Why Choose Coldbuster?

Solid Credentials: With several decades in the industry, Coldbuster continues to be the industry-leading premium provider and installer for electric floor heating Australia-wide and the preferred choice of architects, builders, developers, renovators, specifiers and electricians.

Comfort: Coldbuster simply creates the best ambiance of any heating choice!

Even Heat Distribution: You want an even spread of heat across the whole area. No cold/hot spots!

At Floor Level: The optimum solution is to heat an area from the floor, not from a wall or ceiling.

Heat The Floors: Heating the floors is the big bonus. Everyone loves a cosy, warm floor!

Unobtrusive: Nothing visible and no space requirements. No sound, no smell, no annoying hot air blasting out! Nothing hot to touch. No outside venting is required.

Safety: No high voltage, or hot surfaces. The heating element is fully earthed and waterproofed, offering protection against fire and shock (must be connected to an RCD).

Allergy & Environmentally Friendly: No volatile organic compounds (typical in air circulation units), no nitrogen oxides (typical in gas heating), no smoke, no fumes, no dust or electromagnetic radiation. Enormous health benefits from reducing mould and mildew in wet areas.

Easy and Quick Installation: All our floor heaters are easy-to-install kits, with simple-to-follow installation guides. Videos are available online and the Coldbuster team are a phone call or email away. Or if you'd prefer, we can install.

Smart: With Coldbuster's smart thermostats, you can set the temperature you want, in the area you want it, and at the time you want it! And the system will sort it all out.

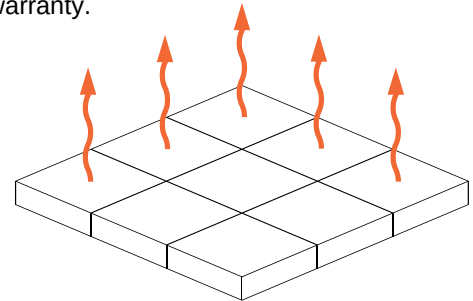

Cheap to Run: Our advanced thermostat controls drastically reduce power usage, resulting in significant ongoing savings.

Inexpensive to Buy: Our floor heating is an affordable luxury, costing far less than its luxury image would suggest. You will be pleasantly surprised.

Incredible Investment: Homes with floor heating conveys a prestige luxury home, yet your investment is low. This means that Coldbuster's solution adds far more value to your property than it actually costs. This is undoubtedly one of the best investments you can make in your property, whilst improving your lifestyle.

Maintenance Free. No Fuss. No moving parts, no wear and tear. A durable and reliable heating system that lasts. This means, no ongoing maintenance and no future repairs.

Long Warranty: You are covered by a long 25-year warranty on heaters to give you peace of mind. Thermostats come with a 3-year warranty.

Myths vs Facts

Myth Floor heating is an expensive purchase because it is a luxury item.

FACT Coldbuster Floor Heating delivers affordable luxury, at a reasonable cost. Did you know you can purchase floor heating, thermostat and installation for most bathrooms for under \$1,000? Get a free quote from us so we can prove it.

Myth Floor heating is costly to run because it's electric.

FACT Running costs are far cheaper than expected due to Coldbuster's smart programmable thermostats. And we can demonstrate it with our "Running Cost Calculator". You can achieve even more savings when used with solar power. Also, remember there are no ongoing maintenance or future repair costs.

Myth Floor heating is primarily or solely for bathrooms.

FACT Coldbuster Floor Heating is actually the best way to heat every area of a property where floors are being laid. So get a free quote, for every room, and a free heat plan, so you have all the facts and options to consider floor heating room by room.

Myth Floor heating is mostly just for cold floor surfaces.

FACT Since Coldbuster Floor Heating is the best way to heat the room (heating the floor is just the bonus!), we provide floor heating for just about every flooring surface: under tiles, most timbers, vinyls and laminates, under carpet, in screed, and in slab (often for polished concrete).

