

The logical choice for plastic products.

We believe if single-use plastics must be used then they should be made to be recyclable and biodegrade where they will be disposed of – in a landfill, commercial or home compost facility.

THE EASY WAY FOR EVERYDAY

LANDFILL-BIODEGRADABLE OR HOME COMPOSTABLE

PLASTIC PRODUCTS

 **Biogone** THE LOGICAL CHOICE

LANDFILL-BIODEGRADABLE

Biogone's landfill-biodegradable plastic technology is made by combining conventional plastic with an organic additive.

- Biodegrades approximately 90% faster in landfill than conventional plastics
- Biodegrades to a humus-like material (organic matter) which is a natural plant fertiliser
- Does NOT fragment into microplastics
- Just as strong as conventional plastics
- Recyclable with mainstream soft plastics (where available)

HOME COMPOSTABLE

Biogone's home compostable plastics are certified in accordance with Australian/ NZ home compostable standard AS5810.

- Can be disposed of in a home compost, commercial compost facility or landfill
- Contain PBAT* which is a highly biodegradable material
- Has a typical shelf life of 12 months
- Not recyclable

OUR RANGE
