Patented Technology

NexGEN's composite core for superior strength and rigidity.

Fused non-porous surface encases the composite decking core. This surface innovation offers exceptional stain, fade, mold and scratch resistance.

Family and Earth Friendly

Free of harmful chemicals and produced using sustainable processes.

Made from recycled materials saving more than 100,000 tons of wood and plastics from landfills and incinerators each year.

NexGEN Decking™ Hidden Fasteners

These marine grade stainless steel fasteners are designed to fit the NexGEN grooved deck board for a quick and easy installation and produce blemish free surfaces.

No more nails!

FREQUENTLY ASKED QUESTIONS

What is it made of?

NexGEN Decking™ is crafted from 50% recovered hardwood and 50% UV-stabilised high-density polyethylene.

Where is it made?

USA with patented technology.

What are the advantages over traditional timber decking?

Long straight lengths, quick and easy installation, never warps, never rots, splinter free, no sanding, no painting, no sealing, no staining, long lasting, scratch resistant, termite resistant, Lifetime Warranty with a 50 year Stain and Fade Guarantee.

What maintenance is required?

Virtually none, only occasional cleaning with soap and water or a pressure clean.

How does NexGEN compare with other composite decking?

NexGEN Decking™ products are the only ones on the market that solves the three problems composite decking customers complain most about: colour fade, staining, and mould/mildew. Each board has a non-porous surface layer that is co-extruded into the wood fibre (golf ball cover technology). The non-porous cover is what sets our boards apart from all the other composites.

Will the surface peel or wear off?

The surface will not peel off due to the fact that the surface layer is co-extruded onto the wood fibre. Under normal conditions, the surface will last indefinitely. If exposed to high wear or abrasion, some wearing is possible. If any of the substrate becomes exposed, this is no cause for alarm because it contains the same UV stabilisers as the rest of the composition and is not affected.

How long will the antimicrobial product protection last?

Antimicrobial protection is built-in during the manufacturing process and will not wash off or wear away. It is engineered to provide continuous antimicrobial product protection for the useful lifetime of the product.

**Alfresco area

capped on 4 sides

WHY BUY FROM US?

- We can work off your plans or we can offer a full design service.
- We have great user-friendly DIY options.
- For full installation service, we can arrange multiple quotes from qualified trades.
- You deal direct with the importer, meaning the best pricing possible.
- We have been in business for over 45 years.
- We offer free quotes.

DECK CELL

Simple Sub-Frame System

Congratulations, you've just discovered the world's easiest sub-frame system. If you can put Lego together, then you can build a sub-frame using DeckCell.

- Save \$\$\$** Very DIY friendly
- Save \$\$\$** No need to waste time and effort lifting up your old pavers and disposing of them.
- Save \$\$\$** Very fast and easy to install.
- Save \$\$\$** No need for specialist tools and equipment such as welders and post hole diggers.

DeckCell is suitable when the area to be decked is concrete pads, pavers, bricks and compacted sand

Easy installation: Time is money and as such you will be saving again as DeckCell is very fast and easy to install compared to a traditional timber or steel sub-frame.

Each cell is 600mm x 500mm
30mm and 50mm heights available

INTRODUCING GOOD LIFE DECKING

- **Good Life Decking now available to the general public**
- **More for your money**
- **Authentic wood look features distinct grain patterns**
- **135mm wide x 24mm thick capped on three-sides**
- **Two solid colours closely resemble traditional stained decking**
- **25-Year Stain, Fade and Structural Warranty**

COMPETITORS VS NexGEN

OTHERS	NexGEN DECKING
DIY or non accredited installers can void product warranty	NexGEN encourages DIY and other installers and will honour the product warranty
Uncapped composites and timber require regular and expensive maintenance	NexGEN requires only an occasional wash with a hose costing far less over its lifetime
Uncapped composites and timber require toxic chemicals to manufacture and to retain their appearance	NexGEN decking is safer, eco-friendly, toxin-free and longer lasting
Uncapped composites and timber easily scratch, stain and fade	NexGEN decking looks like natural timber yet it is stain, fade and scratch resistant
Full sunlight, barbecues, dirt and grime can void warranty. Short warranties. No stain and fade warranty offered. Natural weathering means it will fade.	Barbecue grease, red wine, coffee, and muddy footprints simply wash off NexGEN Decking and for peace of mind we offer a 50 year STAIN and FADE warranty regardless of your decking being in full sun or part shade
Product can crack, split and splinter around screw holes which is not covered by warranty	NexGEN uses a stainless steel hidden fastener system which totally alleviates any fastener issues
Minimum height requirement of 200mm or more off the ground or you void the warranty	NexGEN Decking has no minimum height requirement to maintain warranty
No BAL (bushfire attack level) ratings	We have all BAL ratings covered. Even Flame Zone!
Very slippery	We have R10 and R12 Slip Ratings.
Fly by nighters not honouring warranties. Cheap products	NexGEN has been in business in Australia for over 45 years. Premium product manufactured in North America
Inferior products with inflated prices as importers sell to wholesalers who sell to retailers who sell to you	NexGEN is the Australian importer of the product meaning you get the best possible price for the best possible product

TESTIMONIALS

"I am very happy with the result. It's so easy to clean and it looks stunning. It transformed my yard. Best of all, it does not need any painting or staining and I have peace of mind that it will not fade or rot, all I need to do is to sit back and enjoy it !!!"

Goretti, New South Wales

"Due to the harsh weather conditions in Far North Qld the majority of our clients want low maintenance homes. NexGEN Decking ticks all the boxes. The final outcome of the job was great! We were happy and the clients were extremely pleased. We have no doubt that we will be using NexGEN Decking again in future jobs"

Higham Building Group, Queensland

"We visited the NexGEN display booth at the Melbourne HIA Home Show this year, were impressed with the product on display and made the call to have the deck installed to refresh our courtyard. Tony has done a great job, the deck looks amazing and we look forward to enjoying the new outdoor living area"

T & G Watson, Victoria

"When we saw your decking at a Brisbane Home Show, we were not only impressed with your decking, we were equally impressed with your customer care and service. While I was happy with the decking when it was first installed, I wanted to see how it withstood the test of time.

Now we are totally happy. After 15 months, it looks as good as the day it was installed. I believe we have given the decking a good test. We frequently conduct "Rock and Roll" dance lessons on it, with no sign of scuff marks! All who see and use the decking are impressed by the appearance, durability and the quality of the installation. Not only has the surface stood up to this wear and tear, everyone who has danced on it maintains it is a great dancing surface. When the warranty expires, we will be well into our 90's and hopefully still dancing!"

Your Happy NexGEN Customer, John & Faye Bennett, Deception Bay, Queensland

"I have found that your NexGEN product is absolutely fantastic. We had it laid months ago and it still looks brand new. There is no fading or warping and has stood the test of time as the kids ride their bikes and scooters on the decking and has not made any marks or scratches. I am confident this product will still look brand new in many years to come."

Joanne Whitchurch, Western Australia
