

WHY US?

AFFORDABLE

We have focused on making Smart Home Automation as affordable as ever, leveraging modern wireless technology that is faster and cheaper to implement without compromising on speed, usability or functionality. Suitable for retrofit to your existing home or for your new build / extension.

HIGH QUALITY

We have partnered with top brands from around the world to bring you high quality Smart Home components that work together seamlessly. Brands including Apple, Yale, Legrand, Sonos, Netatmo, Samsung, Ring & Lutron.

COMPATABILITY

We have compatibility with all major voice assistants & smart home platforms including Apple Homekit, Google Home & Alexa, allowing you to easily and affordably add new devices to your smart home system over time.

FLEXIBILITY

We can provide our expert smart home electricians or partner with yours, we can supply and install, or even just supply your smart home gear

LEARN MORE

WHY A SMART HOME?

KEEP YOUR FAMILY & PROPERTY SAFE

Know when someone is on your property and have the ability to sound a siren or even speak with them. Be alerted to smoke alarms, water leaks, or high CO2 readings. Know when you forgot to lock the door, your children arrive home from school or a parcel has been dropped at your door.

LESS CHORES, MORE FAMILY TIME

A garden that waters itself, keeping it alive and saving up to 50% of water usage. A home that turns off all your lights and appliances as well as locks the door and arms the alarm when you leave home / go to bed.

CUT YOUR BILLS, SAVE THE PLANET

Did you know a smart home can save you 30-40% on energy costs? Smart homes do this by controlling lighting, appliances, blinds/ curtains, and heating/cooling based on presence, and temperature, whether your home or away.

SET THE MOOD, ENTERTAIN

Lighting that dims for TV time, your favourite music where you want it, the morning news waiting for you at breakfast time, hidden drop down cinema screen and cool coloured strip lighting.
