## ABOUT GRP AUSTRALIA

GRP Australia is a Brisbane based, family owned and operated company. As an independent supplier we source and import FRP pultruded structural sections, FRP grating and other related products from trusted quality manufacturers. This enables us to provide our customers with quality products at competitive prices.

## WHAT IS FRP?

FRP (fibreglass reinforced polymer), also known as fibreglass is a composite material made primarily of glass fibres and a thermosetting resin. The two main products supplied by GRP Australia are structural sections and moulded grating. Our FRP Structural Sections are a manufactured fiberglass product made in a continuous pultruded process while FRP Moulded Grating is a fiberglass decking product made in a batch process.

The exceptional high strength to weight ratio and versatility of FRP allows it to be used in various applications, while its customizability makes it ideal for meeting specific industry needs.

## ADVANTAGES

Cost  
Competitive

Non-corrosive &  
rot resistant

As strong as  
steel

Termite and  
vermin proof

High fire  
resistance

UV  
Stabilised

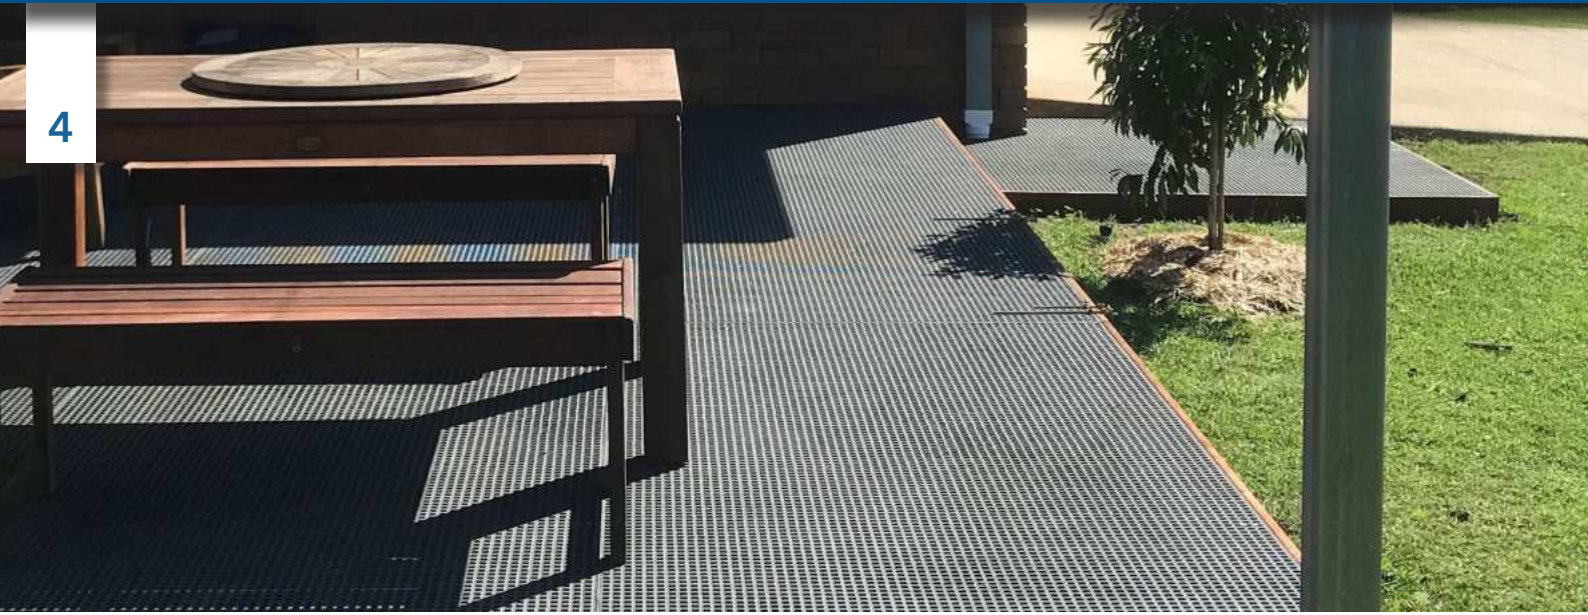

Lightweight & easy  
to manoeuvre

# FRP MOULDED GRATING

4

GRP Australia supplies high-quality FRP Moulded Grating, designed for strength, durability, and versatility across a wide range of industrial, commercial & residential applications. Available in various surface finishes and a broad spectrum of colors, our moulded grating is designed to address diverse safety and environmental conditions. Whether you require slip resistance, chemical resistance, or a specific aesthetic, GRP Australia's FRP Moulded Grating provides the ideal solution.

