## ENTERTAINMENT TECHNOLOGY LTD

### STRUCTURED HOME CABLING

### "Smart Wiring"

#### Entertainment Technology:

Your one-stop shop for all your **Audio Visual, Security, Music and Home Entertainment needs**

We can design and install a smart future proof, structured wiring system that integrates all your current technologies while allowing for the future. We can then install and commission the equipment and conduct in-home training, all at an affordable fixed price. We complete a full turnkey project to ensure all aspects of your entertainment equipment work seamlessly. We utilise a Star wiring Home Hub system, which returns most cables in the home to a inwall location where they can be easily accessed and assigned to meet any future needs and we centralise your AV equipment.

- Ensure your home is future proofed by making sure that cabling is available to support current and any future communication and entertainment technologies;
- Watch Sky, BD-DVD, CCTV or Free-to-air TV on any TV in any room of the home in full 8K HD;
- Have the ability to install Sky or similar set-up box / digital decoder into any room in the home (without the need for extra cabling by installers);
- Listen to Radio, Spotify, Sky or Music in different areas (zones) of the home, controlled with your smart phone;
- Listen to music and control it with your Iphone or Android device from your outdoor entertainment areas;
- Have a fully immersive Home Cinema or Movie experience 9.2 or 7.1 sound;
- Plug your computer, internet-ready device or game console into any communication outlet in the home and be able to network and surf the internet and display your media on all your TVs at full network speeds;
- Distribute your 8K HD content to all main TV's to share and receive the best picture possible on your HDTVs using the latest technology (HDMI over fibre up to 100mtrs).
- Ensure your camera system can pick up the best images possible and be monitored from any devise.
- Have an alarm system that and can be set / monitored from anywhere in the world.
- Be able to keep up with future AV technologies without difficulties and great costs required to retrofit new cabling, complete with a future fibre backbone. Running Cat6 cable allows for this.
- Ensure your home will appeal to a larger range of future home buyers as they understand its added value;
- Enjoy the features and content that faster connection speeds and future fiber-optic technologies will provide;
- Have high speed internet and reliable WiFi connections (Mesh or AP) throughout the home.
- Lighting and home automation control.

**The one thing each new home should have - A well thought out Structured Wiring System containing all the Communication, Security and Audio Visual cables required now and in the future. The Home Hub will add appeal and value to your home, will entertain your family and create greater enjoyment opportunities.**

**This latest smart technology will add convenience that you never thought possible.**

**Please let us provide you with the future in Home Entertainment by evaluating your plans and arranging a no-obligation quote. Systems start from as little as \$6,999.**

## In addition to your Structured Home Cabling system, you may wish to include one of the following systems to add value and enjoyment to your home:

### **Distributed Music** Turn selected areas of the home into easy listening Zones (areas).

Enjoy superior stereo sound in selected zones with wall or ceiling-mounted speakers. Set the volume level independently in each room using your phone and have multi-sources music playing independently or concurrently.

- Radio in the master bed while listening to a iPhone, CD or Sky outside or visa versa.
- Independent volume control in each zone. Individual AV, iPod or MP3 input at each zone.
- With the right Amp/equipment, play/control wirelessly all your music direct from your Android or Apple device.

### **Infrared control point in key locations:** Easy use of AV equipment

We ensure you can change all your devices using the IR remote from the main areas of the home. This allow us to relocate your AV gear to another location and installing it in an AV rack.

- Change the SKY or DVD channel from any room that has a target installed.
- A must have if you have My Sky or Amplifier.
- Install all your equipment in a AV rack /cabinet or centralised in the home with the doors closed.

### **CCTV camera system and alarms:** Who's there

An 8K video system lets you see who is at your door or front gate before you open it. High resolution images always available. Alarm and smoke to protect your home when away. Arm and disarm form anywhere in the world with smart devices. Monitor the kids in the pool.

- Large capacity NVR records all activity and saves it for weeks.
- Access images anytime from phone or computer.
- High resolution images available for police.

### **OTHER SERVICES include:**

- Flat Panel TV, AV and DVD installs / setup and full in-home training.
- HDMI or 8K video distribution to home other TV locations.
- Freeview or media player (Apple TV), supply and installs.
- UHF / VHF aerial and Freeview Satellite Dish installations.
- Front door cameras.
- Automation of lighting and curtain systems.

### **Centralised Ducted Vacuum system:** Making a chore easier.

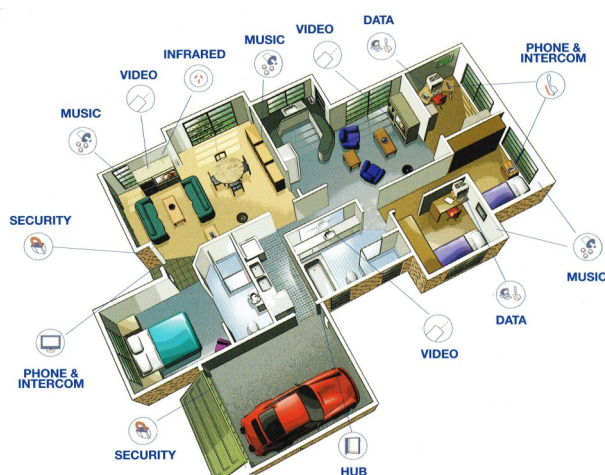

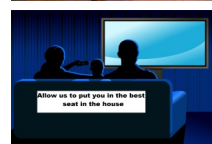

Backed by 45 years of research and development, CYCLO VAC designs, manufactures and markets high-quality ducted vacuums that have revolutionised the industry. Strong vacuuming power, high indoor air quality, efficiency, ease of use, and quietness resulting from its unique design are but a few of the many advantages of owning a CYCLO VAC ducted cleaning system. Built using the highest quality components designed exclusively for CYCLO VAC, our ducted vacuums are renowned worldwide for their reliability, innovative technology and outstanding performance.

### **Home Theatre Speaker packages:** Great surround sound

We recommend cabling for a Home Theatre speaker package. The home theatre would normally be located in the lounge area and/or games room of the home. The home-theatre package will require an amplifier, which can be supplied if required, or you may already own suitable equipment. These speakers will provide full high-quality surround sound in these areas and secondary zones (if cabled). All terminations are completed with wall-plate modules to ensure tidy installation and clean connections. And you can control it all with Android or Apple devices.

- In-ceiling Front Speaker. (floor, in-wall or on-wall speaker if required).
- In-ceiling Rear and Rear Surround Speakers (floor, in-wall or on-wall speaker if required).
- Sub-woofer - for base.
- All cabling, wall plates, installation & system commissioning when required.
- With the right Amp / equipment play and control wirelessly all your music from your Android or Apple device.

**The Home Hub and Structured Cabling should be designed to allow you the flexibility to easily configure it to use the different features of your home entertainment and communication systems to suit your changing lifestyle.**
