Why Us?

We design, specify and document complete home automation systems for you.

We make your life easier.

We work with several high-quality product systems & can help you select the best one for your client.

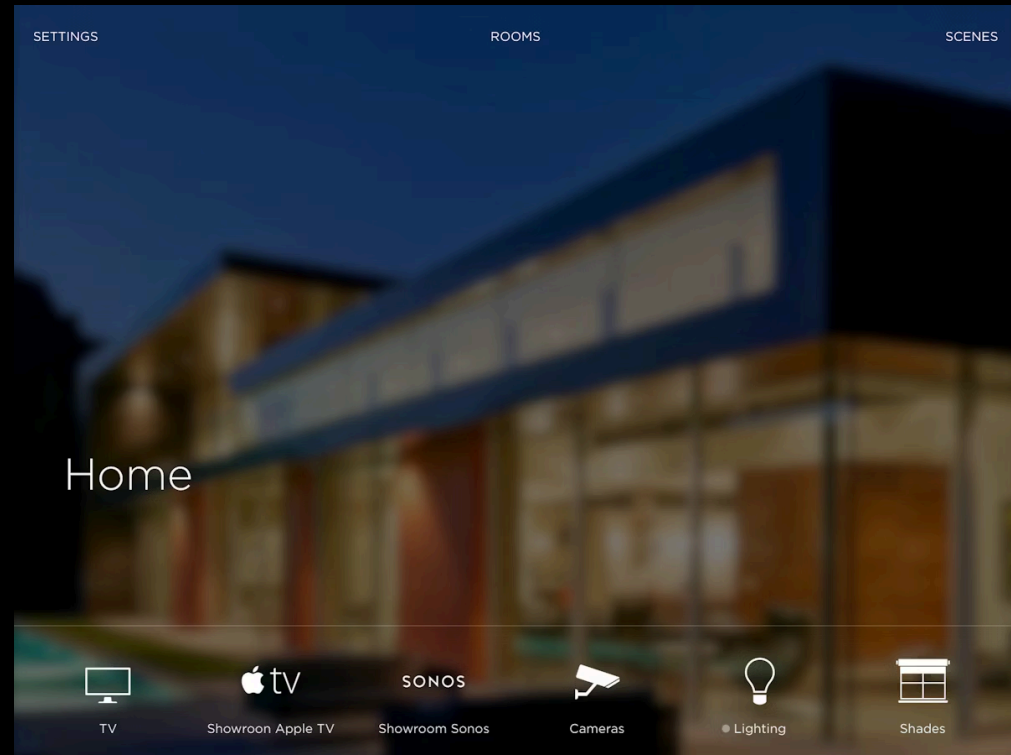

Canny specialises in home automation and collaborate with you, your team, and clients to offer industry expertise and solutions for seamlessly integrating design into a connected house. By leveraging state-of-the-art home networking alongside immersive audio-visual configurations, we enhance the living environments of your projects.

WHAT IS A CONNECTED HOME?

