Experts

Leading
the Way

Not one person, not one skill, nor a single product can suffice in today's world of technology.

That's why here at Next Group we have focused on bringing together a network of people with a diversified skill set. With small agile teams whose skill sets meet different technology needs, we are able to readily align our services to meet the many and varied requirements of our customers.

Our goal has always been to provide our customers with a single point of contact whilst expertly meeting their technology needs. In doing so we have structured our business on the philosophy that a mix of experts in different fields, along with key partner dealerships, and supplies of varying products will provide a stable and enduring business. This underlying foundation of our business provides our clients with the confidence that we will be supporting them with their technology journey now and in the future.

Not one person, not one skill, nor a single product can keep up with the pace of change

A FEW THINGS THAT MAKE US DIFFERENT

OUR PARADIGM

Our guiding principles are simple yet robust, connected but separate, small and agile. We design, work and play by all the same rules.

LEADERSHIP

We strive to lead the way in our fields of expertise, whilst leading you, our customer along your journey to a better living experience through technology.

NEVER GIVE UP

We are driven to continue finding new and innovative solutions that address our customers' evolving needs. Technology is fast paced and we love it!

CONNECTED

Our strength is in our long term relationships. Whether it is our dealerships, our suppliers, or our previous customers we have remained connected to these relationships for many years.

The real value of technology isn't in the product itself, it's all about how that product is aligned to make your life better! To achieve that you need experts to provide you with solutions that enhance your lifestyle. Whether that's an independent or a fully integrated system, that's where our expertise comes in.

Each team within Next Group are experts in their own fields as well as experienced integrators. Together with you we look to understand how you want technology to add value to your home and then we set out to provide this for you. As a team we are able to design and select products and solutions that will bring value to not just your home, but your everyday life. There is nothing more satisfying than a customer who loves living with their technology!

WE BELIEVE THAT
TECHNOLOGY IS ONLY
USEFUL IF IT MAKES A
REAL DIFFERENCE

Whatever it might be,
Next Group is here to
help you find a solution
to fit your lifestyle.

ALL IN ONE PLACE

You can find your technology solutions all in one place - cohesive solutions as well as easier communication, planning and implementation.

EXPERT ADVICE

Know that when you are looking for expert advice that Next Group will be able to advise and guide you as an expert team in each technology field.

TRIED AND TRUE

Find peace of mind knowing that our design expertise and product selections have been honed over many years. Your solution will be valuable, reliable, and enjoyable.

CUSTOMER CENTRIC

You are the centrepiece of our solutions and services enabling us to move you to the next level with results that best suit you and your family.

HOW OUR
DIFFERENCE
WORKS FOR YOU

CONNECT

Connecting your home

Your connected home starts with the essential infrastructure that is your TV antenna, TV satellite dish, internet and WiFi connections. Without these things you will be unable to connect your essential devices and access the content available to you. If your home environment does not have this essential infrastructure you are bound to experience numerous problems whether working from home, completing personal or business financial transactions, purchasing online, streaming your favourite show, keeping the kids connected for education or entertainment, or staying up to date with national and global news.

TV Aerial

It may look simple, but without the right antenna, located in the right place, pointed in the right direction and tuned in correctly you are not going to receive the best NZ Free to Air high definition television transmission and channels. Get the right setup for your home and connect your HD televisions to receive great Free to Air content throughout your home.

Satellite

Not all locations are created equal and some locations, urban and rural, require satellite technology to obtain a television signal for your home. Installed correctly you can receive free to air Freeview satellite channels, as well as Sky TV should you choose to subscribe, and distribute them to all rooms in your house.

Internet

Whether you've got ADSL, VDSL, Fibre Broadband, 4G, 5G, fixed or wireless - we speak the language even if you don't. Reliable high speed data is what you will need for all your family members. Talk to us to understand what the best application is for you and your home. We'll help to get it sorted for you.

WiFi

Connected devices rely heavily on in-home wireless connections and more so now with working and schooling from home becoming part of our norm. Mobile phones, laptops and tablets must stay connected as you move about the house while continuing to provide consistent connectivity. Remove frustration with our robust quality solutions.