## SURFACE FINISHES

GRP Australia supply a wide range of surface finishes for FRP moulded grating, each providing varying levels of slip resistance and durability to suit different environmental conditions.

Glass **Beaded**

Concave **Finish**

Solid **Grit Top**

## STANDARD COLOUR RANGE

GRP Australia offer six standard colours in FRP Moulded Grating & Stair Treads

GRASS GREEN  
**RAL6010**

SLATE GREY  
**RAL7015**

SIGNAL YELLOW  
**RAL1003**

LIGHT GREY  
**RAL9006**

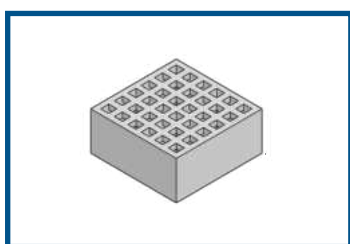

BLACK GREY  
**RAL7021**

SIGNAL BLACK  
**RAL9004**

## PRODUCT RANGE | MOULDED GRATING

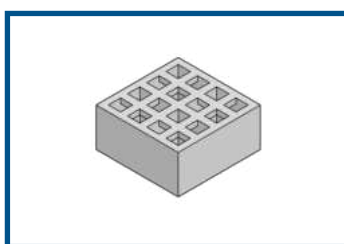

GRP Australia offers a comprehensive range of FRP Moulded Grating, all designed for superior strength, safety, and durability. Whether you need general-purpose grating or custom solutions, we have the perfect fit for your project.

