SNOW FRAMES - \$249

- » Model: SNOW3018
- » Ensures strength during winter
- » Fits inside 3m wide garden sheds
- » Number of snow frames required depends on size of the shed.
Please refer to our website:
www.absco sheds.com.au

TIMBER FLOORING KIT - \$195

- » 1.52mW x 0.78mD
- » Model: TIMBFLLR
- » 100% Australian renewables plantation grown timber
- » Pre-measured, cut & treated for long term protection
- » Ideal for sloping sites
- » Easy to assemble with full instructions
- » Not suitable in high wind areas
- » Manufacturer's 10 year warranty

Note: Timber floor kits are designed as a temporary flooring solution. Sheds must be anchored to a concrete slab to comply with Absco Sheds Lifetime Warranty.

SHED SIZE	KITS REQ.

3.0m x 3.0m	8

*Models with sliding doors are not compatible with timber flooring kits

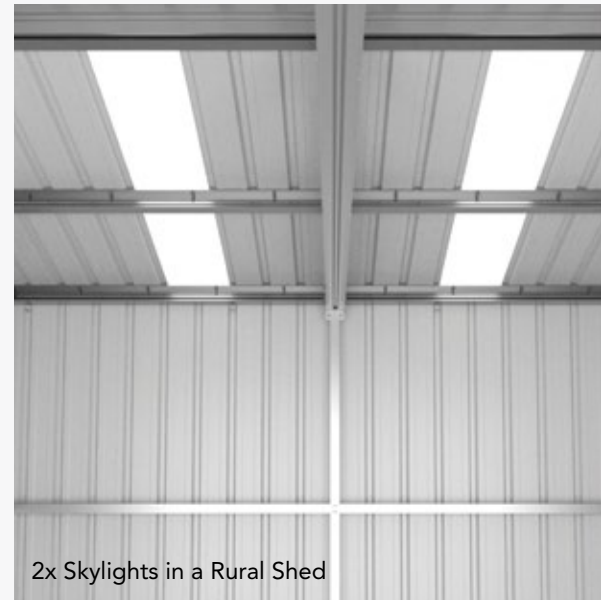

Timber Floor Kit

SKYLIGHT / SLIDING PERSPEX WINDOW

Skylight sheets enable light into your shed without the need for electricity. Made from tough fibreglass, this sheet is to be used when erecting the roof of your shed. Manufacturer's 10 year warranty.

SUITABLE FOR	MODEL	PRICE
Awnings Skylight: 2930mm (L) x 780mm (W)	SKYAW	\$239
Garages Skylight: 1900mm (L) x 750mm (W)	SKYGA	\$236
Rural Shed Skylight: 1580mm (L) x 750mm (W)	SKYRS	\$99
Garden Sheds Skylight: 1545mm (L) x 330mm (W)	SKYSH	\$99
Sliding Perspex Window: 730mm (L) x 230mm (W)	SLPW	\$144

- » Maximum of 1 perspex window per 2.3 meter panel
- » Garden Sheds Skylight: not available on smaller sheds (1545mm deep or less)
- » Skylight made from tough fibreglass
- » Sliding perspex window made from tough acrylic sheeting and PVC frame

2x Skylights in a Rural Shed

CYCLONE KIT

Cyclone Kits upgrade the wind rating of your shed to C1.

Most Absco Sheds are approved to Australian Standards AS11790.2.02 non-cyclonic conditions (N2)*. Installing a Cyclone Kit will upgrade your shed to C1. Please check the wind rating carefully and check the requirements with your local council before purchasing.

Information

- » Each frame kit is compatible with multiple shed sizes, as our sheds range in size from 1.5m to 6m. Cutting the frame to size is necessary for some models.
- » Installation of the Cyclone Kit is required *during* the garden shed assembly for the Regent, Utility, Workshop and Highlander Cyclone Kits. The Space Saver, Premier and 1.5m Cyclone Kits can be installed after shed construction.

MODEL	CYCLONE KIT	PRICE
1.5mW x 1.5mD Sheds	CYC15	\$320
Space Saver Range	CYCSKRSK	\$400
Premier Range	CYCGK	\$613
Regent Range	CYCRK	\$812
Utility Range	CYCWKUTK	\$1,018
Workshop Range		
Highlander Range	CYCHK	\$1,018

“We have a block of land in Mission Beach with an Absco Shed on it. Our shed has survived both Cyclone Larry and Cyclone Yasi and we couldn't be happier or more relieved to find it still intact thanks to the Absco Cyclone Kit installed.”

PATRICK, MISSION BEACH QLD
CUSTOMER TESTIMONIAL

HOW TO CHOOSE AN ABSCO PRODUCT

STEP 1 - SIZE & COLOUR

Measure the space you have available and what colour would suit your surroundings. Absco products are available in Zinalume® and COLORBOND® colours, with Surfsmist® trim unless otherwise stated.

Recommendation: Lay a concrete slab prior to building your shed. When laying a concrete slab, ensure there is a rebated edge 25mm deep, 75mm wide, around the perimeter. This will help water egress from the base of the shed.

STEP 2 - ROOF & DOORS

Absco sheds come with either a Gable, Skillion or Flat roof. Some ranges come with single, double, hinged, roller or sliding doors. Space Saver sheds have a sloping skillion roof designed specifically for small areas. Both Premier & Regent sheds have a gable roof and use a roof ridge beam. Premier & Regent sheds come with hinged doors. Absco Garages come with shutter, roller or barn doors. Personal access doors are available to purchase for all garages.

STEP 3 - CYCLONE KIT

Most Absco sheds are approved to Australian Standards AS11790.2.02 non-cyclonic conditions (N2). See table above on how to choose the right cyclone kit for your shed if you wish to have a higher wind rating than N2. If you reside in a cyclonic region please note the information in the guidelines prior to making your purchase.

Warning: It is recommended that new Galvanized mesh on your chicken coop should be weathered for two (2) months or scrubbed with a mild acidic solution such as vinegar, then rinsed with water before being used in bird housing appliances.

CYCLONIC REGION GUIDELINES

- 1 SELECT PRODUCT
- 2 ABSCO PLANS
- 3 BUILDING APPROVAL
- 4 PURCHASE
- 5 CONSTRUCTION

Most Absco products are suitable for construction in Queensland non-cyclonic regions (N2) but are not suitable for construction and will not gain council building approval in some cyclonic regions within 100km of the northern coastline of Australia.

The wind classification of your property depends on Wind Region, Terrain Category, Shielding Factor, and Topography Effect. This information is outlined in our Cyclone Kit Upgrade Guidelines & Classifications document.

For more information on wind classifications in your area, please check with your local council before purchasing an Absco product.

Documentation:

For construction in cyclonic regions it is essential that you apply for and attain written council building approval before you purchase. Once you have selected your Absco product, email the model number together with your site address to: admin@absco.com.au and we will email you the corresponding engineering documentation that you will need to submit for your building permit.

Absco will not accept any responsibility or liability, for any Absco product supplied or constructed within a cyclonic region prior to receiving a written building approval that may subsequently fail to receive final building certification.