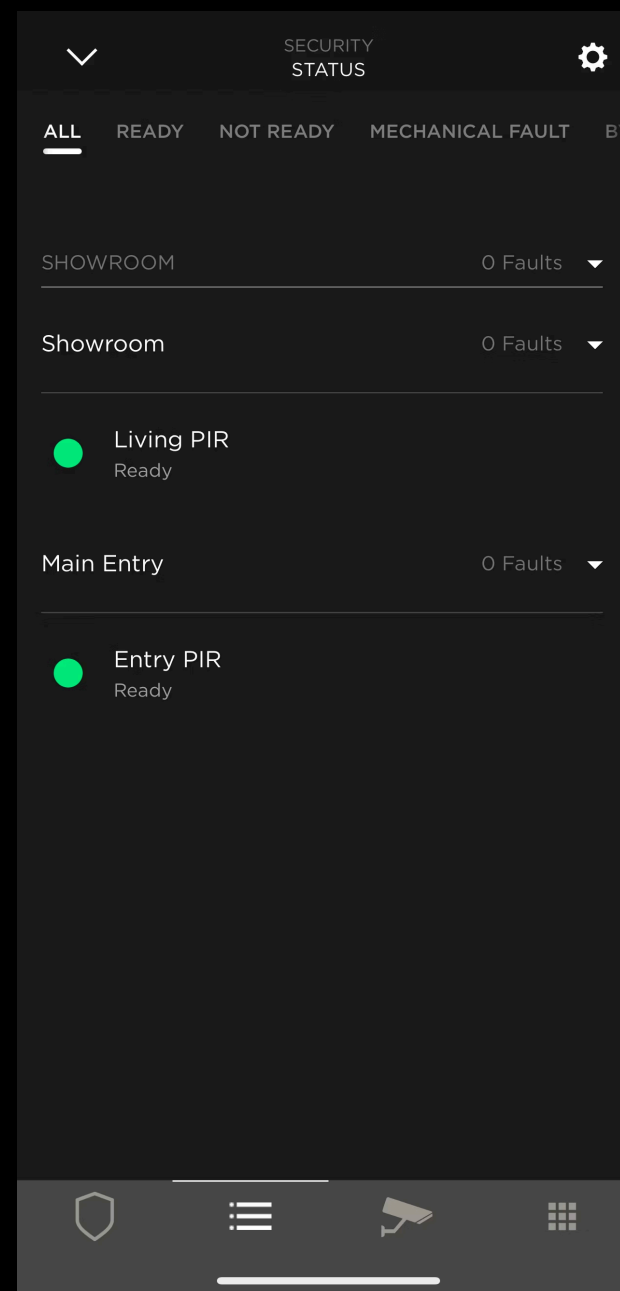

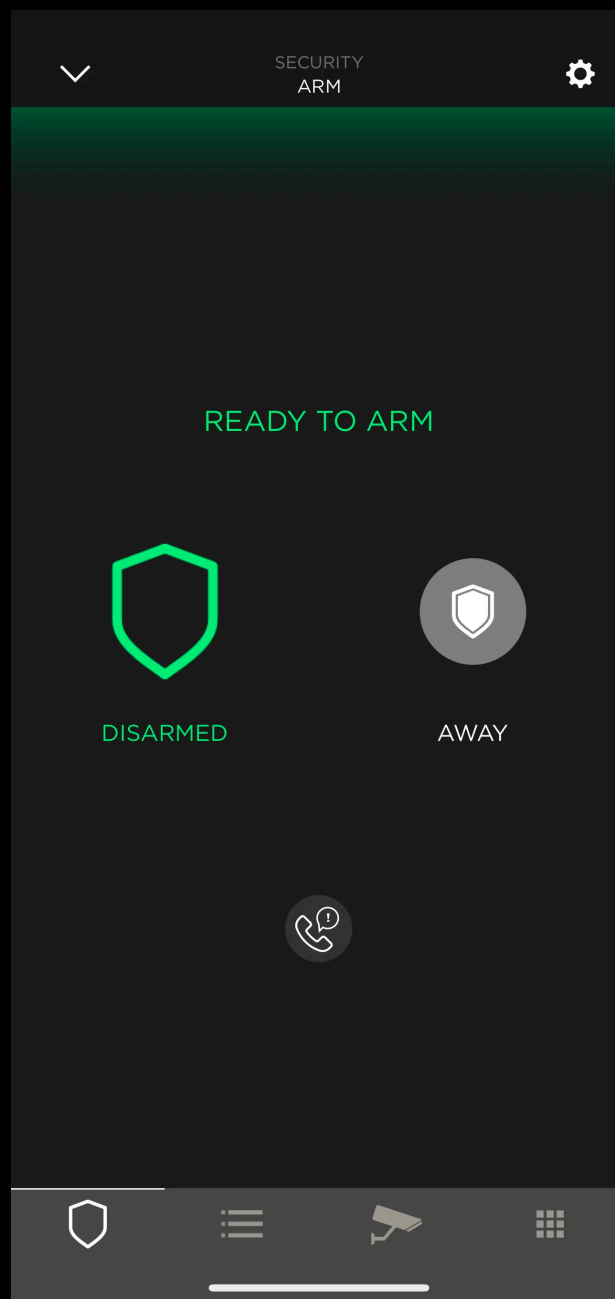

A connected smart home integrates devices, services, and applications to communicate and cooperate seamlessly.

- Simplify your client's life by controlling lighting, climate, security, and entertainment remotely.
- Enhance safety and security for residents with advanced monitoring and management capabilities.
- Make your home more valuable by future proofing your investment for enhanced market placement.

SECURITY CONTROL SYSTEM

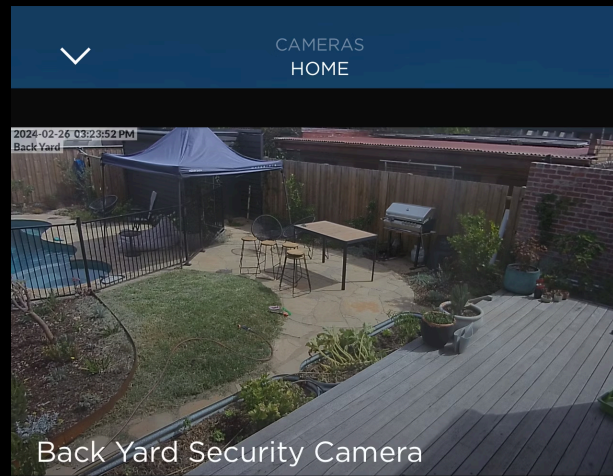

- Your alarm system is fully integrated with your connected home.
- You can personalise your arm & disarm settings, adding all of your smart components such as CCTV, dimming lights, closing blinds, garage doors and turning off heating and cooling with a touch of a button.