**13x13/40x40 HEEL GUARD**

**Hole Aperture:** 8mm  
**Thickness:** 25, 30 & 38mm

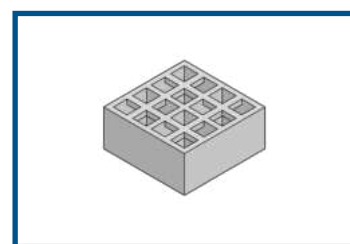

**Sheet Size:**  
1007 x 3007mm  
1247 x 4047mm

**19x19/38x38 MINI MESH**

**Hole Aperture:** 13mm  
**Thickness:** 25, 30 & 38mm

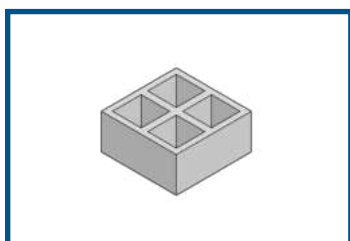

**Sheet Size:**  
1226 x 2445mm  
1226 x 3665mm

**20x20/40x40 MICRO MESH**

**Hole Aperture:** 14mm  
**Thickness:** 25, 30 & 38mm

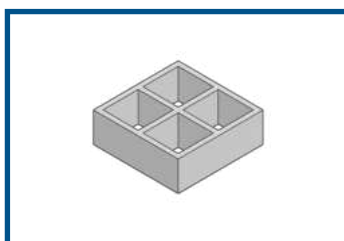

**Sheet Size:**  
1007 x 3007mm  
1247 x 4047mm

**38x38 STANDARD**

**Hole Aperture:** 33mm  
**Thickness:** 15, 25, 30 & 38mm

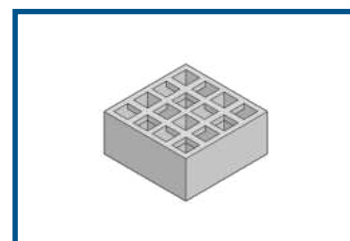

**Sheet Size:**  
615 x 3665mm  
1226 x 3665mm

**50x50 STANDARD**

**Hole Aperture:** 44mm  
**Thickness:** 25, 40, 50mm

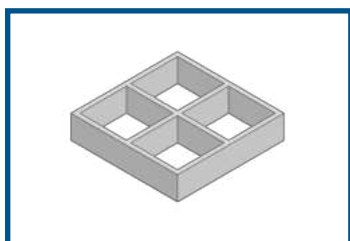

**Sheet Size:**  
1230 x 4020mm

**26x26/52x52 AGRI MESH**

**Hole Aperture:** 19mm  
**Thickness:** 30 & 38mm

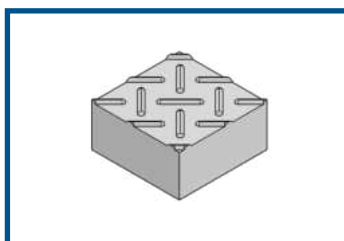

**Sheet Size:**  
998 x 3075mm

**83x83 STANDARD**

**Hole Aperture:** 76mm  
**Thickness:** 38 & 40mm

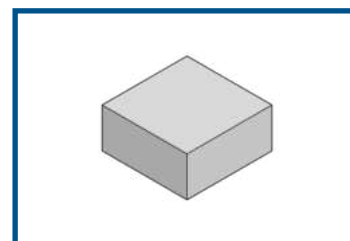

**Sheet Size:**  
1007 x 3007mm  
1247 x 4047mm

**DIAMOND TOP**

**Diamond Plated Surface**  
**Plate Thickness:** 3 or 5mm  
**Grating Thickness:** 25, 30 & 38mm

**Sheet Size:**  
1226 x 3665mm

**SOLID TOP**

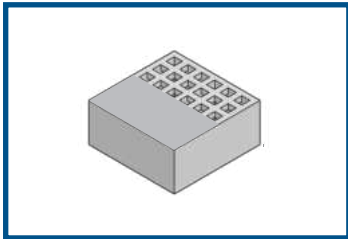

**Solid Grit Surface**  
**Plate Thickness:** 3 or 5mm  
**Grating Thickness:** 25, 30 & 38mm

**Sheet Size:**  
1226 x 3665mm

# FRP MOULDED GRATING

## 6 PRODUCT RANGE | STAIR TREADS

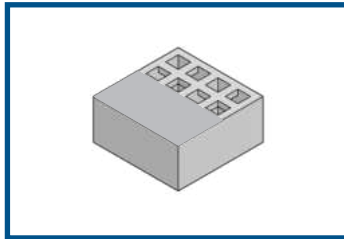

FRP Stair Treads are designed for maximum safety and durability, offering slip-resistant surfaces and exceptional resistance to corrosion, chemicals, and extreme weather conditions. Ideal for both indoor and outdoor environments, they provide long-lasting performance in industrial, commercial, and public settings.

### 13x13/40x40 TREADS

**Hole Aperture:** 8mm  
**Moulded Nosing:** 44mm  
**Thickness:** 38mm

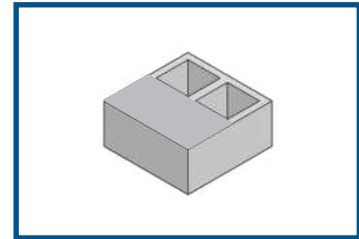

**Sheet Size:**  
287 x 3687mm

### 19x19/38x38 TREADS

**Hole Aperture:** 13mm  
**Moulded Nosing:** 44mm  
**Thickness:** 38mm

**Sheet Size:**  
275 x 1188mm  
275 x 3665mm

### 38x38 TREADS

**Hole Aperture:** 33mm  
**Moulded Nosing:** 44mm  
**Thickness:** 38mm

**Sheet Size:**  
275 x 3665mm

## APPLICATIONS

FRP Moulded Grating excels in challenging environments, offering outstanding performance in conditions where traditional materials may fail. It resists corrosion from chemicals, saltwater, and moisture. Additionally, its non-slip surface and resistance to extreme temperatures and UV exposure ensure safety and durability in harsh environments. These include:

- Industrial flooring and walkways
- Stair treads and landings
- Platform surfaces and decking
- Catwalks and access platforms
- Chemical processing plants
- Offshore and marine environments
- Wastewater treatment facilities
- Oil and gas facilities
- Cooling towers and power plants
- Pedestrian bridges and walkways
- Food and beverage processing areas
- Pulp and paper mills
- Conveyor system platforms
- Electrical substations

# FRP STRUCTURAL SECTIONS

8

FRP Structural Sections are high-performance, load-bearing profiles made from Fiberglass Reinforced Polymer designed to replace traditional materials like steel, aluminum, or wood in structural applications. These profiles are known for their exceptional strength, lightweight nature, and resistance to corrosion, chemicals, and environmental factors, making them ideal for use in demanding industrial, marine, and corrosive environments.

