*A recycled building product,
designed to last in the Australian outdoors.*