CCTV

Full in-home and remote access via the smart mobile app or a central touchscreen panel to;

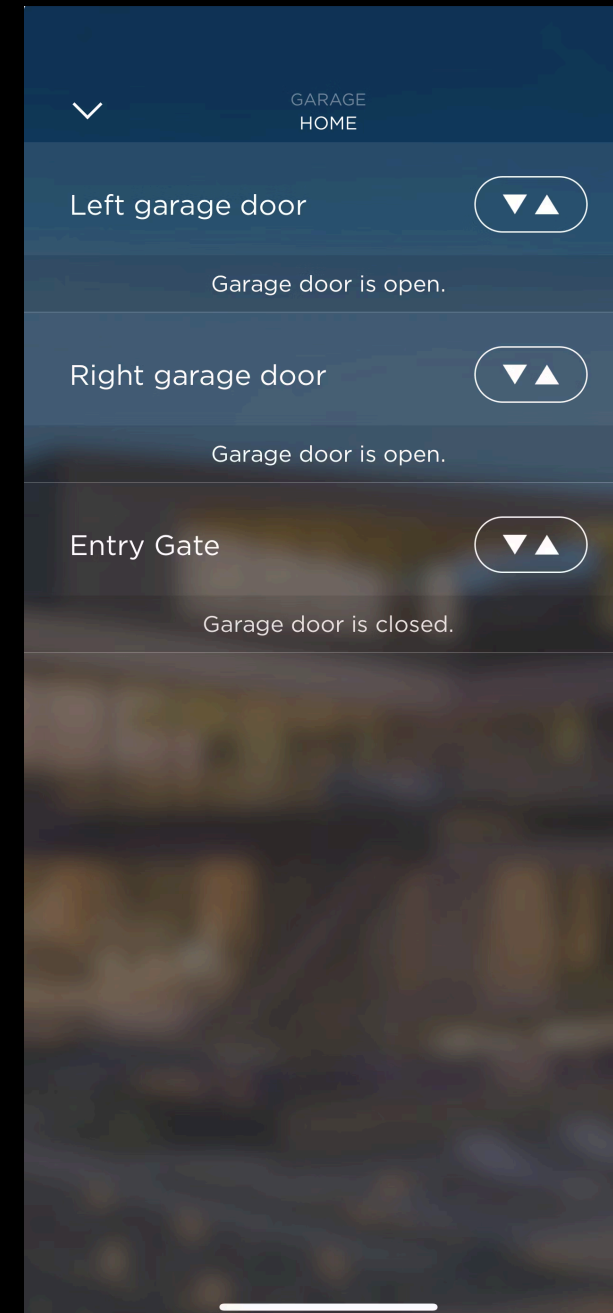

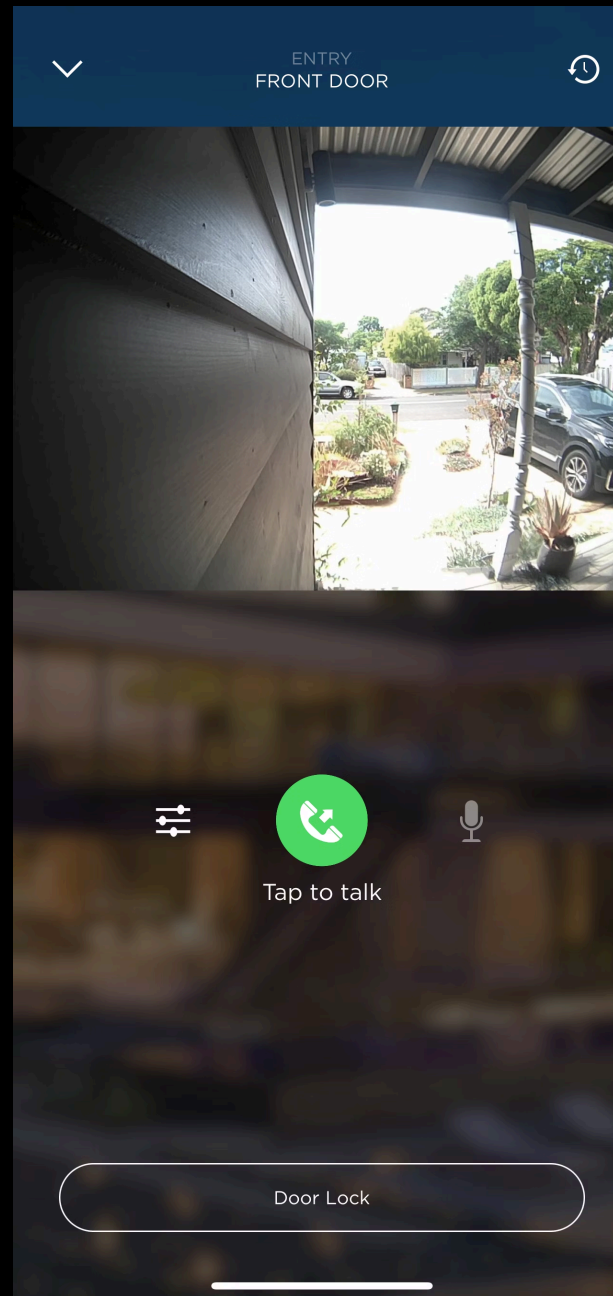

- Access 24/ 7 livestreams in colour across all cameras of your CCTV system.
- Access playback available.

ENTRY SERVICES

Full in-home and remote access via the smart mobile app or a central touchscreen panel to;