## STANDARD RESINS

### ISOPHTHALIC RESIN

Isophthalic resin is a high-performance polyester resin known for its excellent chemical resistance, durability, and strength. Commonly used in the production of FRP (Fiberglass Reinforced Plastic) products, it is ideal for applications that require resistance to corrosive environments, including chemical processing, marine, and industrial settings.

### VINYL ESTER RESIN

Vinyl ester resin is a versatile, high-performance resin offering superior chemical resistance, durability, and mechanical strength. It combines the benefits of epoxy and polyester resins, making it ideal for demanding applications in corrosive environments, such as chemical processing, marine, and industrial settings, where enhanced toughness and long-term performance are essential.

## STANDARD COLOUR RANGE

GRP Australia offer three standard colours in FRP Structural sections

TELEGREY 2  
RAL7046

SIGNAL YELLOW  
RAL1003

WINDOW GREY  
RAL7040

## PRODUCT RANGE | STRUCTURAL SECTIONS

FRP Structural Sections come in a wide variety of profiles, available in multiple sizes to suit diverse project needs. These lightweight, durable sections are designed for easy installation in construction and industrial applications.

### H BEAM

Profile Range: (mm)  
76 x 6.4 - 305 x 12.7  
(min) (max)

### I BEAM

Profile Range: (mm)  
15 x 32 x 6.4 - 152 x 305 x 12.7  
(min) (max)

### C CHANNEL

Profile Range: (mm)  
25 x 14 x 3 - 300 x 55 x 5  
(min) (max)

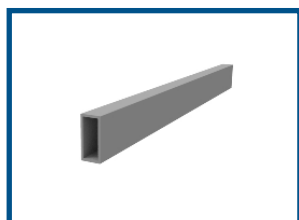

### Y BEAM

Profile Range: (mm)  
25 x 38 x 6.4 - 58 x 38 x 6.4  
(min) (max)

### SQUARE HOLLOW SECTION

Profile Range:  
25 x 3.2 - 152 x 12.7  
(min) (max)

### RECTANGULAR HOLLOW SECTION

Profile Range:  
44 x 25 x 3.2 - 200 x 30 x 5  
(min) (max)

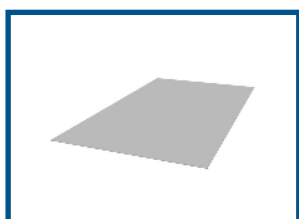

### CORRUGATED ROUND TUBE

Profile Range:  
19 x 32 x 6.4 - 71 x 90 x 9.5  
(min) (max)

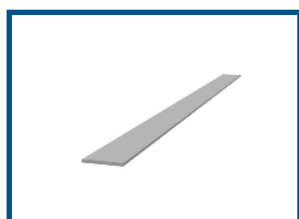

### ROUND TUBE

Profile Range:  
25 x 3.2 - 150 x 9.5  
(min) (max)

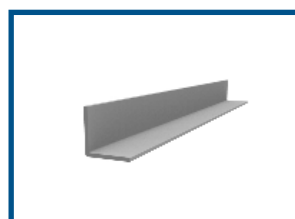

### FLAT PLATE

Profile Range: (mm)  
3.2 x 1000 - 25.4 x 1220  
(min) (max)

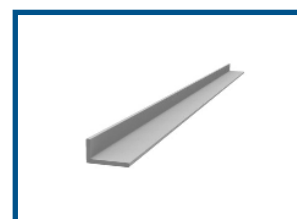

### FLAT STRIP

Profile Range: (mm)  
19 x 6.4 - 250 x 12  
(min) (max)

### EQUAL ANGLE

Profile Range: (mm)  
25 x 3.2 - 152 x 12.7  
(min) (max)

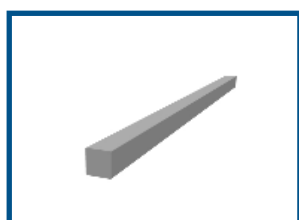

### UN-EQUAL ANGLE

Profile Range: (mm)  
40 x 22 x 4 - 254 x 40 x 6.4  
(min) (max)