AUDIOVISUAL

It's more than just music

Video and audio options now available to us have increased out of sight. Music and video streaming services are now being used by hundreds of thousands of Kiwis every day. You can play radio stations from all over the world, and have your music playing in every room. If you want to watch your favourite TV programme or binge watch the latest Netflix series in one room, but your kids want to watch something different, you can do that too

Music

Sound systems today make listening to music a joy. Whether it's a stand alone system or a good quality amplifier and in-ceiling or in-wall speakers, the choices are endless. App control lets you access your favourite tunes at the click of a button.

Multiroom

No longer do you have to listen to what the rest of the family are listening to. Multi room solutions offer the freedom to easily play independent zones with no limit on the number of zones you can have. Whether it's inside or outside, you can listen to your tunes in any room you please.

Theatre

Sit down and watch the latest movie or series in an environment that brings it to life. Great quality surround sound makes the experience so much more rewarding. Choose a design that fits your taste and create a media experience like no other.

High Definition

High Definition TVs and sound systems take your home AV to the Next level. 8K televisions with Hi Def sound systems will blow your mind. Who needs to go to the cinema when you can have great quality AV in your home.

 **SECURITY**

Secure your assets and protect your family

Home security technology has evolved combining traditional security equipment with modern app based controls which now provide you with easy to operate systems that protect and secure the things you value the most. Whether it is an automated gate, CCTV, or an updated alarm system, these solutions continue to work for you every minute of the day when you are at home or away. Peace of mind can now be achieved with the touch of a button.

 **Home Alarm**

In NZ the home alarm "Classic" has been the home security go-to solution for many years. Internal sensing, audio sirens, and keypad-coded entry / arming has been your standard entry-level protection. Solutions today provide much more detection provision and feature rich technology ensuring the most up-to-date protection.

 **Surveillance**

Camera surveillance provides an external layer of protection up to the outer perimeter of your property. Recording external activity can provide you with added insights beyond your home's walls and increase your ability to take further actions to protect and secure your family and property.

 **Gate / Intercom**

The old lock and key access of the past no longer prevents intruders from accessing your home. Having controlled gate access at property perimeters, along with managed keyless door entry offers easy access for your family, guests, and key service providers, whilst maintaining high levels of security at all times.

 **Cyber Safe**

Home invasions are not only physical. Modern methods of criminal activity now include cyber activities from outside. It is essential for all homes to employ basic password protection practices as well as device and data network security and privacy strategies fit for our modern world.

 **AUTOMATION**

Automating your life

The real value of technology isn't in the product itself, it's all about how that product can make your life better! It could be an intelligent security system that gives you peace-of-mind. A crystal clear audio set-up that lets you stream your favourite tunes to every room in the house. Or an 8K big screen home theatre system that makes you feel like you're at the movies. Whatever it might be, Next Goup's array of solutions can be designed and configured in a way that will help you find a fit for your lifestyle.

 **Lighting**

Quite simply, smart lighting can transform your home. It can add elegance, ambience, convenience and energy efficiency too. With one touch of a switch or preprogrammed favourites you can be in control of your lighting even when you're not home.

 **Comfort**

Make sure your home is comfortable no matter where you are or what the temperature is. Cooling and heating, underfloor systems, towel rails - all can be set to forget whilst ensuring that you are always comfortable in your home.

 **One App**

Make life easy - Control4 provides you with a robust, proven, and easy to use way to manage your home technology with just one app. Modern, and offering multiple entry point options, Control4 is your solution for seamless technology control.

 **Automation**

Automation in its truest sense is integration. Getting your systems to work together - no longer independent subsystems in your home. By integrating your home you will have all your systems working together to bring about a true home living experience.

PUT YOUR TECH TO WORK

Are you
ready to live
smarter?

Put your technology to work for you by designing a solution to help you live the way you want to! Whether it's getting WiFi that works, controlling the temperature in your home to meet your comfort levels, watching the perfect movie with an automated lighting scene at the touch of a button, or keeping an eye on your home from afar. Here at Next Group we can work with the things that matter most to you and create a system that integrates technology seamlessly into you and your family's life.

Whatever you need, Next Group is ready to help with solutions that are:

- Simple and enjoyable
- For new homes, renovations, or system upgrades
- Backed by a national and global support network