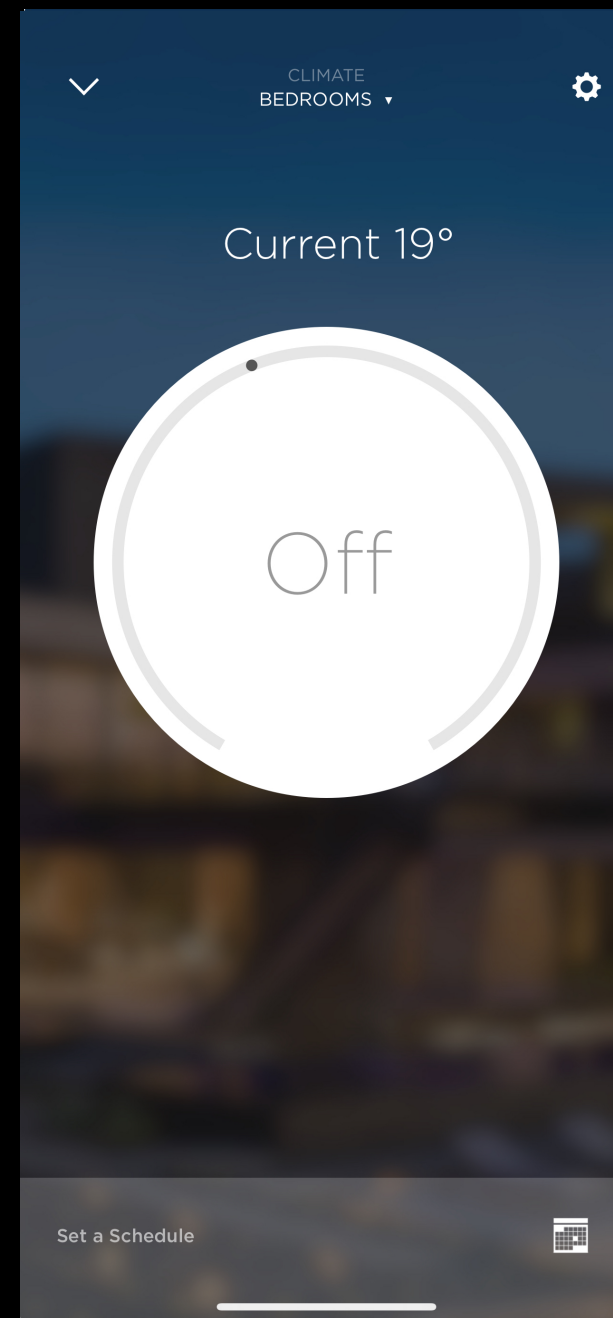

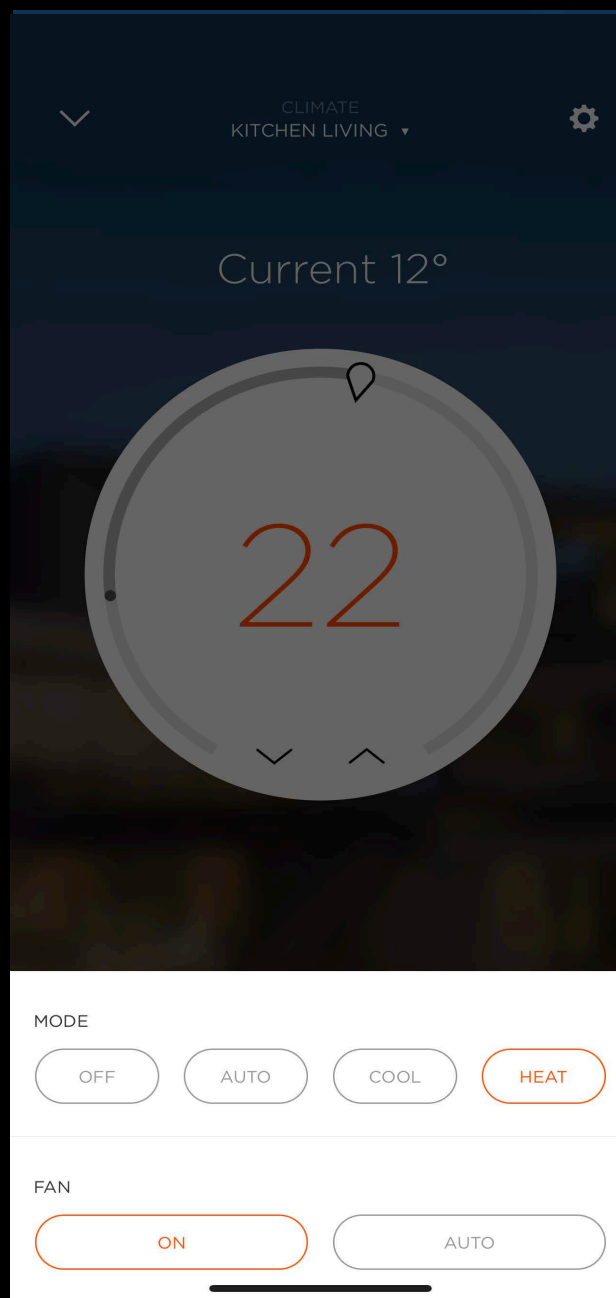

- Allocate & share secure codes as required.
- Answer the door any time anywhere with two-way audio and video communication.
- Automate and control pedestrian gates, sliding gates, front doors, and garage doors for convenience and security.

HEATING & COOLING

Full in-home and remote access via the smart mobile app or a central touchscreen panel to;