### TOP HAT

Profile Range: (mm)  
90 x 30 x 30 x 4

### SOLID SQUARE ROD

Profile Range: (mm)  
25 x 25 - 38 x 38  
(min) (max)

### SOLID ROUND ROD

Profile Range: (mm)  
6 - 38  
(min) (max)

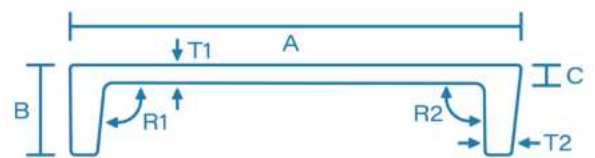

### KICK PLATE

Profile Range: (mm)  
100 x 13 x 3.2 - 148 x 12 x 4  
(min) (max)

# FRP STRUCTURAL SECTIONS

## 10 CUSTOM PROFILES

GRP Australia have the capabilities of providing custom FRP profiles, tailored to your exact specifications. By providing detailed profile dimensions, we can offer precise pricing and deliver high-quality, durable profiles that meet your project's unique requirements. The lead time on this process is 3-4 weeks to produce the profile's pultrusion die & an additional 10 - 12 weeks to manufacture. You will need to keep in mind that a minimum order quantity of 100 lineal metres is required for custom / non-stocked profiles.

## APPLICATIONS

FRP Structural Sections provide exceptional benefits in demanding environments where traditional materials are prone to deterioration. They are highly resistant to corrosion, chemicals, and moisture, making them ideal for use in corrosive environments. These sections also withstand extreme temperatures, UV exposure, and harsh weather conditions, ensuring long-term durability in outdoor and industrial settings. Their lightweight nature, combined with high strength, offers easy installation and low maintenance, even in the most challenging conditions. These include:

- Structural framing and supports
- Handrails and guardrails
- Platforms and walkways
- Pipe and cable trays
- Ladders and stairways
- Cooling tower structures
- Grating and flooring supports
- Bridge components and decking
- Offshore oil and gas platforms
- Chemical plant infrastructure
- Seawalls and coastal structures
- Electrical enclosures and panels
- Water treatment facilities
- Roof supports and purlins

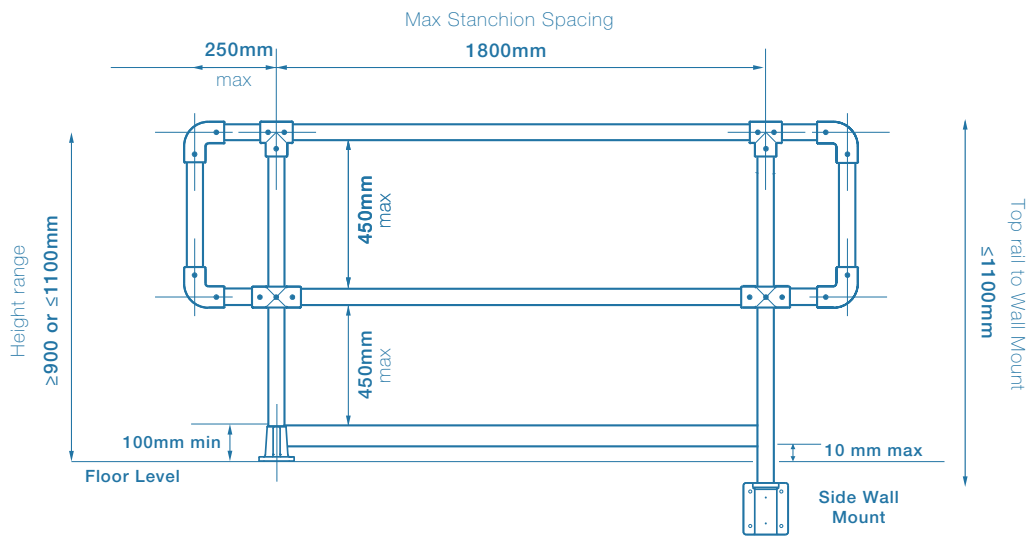

# FRP MODULAR HANDRAIL

12

Our FRP modular handrail system uses round tube (RT50x5) made from premium vinyl ester resin which forms the top rail, knee rail and stanchions. The rails and stanchions are connected using BMC composite fittings which are fire retardant, non-corrosive and contain UV inhibitors. The fittings are clamped together with stainless steel fasteners provided by GRP Australia.

