

Digital keyless entry

Trusted every day

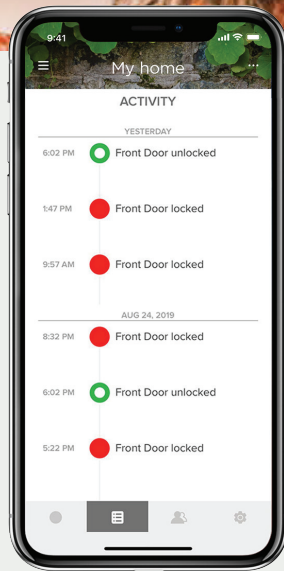

The Yale Access functionalities

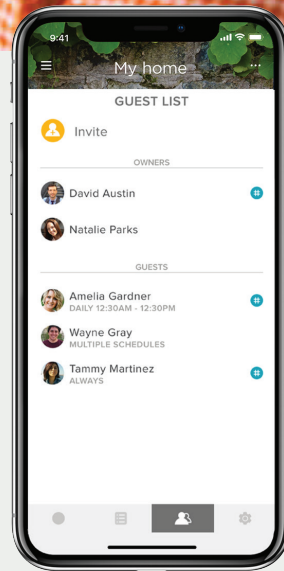

App control
Lock and unlock your door from your app, anywhere in the world.

DoorSense™ technology
The lock will check the status of the door and tells you if your door is securely closed and locked.

Activity monitoring
See who comes and when with the Activity Feed. Check who unlocked the door and if or when it was actually opened. Set-up alerts to notify when specific people arrive home.

Guest access
Grant unlimited digital keys valid for a few weeks, a few hours, or a few minutes. Never worry about lost or stolen keys again. Access can be app access or code only sent via a text message.

Grant entry from wherever you are with the Yale Access app

Remote access means you can let in family, friends and trusted visitors like the cleaner or dog walker – from anywhere – when your compatible Yale Access Lock is paired with Yale Connect Wi-Fi bridge.

Expecting guests? Send a virtual key

You can send virtual guest keys to friends, family or people you trust from the Yale Access app. Guests can come and go as they wish – and you don't need to worry about lost keys.

Know the ins and outs of your home

The 24/7 activity feed will help you check who is coming and when – even when you're not there. You'll know when guests have arrived, what time your children got home, and whether a tradesman or cleaner was in to get the job done.

Auto-lock and unlock as you come and go

For peace of mind, the auto-lock feature can automatically lock your door when you leave for the day. When you return home and walk up to your door auto-unlock will then unlock it again, so you don't need to fumble around with keys.

DoorSense™: for peace of mind

DoorSense™ is a technology which will let you know whether your door is securely closed. And if anything unexpected happens, like the door being left ajar, you will be the first to know.

Use your voice to control your lock

Yale Access works™ with Apple HomeKit, Amazon Alexa and Google Home. You can control your lock with your voice using Siri, Alexa or Google Assistant.

Yale Connect Wi-Fi Bridge

For voice assistant functionality and remote access and control of your lock.

Keep your home secure

Check if your door is locked from anywhere

Monitor access from anywhere

Always know who is coming and when

Control who has access

Let visitors in and out when you aren't home

Enable voice assistant

Yale Access Module

Turn your lock into a smart lock.

Manage lock settings
Manage your lock settings from your phone

Enables access from anywhere
The module allows Assure locks to work with the Yale Connect Wi-Fi Bridge (for away from home access and voice assistant compatibility)

Control who has access
The module also makes short term rental and cleaning or house sitting more accessible for you

Find the right lock for your door.

Yale is trusted by millions of people every day to keep what's important to them safe.

Our innovations have protected their homes, families and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes. Because we always make every effort to push the boundaries in a changing world.

We were there for your grandparents (and probably theirs) and we'll be there for your children.

ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-user needs for security, safety and convenience.