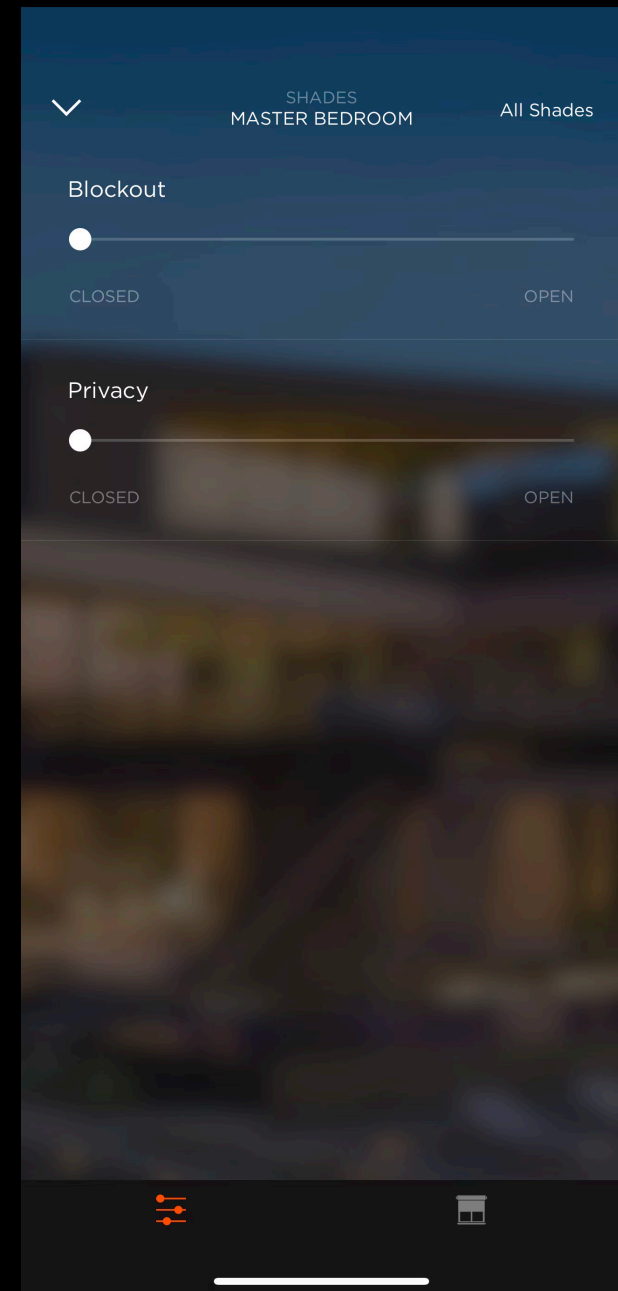

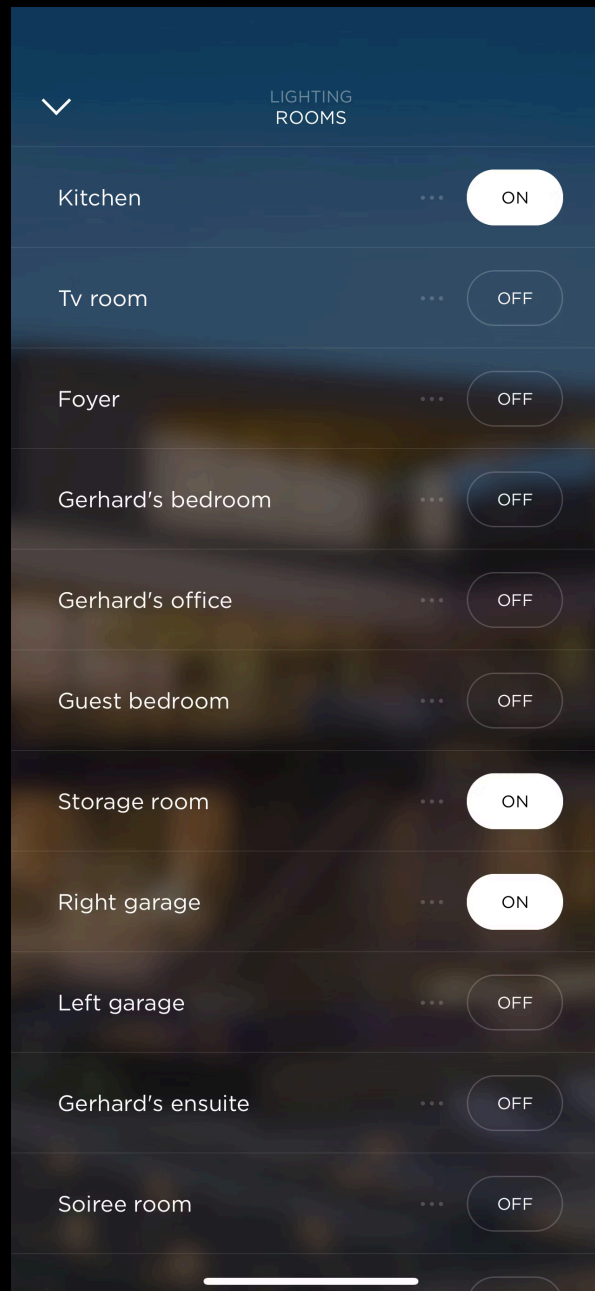

- Easily manage and customise temperature settings, including distinct zones and personalised schedules, for your heating and cooling system from anywhere.
- Keep your residence at your desired temperature from anywhere.

LIGHTS & BLINDS CONTROL