The modular handrail system has been designed and laboratory tested to be compliant with the requirements of AS 1657-2018. The minimum design requirements for FRP Modular Handrail have been set out in the diagram below.

## STANDARD COLOUR RANGE

GRP Australia offer two standard colours in FRP Modular Handrail

SIGNAL YELLOW  
**RAL1003**

## APPLICATIONS

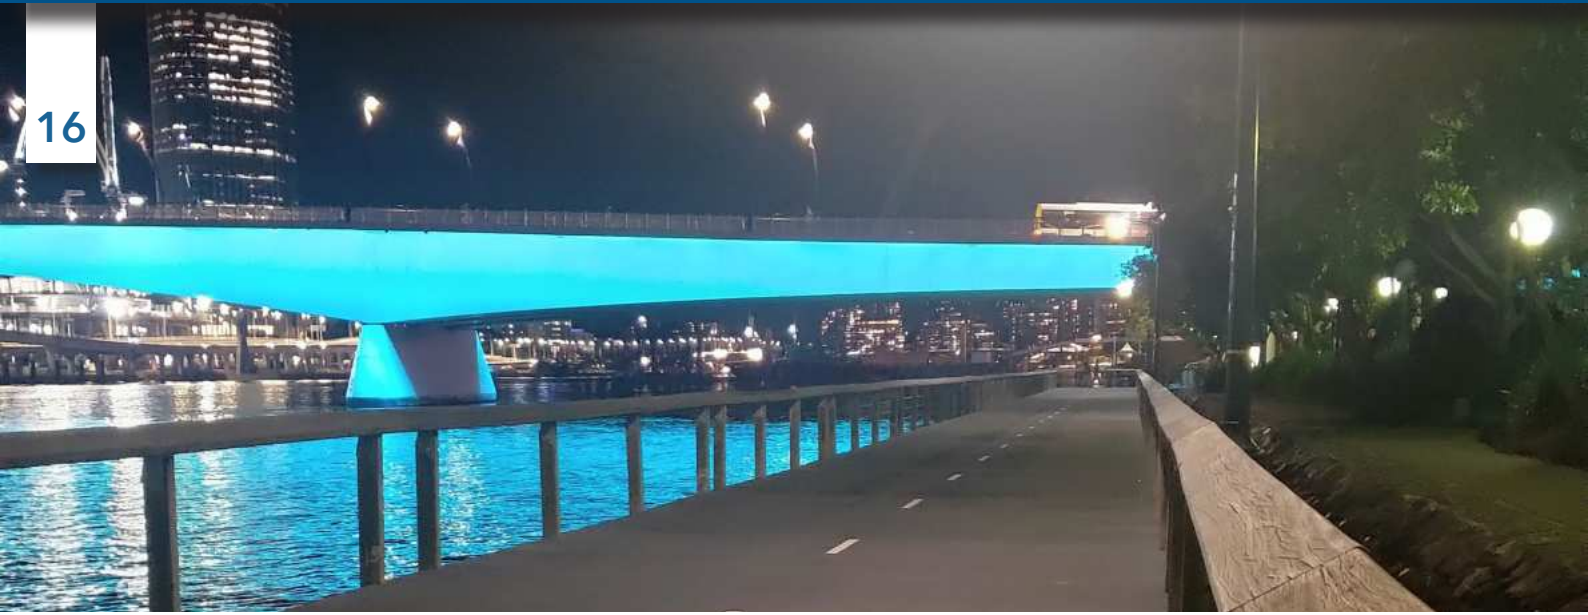

FRP Modular Handrails are specifically designed for environments exposed to harsh chemicals, moisture, and extreme weather, ensuring long-lasting performance where traditional materials often deteriorate. Ideal for industrial, marine, and coastal settings, these handrails offer superior corrosion resistance and safety in the most demanding conditions. These include:

- Industrial Walkways and Platforms
- Chemical Plants and Refineries
- Marine and Coastal Environments
- Water and Wastewater Treatment Plants
- Oil and Gas Facilities
- Mining and Mineral Processing Sites
- Public Infrastructure and Bridges
- Staircases and Ramps
- Power Generation Stations
- Food and Beverage Processing Plants
- Manufacturing Facilities
- Pulp and Paper Mills

# FRP PULTRUDED DECKING

16

Pultruded FRP decking is perfect for industrial walkways and platforms, offering a safe & durable flooring solution. The non-slip surface enhances safety in both wet and dry conditions, making it a reliable choice for areas with high foot traffic or exposure to the elements. Its lightweight yet durable construction simplifies installation, while the material's resistance to corrosion, moisture, and UV rays ensures a long lifespan with minimal maintenance.