For your free quote call 1800 85 75 65

Under Tile Heating

The ideal choice for heating below ceramic tiles, slate, porcelain, limestone, marble and terracotta.

Suitable for installation on concrete, screed and suspended timber sub-floors (with fibre cement sheeting over the timber).

Tile heaters are supplied as pre-configured strips on a self-adhesive fibreglass mesh roll. The heating element is taped to the 500mm wide mesh at a consistent spacing.

The high grade, waterproof, Teflon-coated heating element ensures both safety and durability.

Under Timber Heating

The ideal choice for heating below engineered, hybrid or natural timber floors, vinyls and laminates.

Under timber heaters are designed the same as the under tile heaters. The key difference is that timber heaters have a 'moderate output' in order to control for the expansion and contraction effects of your flooring.

Under Carpet Heating

Super-thin heater designed for easy installation between the underlay and the carpet.

Carpet heaters are supplied as pre-configured strips of aluminium foil mat rolls.

The heating element is sandwiched between two layers of aluminium foil, 500mm wide, at a consistent spacing to ensure safe heating output and shield all electromagnetic radiation.

In-Screed Heating

The ideal choice for heating the majority of floor finishes, including stone, porcelain and ceramic tiles.

Designed to be installed directly onto your existing sub-floor. The screed bed can then be laid over the floor heating cables.

The heaters are rated at 18W per linear meter and supplied as a cable on a reel. The 6mm thin cable is designed with durability in mind.

In-Slab Heating

The ideal choice for heating polished concrete and also suitable for other floor finishes.

The heaters are rated at 30W per linear meter and supplied as a cable on a reel. The 6.5mm thin cable is designed with durability in mind.

Heater Kits Include:

- Floor heater
- Installation monitor with battery
- Installation manual

All Coldbuster floor heaters are single-ended with a twin conductor element and a single 3m cold tail to connect to a thermostat.

CB Smart 2

- Amazon Alexa & Google Home compatible
- Wi-Fi & App controllable
- Touch screen
- Key-Lock function
- 3 different modes
- Air and Floor Sensor
- Horizontal mount
- Overheating Protection

MWD5-V

- Voice Compatible with Google Home and Amazon Alexa
- Wi-Fi and app controllable
- IP21 rating
- Energy monitoring through the thermostat interface, QR code or SWATT application
- Adaptive feature (warm by the set programmed time)
- White and Black options

MWD5 Wi-Fi

- Wi-Fi App controllable
- Programmable thermostat
- Touch screen with on/off switch
- 6 events per day
- 7 different modes
- Running cost monitor
- Adaptive feature (warm by set programmed time)
- Mount vertical or horizontal
- QR code for technical assistance
- Auto winter/summertime
- White and Black options

MCD5

- Programmable thermostat
- Touch screen with on/off switch
- 6 events per day
- 7 different modes
- Running cost monitor
- Adaptive feature (warm by set programmed time)
- Mount vertical or horizontal
- QR code for technical assistance
- Auto winter/summertime
- White and Black options

CB Dual

- The only 2-zone floor heating, programmable thermostat in Australia, or:
- 1-zone programmable heating, plus timer, for heated towel rail or mirror demister
- 8 Amps each
- Large touch screen
- 5+2/7 Day Schedules
- Key-Lock function
- Vertical Mount

CB Basic

- Manual or Basic Programmable
- Up/down temperature control touch buttons
- 2 or 4 events/day
- Can switch 16 Amps
- Adaptive function
- IP21 Rating
- Vertically mounted

MTC Manual

- On/Off switch manual non-programmable thermostat
- Adjustable temperature control
- Vertical/Horizontal mount
- Locking mechanism
- Heat-On indicator light

ETV

- Manual thermostat
- Compatible with home automation
- Can switch 16 Amps (3840)
- DIN rail mounted thermostat
- No on/off switch
- Has set back mode if connected to an external timer
- Floor sensor mode only