Full in-home and remote access via the smart mobile app or a central touchscreen panel to;

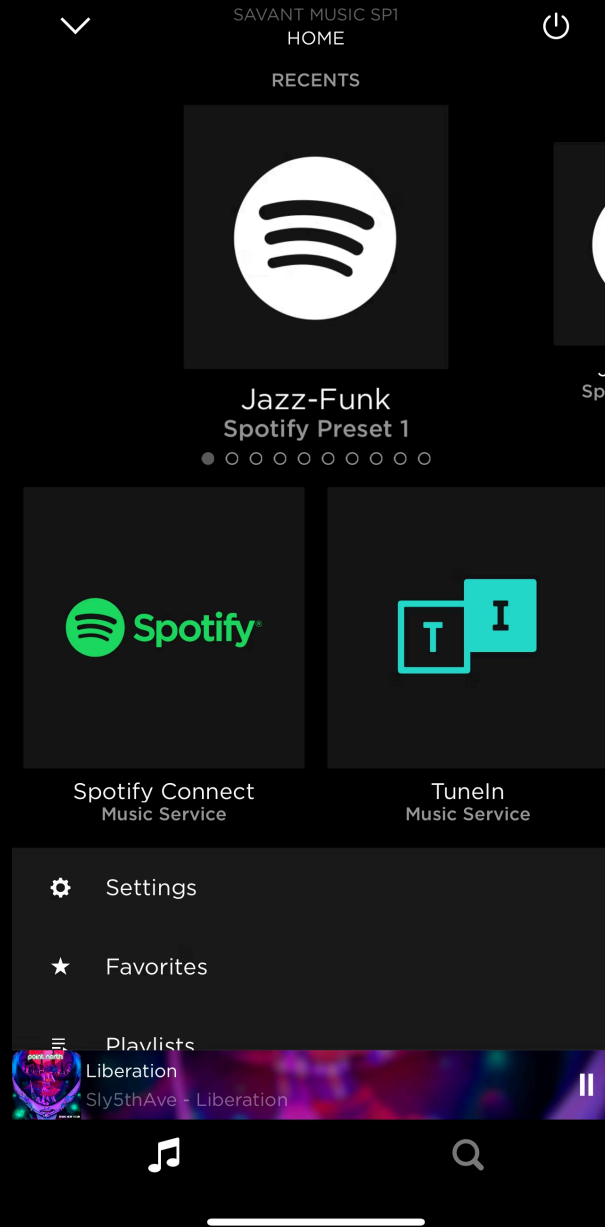

- Illuminate both outdoor garden areas and internal living spaces with comprehensive zoning for all lighting systems.
- Manage your blinds and shades within the same app, no need for extra remotes, regulate privacy and sunlight entry for a more efficient home.