## APPLICATIONS

FRP pultruded decking is specifically engineered for environments exposed to harsh chemicals, moisture, and heavy traffic, making it perfect for industrial sites, marine platforms, and wastewater facilities. Its superior corrosion resistance ensures reliable performance and longevity in the most challenging conditions. These include:

- Bridges and Boardwalks
- Jetties & Pontoons
- Water and Wastewater Treatment Facilities
- Industrial Walkways and Catwalks
- Chemical Processing Plants
- Offshore Oil and Gas Platforms
- Cooling Towers
- Corrosive Environments in Power Plants
- Food and Beverage Processing Areas
- Mining Operations
- Transportation Facilities
- Storage and Containment Areas

FP725-45	725	45	675	17.9	Silicon Grit

# COMPOSITE FASTENERS

18

Introducing our FRP Composite Fasteners, designed for superior strength, corrosion resistance, and durability in challenging environments. These lightweight, non-conductive fasteners are the ideal alternative to traditional metal options, ensuring long-lasting performance across various applications.

## APPLICATIONS

FRP Composite Fasteners are versatile solutions designed to meet the demands of a wide range of applications. Ideal for use in construction, marine, and industrial settings, these fasteners excel in environments where corrosion resistance, lightweight strength, and durability are crucial. These include:

- Aerospace and Aviation Components
- Marine and Offshore Structures
- Wind Turbine Assemblies
- Chemical Processing Equipment
- Automotive and Transportation
- Railway and Subway Systems
- Construction and Infrastructure Projects
- Electrical and Electronic Enclosures
- Water and Wastewater Treatment Plants
- Defense and Military Equipment
- Sporting Goods Manufacturing
- Telecommunication Towers

# FIBRE FRAME

20

Step into the future of decking with GRP Australia's Fibre Frame System, designed using high-performance Fiber Reinforced Polymer (FRP). Engineered to replicate the spans of traditional hardwood, our system delivers exceptional strength, durability, and resistance to the harshest weather conditions. Additionally, its lightweight design simplifies installation, and its low-maintenance properties keep your deck looking great with minimal effort.

## APPLICATIONS

Our Fibre Frame outdoor sub-structure system excels in wet, humid, and corrosive environments, offering unmatched durability and resistance to rot, rust, and chemical exposure. Ideal for coastal regions and moisture-prone areas, Fibre Frame provides a long-lasting, maintenance-free foundation for outdoor structures. These include:

- Coastal Decking and Boardwalks
- Swimming Pool Surrounds and Platforms
- Wetland Walkways and Nature Trails
- Rooftop Terraces and Green Roofs
- Rainforest or Tropical Region Structures
- Aquaculture Farms
- Coastal Home Decks & Patios
- Garden Walkways & Bridge
- Jetties & Pontoons
- Infrastructure in Flood-Prone Areas

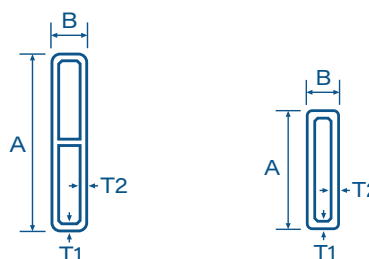

## PRODUCT RANGE | PROFILES

Our range of FRP posts, bearers, and joists are engineered to provide unparalleled strength, durability, and performance in decking applications. Designed for use in both residential and commercial settings, these components offer a modern, maintenance-free alternative to traditional timber, ensuring a stable and long-lasting foundation for your decking.

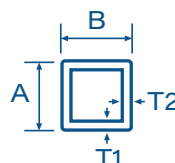

**BEARERS / JOISTS**

## 22 PRODUCT RANGE | BRACKETS

Our comprehensive range of brackets is specifically designed to seamlessly integrate with our FRP posts, bearers, and joists, ensuring a secure, stable, and durable decking structure. Engineered for maximum strength and ease of installation, these brackets are essential for creating a robust framework that supports your decking system's longevity and safety.