MULTI-ROOM AUDIO MUSIC ZONES

Full in-home and remote access via the smart mobile app or a central touchscreen panel to;

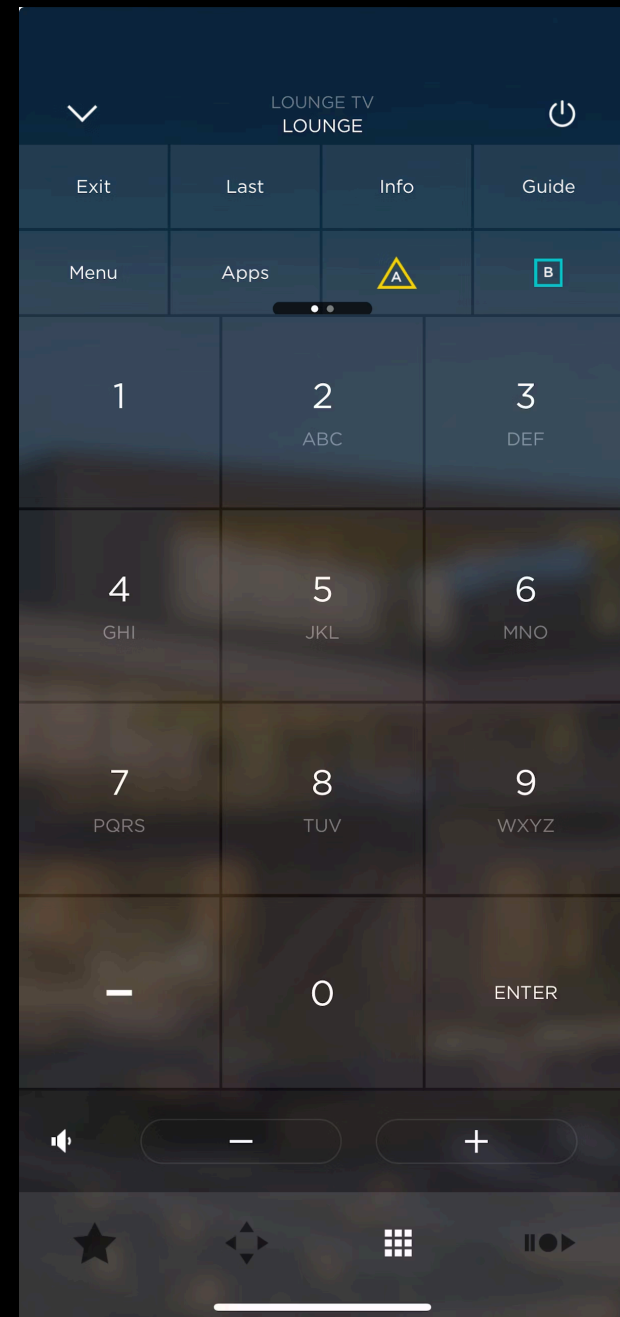

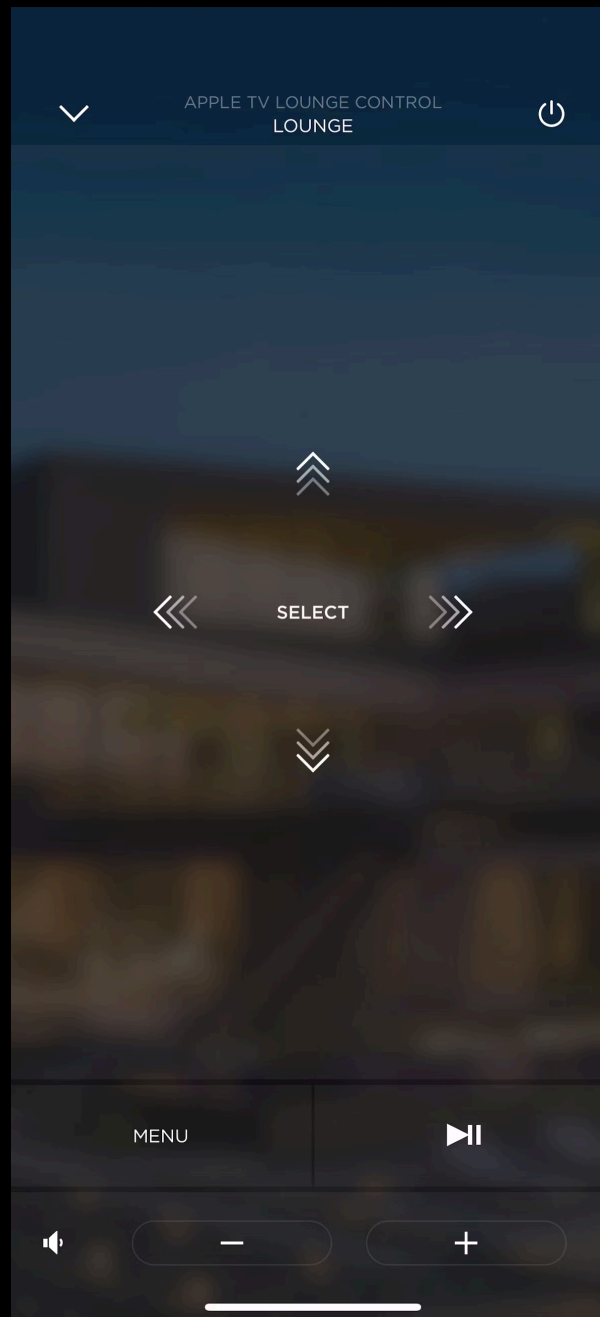

- Manage and control audio applications across all zones within the house.
- Stream music freely in designated areas.

AUDIOVISUAL TVs AND ZONES

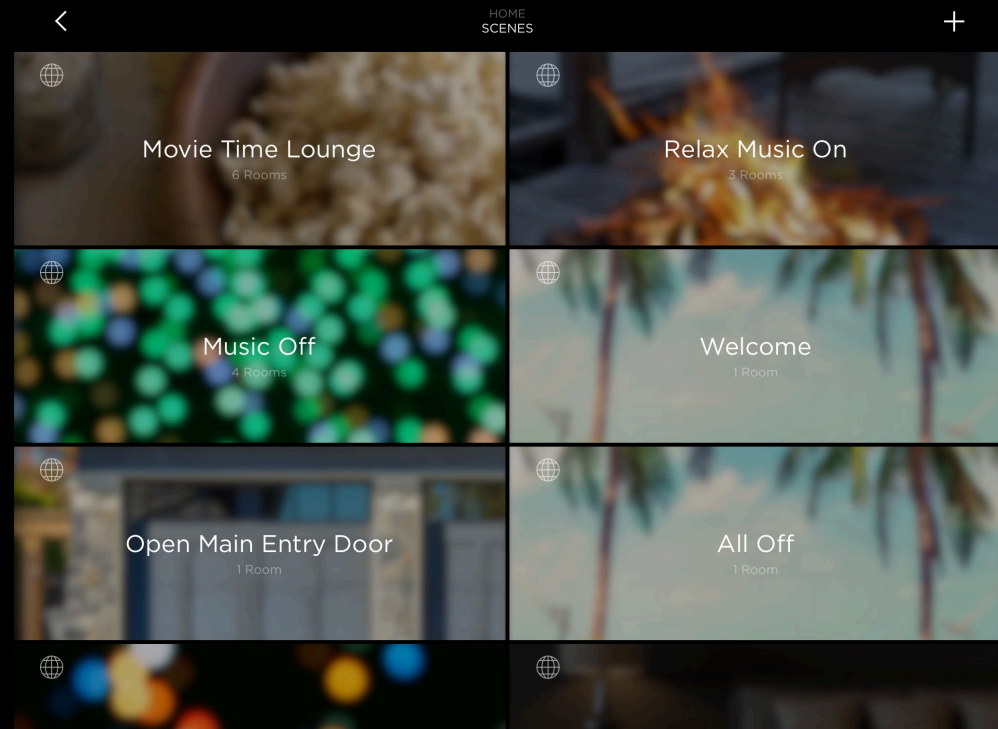

Full in-home and remote access via the smart mobile app or a central touchscreen panel to;

- Enjoy the freedom to stream any content you love to any TV or screen at your convenience.
- Manage and control entertainment applications across all zones within the house.

THE ENTIRE ECOSYSTEM

Allows you to create different setups which can trigger multiple actions with 1 button press & or voice command

HOW WE WORK WITH YOU

DISCOVERY MEETING

We define the scope of the project, understand the client's needs, and recommend solutions aligned with their goals.

PROJECT ALLOWANCE

We can provide a project sum allowance for you to include in the tender scheduling.

CLIENT ONBOARDING

Once the client has accepted, we can arrange a showroom visit for them to view product options.

AFTER CARE SERVICE

We provide ongoing support for the first year after installation ensuring the client is happy with the way the system is operating.
